📖 **The Resilient Founder** Mahendra Ramsinghani,2021-12-29 Managing your own psychology is the hardest skill for any founder As acclaimed investor and entrepreneur Ben Horowitz once stated, managing your own psychology is the hardest skill for any founder or CEO. In The Resilient Founder: Lessons in Endurance from Startup Entrepreneurs, Mahendra Ramsinghani gathers insights from over a hundred founders to deliver an intuitive and insightful guide to understanding our psychology and navigating the psychological pressures of startup leadership. Venture backed companies are expected to grow at high velocity, raise large amounts of capital, build teams effectively to achieve unicorn, no decacorn status. Yet the journey is long, filled with uncertainties, extremities and black swan events. It can wear out the best and the brightest. On the outside, a CEO can demonstrate sheer bravado, an invincible spirit as they behead dragons in the business battlefield. And on the inside, they deal with their dark side, subconscious struggles, emotional barriers, shame or guilt. The role of a founder can be lonely, frustrating and filled with high-highs and low-lows - all of this leading to anxiety, depression even suicide. This book addresses the fundamentals of understanding our own inner workings and explores practical ways of overcoming our inner hurdles. Filled with simple, yet concrete strategies, lessons and insights, founders and business leaders can work with stress, anxiety, and other mental challenges presented by the life of an entrepreneur. In this book, readers will learn to: Understand the basics of founder psychology, and how our inner workings can help or hurt us The importance of building a healthy ego, leading to resilience Draw on the lessons of established startup leaders on how to wrestle with their own mental and emotional challenges Written for founders, entrepreneurs and Chief Executive Officers, The Resilient Founder leads a gentle path to self-awareness, compassionate soul-care and inner wellbeing. Entrepreneur, investor and author Brad Feld calls this book dynamite. Case studies, philosophical perspectives and a generous dose of poetry is sprinkled across this book, which can be a companion for all those misfits, rebels and the crazy ones. For all those perpetually hitched on the roller coaster ride of entrepreneurial journey, this book is first of a kind to delve into the dark side and present a balanced approach to building your inner core as you build your company. This is no quick-fix guide, and we are perpetual work-in-progress. Today is Day One. Let us start the journey.

📖 **Spectral Analysis of Musical Sounds with Emphasis on the Piano** David M. Koenig,2015 This book addresses the analysis of musical sounds from the viewpoint of someone at the intersection between physicists, engineers, piano technicians, and musicians. The study is structured into three parts. The reader is introduced to a variety of waves and a variety of ways of presenting, visualizing, and analyzing them in the first part. A tutorial on the tools used throughout the book accompanies this introduction. The mathematics behind the tools is left to the appendices. Part Two provides a graphical survey of the classical areas of acoustics that pertain to musical instruments: vibrating strings, bars, membranes, and plates. Part Three is devoted almost exclusively to the piano. Several two- and three-dimensional graphical tools are introduced to study various characteristics of pianos: individual notes and interactions among them, the missing fundamental, inharmonicity, tuning visualization, the different distribution of harmonic power for the various zones of the piano keyboard, and potential uses for quality control. These techniques are also briefly applied to other musical instruments studied in earlier parts of the book. For physicists and engineers there are appendices to cover the mathematics lurking beneath the numerous graphs and a brief introduction to MATLAB® which was used to generate these graphs. A website accompanying the book (<https://sites.google.com/site/analysisofsoundsandvibrations/>) contains: - MATLAB® scripts - mp3 files of sounds - references to YouTube videos - and up-to-date results of recent studies

📖 **The Last Lecture** Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he’s learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand.—Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can’t help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn’t have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn’t about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

📖 **Poor Man’s Medicine** Dayton Lummis,2013-01-10 Poor Man’s Medicine is the third volume of what can be called “The Notational Trilogy”—acerbic views, interpretations and opinions about contemporary human existence, society, the environment, culture, and everything else. These pieces are sometimes wistful thoughts of things past, or often unease about the future that we are being dragged into. About previous books in this trilogy, readers have said they have been “informed, amused and—often—outraged!” These reactions will continue, and, as before, the reader will not be bored!
