Case Studies on the Regulatory Challenges Raised by Innovation and the Regulatory Responses OECD, Korea Development Institute, 2021-12-14 The pace and scope of innovation are challenging the way governments regulate. Existing regulatory frameworks might not be agile enough to accommodate the fast pace of technological development and, as a consequence, rules might become outdated.

Open Source Geospatial Science for Urban Studies Amin Mobasher, 2020-09-07 This book is mainly focused on two themes: transportation and smart city applications. Open geospatial science and technology is an increasingly important paradigm that offers the opportunity to promote the democratization of geographical information, the transparency of governments and institutions, as well as social, economic and urban opportunities. During the past decade, developments in the area of open geospatial data have greatly increased. The open source GIS research community believes that combining free and open software, open data, as well as open standards, leads to the creation of a sustainable ecosystem for accelerating new discoveries to help solve global cross-disciplinary urban challenges. The vision of this book is to enrich the existing literature on this topic, and act one step towards more sustainable cities through employment of open source GIS solutions that are reproducible. Various contributions are provided and practically implemented in several urban use cases. Therefore, apart from researchers, lecturers and students in the geography/urbanism domain, crowdsourcing and VGI domain, as well as open source GIS domain, it is believed the specialists and mentors in municipalities and urban planning departments as well as professionals in private companies would be interested to read this book.

Sourcing in India Guido Nassimbeni, Marco Sartor, 2008-09-11 Ranked as the second most important growing economy in the world, India represents one of the most interesting sourcing and selling markets. A real 'global strategy' cannot ignore it. Using the experiences of leading international companies (including Accenture, DHL and IDS), this book illustrates opportunities, threats and approaches in the management of an offshoring project in India. It clarifies issues concerning FDIs, intellectual property protection and transport/communication, and closes with a detailed description of five in-depth case studies.

E-Planning and Collaboration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-06-04 As population growth accelerates, researchers and professionals face challenges as they attempt to plan for the future. E-planning is a significant component in addressing the key concerns as the world population moves towards urban environments. E-Planning and Collaboration: Concepts, Methodologies, Tools, and Applications contains a compendium of the latest academic material on the emerging interdisciplinary areas of e-planning and collaboration. Including innovative studies on data management, urban development, and crowdsourcing, this multi-volume book is an ideal source for planners, policymakers, researchers, and graduate students interested in how recent technological advancements are enhancing the traditional practices in e-planning.

Understanding Smart Cities: A Tool for Smart Government or an Industrial Trick? Leonidas G. Anthopoulos, 2017-04-13 This book investigates the role of smart cities in the broader context of urban innovation and e-government, identifies what a smart city is in practice and highlights their importance to the welfare of society. The book offers specific, measurable, and action-oriented public sector planning and management principles and ideas for smart governance in the era of global urbanization and innovation to help with the challenges in maintaining the democratic system of checks and balances as well as the division of powers in a highly interconnected world. The book will be of interest researchers, practitioners, students, and public sector IT professionals that work within innovation management, public administration, urban technologies and urban innovation, and public local administration studies.

Trends in Sustainable Smart Cities and Territories Luis Fernando Castillo Ossa, Gustavo Isaza, Óscar Cardona, Omar Danilo Castrillón, Juan Manuel Corchado Rodríguez, Fernando De la Prieta Pintado, 2023-10-03 This book presents the latest scientific and technical advances in the fields of Smart Cities and Smart Territories. It shows outcomes of 2nd Sustainable Smart Cities and Territories International Conference in Manizales (Colombia) on June 21–23, 2023. The concept of smart cities, which emerged in the early 2000s, attempts to solve these challenges by implementing information and communication technologies. The initial concept of smart cities focused on the modernization of megacities.

Emerging Issues, Challenges, and Opportunities in Urban E-Planning Silva, Carlos Nunes, 2015-02-28 Recent advances in information and communication technologies have enhanced the standards of metropolitan planning and development. These innovations have led to new opportunities in this evolving profession. Emerging Issues, Challenges, and Opportunities in Urban E-Planning brings together the efficiency of web-based tools and digital technologies with the practice of spatial planning. Focusing on the utilization of geographic information systems, computer-assisted design, visualization concepts, and database management systems, this book is a pivotal reference source for planners, policymakers, researchers, and graduate students interested in how recent technological advancements are enhancing the traditional practices in urban planning.

Co-production in the Public Sector Mariagrazia Fugini, Enrico Bracci, Mariafrancesca Sicilia, 2016-06-27 This book examines the various ways in which co-production can contribute to the creation, design, and delivery of public services, namely by engaging the expertise of users and their networks, by promoting public services that are better targeted and more responsive to users, by cutting costs against the background of austerity in public finance, by creating a synergy between government and civil society that will impact positively on social capital, and by addressing the challenges resulting from growing democratic and citizenship deficits. Particular attention is paid to local government and the health and social care sector. After definition of the concept of co-production, the critical issues which arise when public services are co-produced are discussed. Various experiences of co-production are presented and analyzed with a view to highlighting why, how, and with what effect public service co-production may be implemented. Individual chapters focus on the impact of co-production in making cities smarter and the use of ICT in supporting co-production of public services. The book will be of relevance to a wide readership, from students to academics and professionals interested or engaged in public service management.

City Logistics 3 Eiichi Taniguchi, Russell G. Thompson, 2018-05-24 This volume of three books presents recent advances in modelling, planning and evaluating city logistics for sustainable and liveable cities based on the application of ICT (Information and Communication Technology) and ITS (Intelligent Transport Systems). It highlights modelling the behaviour of stakeholders who are involved in city logistics as well as planning and managing policy measures of city logistics including cooperative freight transport systems in public-private

partnerships. Case studies of implementing and evaluating city logistics measures in terms of economic, social and environmental benefits from major cities around the world are also given.

Digital Libraries and Crowdsourcing Mathieu Andro, 2018-01-19 Instead of outsourcing tasks to providers using labor-intensive countries, libraries around the world increasingly appeal to the crowds of Internet users, making their relationship with users more collaborative. These internet users can be volunteers or paid, work consciously, unconsciously or in the form of games. They can provide the workforce, skills, knowledge or financial resources that libraries need in order to achieve unimaginable goals.

Data Science Landscape Usha Mujoo Munshi, Neeta Verma, 2018-03-01 The edited volume deals with different contours of data science with special reference to data management for the research innovation landscape. The data is becoming pervasive in all spheres of human, economic and development activity. In this context, it is important to take stock of what is being done in the data management area and begin to prioritize, consider and formulate adoption of a formal data management system including citation protocols for use by research communities in different disciplines and also address various technical research issues. The volume, thus, focuses on some of these issues drawing typical examples from various domains. The idea of this work germinated from the two day workshop on "Big and Open Data – Evolving Data Science Standards and Citation Attribution Practices", an international workshop, led by the ICSU-CODATA and attended by over 300 domain experts. The Workshop focused on two priority areas (i) Big and Open Data: Prioritizing, Addressing and Establishing Standards and Good Practices and (ii) Big and Open Data: Data Attribution and Citation Practices. This important international event was part of a worldwide initiative led by ICSU, and the CODATA-Data Citation Task Group. In all, there are 21 chapters (with 21st Chapter addressing four different core aspects) written by eminent researchers in the field which deal with key issues of S&T, institutional, financial, sustainability, legal, IPR, data protocols, community norms and others, that need attention related to data management practices and protocols, coordinate area activities, and promote common practices and standards of the research community globally. In addition to the aspects touched above, the national / international perspectives of data and its various contours have also been portrayed through case studies in this volume.

Cities and Sustainable Technology Transitions Marina van Geenhuizen, Adam Holbrook, Mozhdeh Taheri, 2018-06-29 This enlightening book elucidates the leadership challenges of various cities in emerging transitions towards higher levels of sustainability. It examines elements of three socio-technical systems, energy, transport and healthcare, while addressing technology invention, commercialization, mass-production and adoption. The book breaks new ground in the analysis of topical issues such as local 'cradle' conditions, incentive schemes, niche-development, living labs, impact bonds, grass-roots intermediation and adaptive policy making. It offers a broad coverage of global systems of cities, with a particular focus on Scandinavia, Germany, the Netherlands, China, Korea, Japan, the US and Canada.

Internet of Things for Smart Environments Gonçalo Marques, Alfonso González-Briones, 2022-09-16 This book aims to introduce recent advances in IoT and its applications for smart environments. The state of the art is reviewed with a focus on the technologies, applications, challenges, and opportunities. At this stage, a comprehensive understanding of the formal and practical applications of IoT in the different scenarios of smart environments is necessary to support future research. Therefore, the main contribution of this book is a comprehensive study of the most recent proposals for smart environments. In addition, this book synthesizes existing information and highlights common threads and gaps that lead to new and complex areas of future research. The book covers a range of major research subjects which will foster future implementations. The topics include smart learning environments, crowdsensing applications, participatory citizen sensing, multimodal perception systems and security challenges. This book seeks to provide a valuable framework for future research projects by expounding the topic to academics, engineers, and industry professionals, which is necessary for the design of future IoT architectures for smart environments.

Artificial Intelligence for Knowledge Management Eunika Mercier-Laurent, M. Özgür Kayalica, Mieczysław Lech Owoc, 2021-07-03 This book features a selection of extended papers presented at the 8th IFIP WG 12.6 International Workshop on Artificial Intelligence for Knowledge Management, AI4KM 2021, held in Yokohama, Japan, in January 2021, in the framework of the International Joint Conference on Artificial Intelligence, IJCAI 2020.* The 14 revised and extended papers presented together with an invited talk were carefully reviewed and selected for inclusion in this volume. They present new research and innovative aspects in the field of knowledge management and discuss methodological, technical and organizational aspects of artificial intelligence used for knowledge management. *The workshop was held virtually.

Doing the Best I Can Kathryn Edin, Timothy Jon Nelson, 2013 Across the political spectrum, unwed fatherhood is denounced as one of the leading social problems of today. *Doing the Best I Can* is a strikingly rich, paradigm-shifting look at fatherhood among inner-city men often dismissed as deadbeat dads. Kathryn Edin and Timothy J. Nelson examine how couples in challenging straits come together and get pregnant so quickly--without planning. The authors chronicle the high hopes for forging lasting family bonds that pregnancy inspires, and pinpoint the fatal flaws that often lead to the relationship's demise. They offer keen insight into a radical redefinition of family life where the father-child bond is central and parental ties are peripheral. Drawing on years of fieldwork, *Doing the Best I Can* shows how mammoth economic and cultural changes have transformed the meaning of fatherhood among the urban poor. Intimate interviews with more than 100 fathers make real the significant obstacles faced by low-

income men at every step in the familial process: from the difficulties of romantic relationships, to decision-making dilemmas at conception, to the often celebratory moment of birth, and finally to the hardships that accompany the early years of the child's life, and beyond.

Purchasing and Supply Chain Management Thomas E. Johnsen,Mickey Howard,Joe Miemczyk,2018-10-26 For too long, business has focused on short-term cost advantages through low-cost country sourcing with little regard for the longer-term implications of global sustainability. Purchasing and Supply Chain Management, Second Edition, not only fully addresses the environmental, social and economic challenges of how companies manage purchasing and supply chains, but also delves deeper into emerging areas such as modern slavery, digital technologies and circular supply chains. In addition to explaining the basic principles and processes of both purchasing and supply chain management, the book evaluates how to develop strategic and sustainable purchasing and supply chain management. Our key message is that purchasing and supply chain management needs to focus on value creation rather than cost cutting. This requires the development of new purchasing and supply chain models that involve circular supply structures, supply chain transparency and collaboration with new stakeholders in traditional sourcing and supply chain settings. Aimed at students, educators and practitioners the book integrates sustainability into each chapter as a core element of purchasing and supply chain management. This second edition incorporates new examples and case studies from industry throughout, striking a balance between theoretical frameworks and guidelines for implementation in practice.
