**The Principle of Profit Models** Guiping Lin, Wei Wei, Wuxiang Zhu, 2015-01-16 This book mainly focuses on defining profit models, on how many main kinds of profit models there are, how profit models can change a company, and how to tailor a profit model to the needs of a certain company. In this context, profit models are classified as fixed-income, remaining-profit and profit-sharing, admission, toll, parking, fuel and sharing fees, profit sources, customer pricing, auction, combined pricing, etc. The logic behind all these profit models will be analyzed in detail and numerous micro-cases will be introduced. All of the micro-cases discussed are the best profit model practices used by outstanding enterprises, mainly from China and the USA (including HomeAway, Priceline, Tencent, Sina, Google, the Voice of China, CSPN and so on). These models will be complemented by a wealth of figures and additional tools to help readers better understand the principle of profit models. As such, the book not only explains “why” entrepreneurs preferred to apply a specific kind of profit model and not others, but also answers “how” they derived that model.

*A Practical Education* Randall Stross, 2018-09-04 The liberal arts major is often lampooned: lacking in skills, unqualified for a professional career, underemployed. But studying for the joy of learning turns out to be surprisingly practical. Unlike career-focused education, liberal education prepares graduates for anything and everything—and nervous fuzzy major students, their even more nervous parents, college career center professionals, and prospective employers would do well to embrace liberal arts majors. Just look to Silicon Valley, of all places, to see that liberal arts majors can succeed not in spite of, but because of, their education. A Practical Education investigates the real-world experiences of graduates with humanities majors, the majors that would seem the least employable in Silicon Valley's engineering-centric workplaces. Drawing on the experiences of Stanford University graduates and using the students' own accounts of their education, job searches, and first work experiences, Randall Stross provides heartening demonstrations of how multi-capable liberal arts graduates are. When given a first opportunity, these majors thrive in work roles that no one would have predicted. Stross also weaves the students' stories with the history of Stanford, the rise of professional schools, the longstanding contention between engineering and the liberal arts, the birth of occupational testing, and the popularity of computer science education to trace the evolution in thinking about how to prepare students for professional futures. His unique blend of present and past produces a provocative exploration of how best to utilize the undergraduate years. At a time when institutions of higher learning are increasingly called on to justify the tangible merits of the liberal arts, A Practical Education reminds readers that the most useful training for an unknowable future is the universal, time-tested preparation of a liberal

education.

**The Voice Catchers** Joseph Turow,2021-05-18 Your voice as biometric data, and how marketers are using it to manipulate you Only three decades ago, it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went, or that peoples’ exact locations could be tracked by those devices. We now take both for granted. Even just a decade ago the idea that individuals’ voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel. Yet a new business sector is emerging to do exactly that. The first in-depth examination of the voice intelligence industry, The Voice Catchers exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis. Amazon and Google have numerous patents pertaining to voice profiling, and even now their smart speakers are extracting and using voice prints for identification and more. Customer service centers are already approaching every caller based on what they conclude a caller’s voice reveals about that person’s emotions, sentiments, and personality, often in real time. In fact, many scientists believe that a person’s weight, height, age, and race, not to mention any illnesses they may have, can also be identified from the sound of that individual’s voice. Ultimately not only marketers, but also politicians and governments, may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole. Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective, explores its contemporary developments, and offers a clarion call for regulating this rising surveillance regime.

**Field Recordings from the Inside** Joe Bonomo,2017-03-01 Using as its epigraph and unifying principle Luc Sante’s notion that “Every human being is an archeological site,” Field Recordings from the Inside provides a deep and personal examination at the impact of music on our lives. Bonomo effortlessly moves between the personal and the critical, investigating the ways in which music defines our personalities, tells histories, and offers mysterious, often unbidden access into the human condition. The book explores the vagaries and richness of music and music-making—from rock and roll, punk, and R&B to Frank Sinatra, Nashville country, and Delta blues—as well as the work of a diverse group of artists and figures—Charles Lamb, music writer Lester Bangs, painter and television personality Bob Ross, child country musician Troy Hess, and songwriter Greg Cartwright. Mining the often complex natures and shapes of the creative process, Field Recordings from the Inside is a singular work that blends music appreciation, criticism, and pop culture from one of the most critically acclaimed music writers of our time.

**Recharge Your Library Programs with Pop Culture and Technology:** Linda D. Behen,2013-06-17 Learn how to integrate pop culture and technology into school library programs and classrooms, and make today's digital content, mobile devices, and students' changing interests work to the educator's advantage. Today's school libraries need to evolve and meet the needs of 21st-century students—the instruction, programming, and library services must be relevant to today's learners. Additionally, the interactions between educators and the students are what make the critical difference in the students' learning, and turn the library and classroom into places where they will find, assimilate, experience, and understand information. This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. She discusses the evolution of all libraries in response to digital content; ubiquitous mobile devices such as smart phones, iPads, and other tablet computers; patrons' changing interests; and the ways in which schools and school libraries have found to effectively adapt to technology changes and student needs. This book is essential for middle and high school librarians and educators, library school students and instructors, and young adult public librarians.

**New Frontiers in Entrepreneurial Fundraising** Pau Sendra-Pons,Dolores Garzon,María-Ángeles Revilla-Camacho,2023-09-19 This book on entrepreneurial fundraising combines rigor and applicability to train current and prospective entrepreneurs in the financing processes. Through its diverse set of chapters, it reviews the latest financing tools and dynamics, the most pressing dilemmas as well as practical examples of ideal methods in the economic-financial management of startups. This book analyzes the financing methods available to entrepreneurs from a practical perspective. Expert authors also present insights on topics such as the role of incubators and accelerators in entrepreneurial fundraising; crowd-based entrepreneurial fundraising instruments; factoring, leasing and confirming for entrepreneurs; government grants, subsidies, and tax reliefs; business angels and venture capital firms; access to capital markets through initial public offerings; and financing with crypto-assets. The book concludes with a discussion on emerging issues in the entrepreneurial finance paradigm, namely transparency and legitimacy and corporate governance in startups; and, additionally, provides a practical toolkit for fundraising, with the main mistakes, how to win over investors, success stories, and resounding failures. The editors, with extensive experience in advising entrepreneurs from a professional and academic perspective, have made a considerable effort to draw a learning roadmap that can be especially useful for entrepreneurs. Therefore, the resulting book may be of great interest to entrepreneurs and anyone interested in learning more about the financing process for entrepreneurs.
