Handbook of Structural Equation Modeling Rick H. Hoyle, 2014-01-01 The first comprehensive structural equation modeling (SEM) handbook, this accessible volume presents both the mechanics of SEM and specific SEM strategies and applications. The editor, contributors, and editorial advisory board are leading methodologists who have organized the book to move from simpler material to more statistically complex modeling approaches. Sections cover the foundations of SEM; statistical underpinnings, from assumptions to model modifications; steps in implementation, from data preparation through writing the SEM report; and basic and advanced applications, including new and emerging topics in SEM. Each chapter provides conceptually oriented descriptions, fully explicated analyses, and engaging examples that reveal modeling possibilities for use with readers' data. Many of the chapters also include access to data and syntax files at the companion website, allowing readers to try their hands at reproducing the authors' results.

New Directions in South African Tourism Geographies Jayne M. Rogerson, Gustav Visser, 2019-09-26 This book provides an overview of innovative and new directions being chartered in South African tourism geographies. Within the context of global change the volume explores different facets and different geographies of tourism. Key themes under scrutiny include the sharing economy, the changing accommodation service sector, touring poverty, tourism and innovation, tourism and climate change, threats to sustainability, inclusive tourism and a number of studies which challenge the present-mindedness of much tourism geographical scholarship. The 18 chapters range across urban and rural landscapes in South Africa with sectoral studies which include adventure tourism, coastal tourism, cruise tourism, nature-based tourism, sports tourism and wine tourism. Finally, the volume raises a number of policy and planning issues in the global South in particular relating to sustainability, local economic development and poverty reduction. Outlining the impact of tourism expansion in South Africa and suggesting future research directions, this stimulating book is a valuable resource for geographers as well as researchers and students in the field of tourism studies.

Structural Equation Modeling With Lisrel, Prelis, and Simplis Barbara M. Byrne, 2013-05-13 This book illustrates the ease with which various features of LISREL 8 and PRELIS 2 can be implemented in addressing research questions that lend themselves to SEM. Its purpose is threefold: (a) to present a nonmathematical introduction to basic concepts associated with SEM, (b) to demonstrate basic applications of SEM using both the DOS and Windows versions of LISREL 8, as well as both the LISREL and SIMPLIS lexicons, and (c) to highlight particular features of the LISREL 8 and PRELIS 2 programs that address important caveats related to SEM analyses. This book is intended neither as a text on the topic of SEM, nor as a comprehensive review of the many statistical functions available in the LISREL 8 and PRELIS 2 programs. Rather, the intent is to provide a practical guide to SEM using the LISREL approach. As such, the reader is walked through a diversity of SEM applications that include both factor analytic and full latent variable models, as well as a variety of data management procedures.

The Agulhas Current Johann R.E. Lutjeharms, 2006-08-26 Based on the research findings of 60 years, the author describes the origins of the Agulhas Current, its behaviour, its influence on the adjacent continental shelf, its effect on local weather and its role in linking the Indian and Atlantic Oceans. The text is well-illustrated and includes asides on the history of research on the Current. An exhaustive bibliography gives easy access to present knowledge on this important current system.

Physiological Ecology of Forest Production J. J. Landsberg, Peter Sands, 2010-11-26 Process-based models open the way to useful predictions of the future growth rate of forests and provide a means of assessing the probable effects of variations in climate and management on forest productivity. As such they have the potential to overcome the limitations of conventional forest growth and yield models, which are based on mensuration data and assume that climate and atmospheric CO₂ concentrations will be the same in the future as they are now. This book discusses the basic physiological processes that determine the growth of plants, the way they are affected by

environmental factors and how we can improve processes that are well-understood such as growth from leaf to stand level and productivity. A theme that runs through the book is integration to show a clear relationship between photosynthesis, respiration, plant nutrient requirements, transpiration, water relations and other factors affecting plant growth that are often looked at separately. This integrated approach will provide the most comprehensive source for process-based modelling, which is valuable to ecologists, plant physiologists, forest planners and environmental scientists. Includes explanations of inherently mathematical models, aided by the use of graphs and diagrams illustrating causal interactions and by examples implemented as Excel spreadsheets Uses a process-based model as a framework for explaining the mechanisms underlying plant growth Integrated approach provides a clear and relatively simple treatment

Human Resource Management in the Public Sector Ronald J. Burke,Andrew Noblet,Cary L. Cooper,2013-01-01 'An impressive collection of authoritative treatments of major current and ongoing topics in public sector human resource management, provided by both well-established experts and up-and-coming scholars who are becoming leaders in the field. A valuable resource for courses on the topic and an important reference for scholars and those seeking to maintain expert knowledge about it.' - Hal G. Rainey, The University of Georgia, US This insightful book presents current thinking and research evidence on the role of human resource management policies and practices in increasing service quality, efficiency and organizational effectiveness in the public sector. Internationally, public sector organisations face enormous challenges, including increasingly uncertain political and economic environments, more vigilant and cost-conscious governments, rapidly evolving community needs and an ageing workforce. This collection examines a range of HRM-related topics that will influence the capacity of public sector agencies to negotiate and respond to the challenges ahead. These topics include managing public sector human resources during an economic downturn, enhancing the satisfaction and motivation of public sector employees, attracting and retaining talent, leadership development, and case studies in successful public sector organizational change. With each chapter drawing on the latest research, but also emphasizing the practical implications, this collection is suitable for practitioners, researchers and students alike. It will also be valuable for HR specialists and managers of HR units in the public sector.

Psychological Assessment in South Africa Sumaya Laher,Kate Cockcroft,2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. Psychological Assessment in South Africa provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students, as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers and human resource practitioners.

Wetlands: Monitoring, Modelling and Management Tomasz Okruszko,Edward Maltby,Jan Szatylowicz,Dorota Mirosław-Swiątek,2014-04-21 Wetlands are complex and dynamic ecological

systems incorporating two important, inter-linked components: hydrology and vegetation. Modelling wetland components and processes reveals the nature of wetland systems and helps to predict the effects of environmental change. The main goal of much current research is the construction of a vigorous and sp

Insights and Innovations in Structural Engineering, Mechanics and Computation Alphose

Zingoni,2016-11-25 *Insights and Innovations in Structural Engineering, Mechanics and Computation* comprises 360 papers that were presented at the Sixth International Conference on Structural Engineering, Mechanics and Computation (SEMC 2016, Cape Town, South Africa, 5-7 September 2016). The papers reflect the broad scope of the SEMC conferences, and cover a wide range of engineering structures (buildings, bridges, towers, roofs, foundations, offshore structures, tunnels, dams, vessels, vehicles and machinery) and engineering materials (steel, aluminium, concrete, masonry, timber, glass, polymers, composites, laminates, smart materials).

Creating a South African Sub-Regional Conflict Transformation Model Noluthando

Phungula,2024-01-11 This book contributes to the current academic debate and scholarly research on conflict transformation in the Southern African Development Community (SADC) sub-region. It will serve as a guide on how conflict recurrences can best be tackled in the sub-region, and seeks to improve the transformation process of conflict and peace-building in the Kingdom in the Sky and in the sub-region at large. The book will shed light on the road ahead for the SADC and its role in transforming conflict into positive peace and peace-building, and will contribute to discussions on the necessity of a conflict transformation model as a key tool in efforts to transform the state of recurring intrastate conflict in Lesotho. Thus, this book will also enhance the literature and discourse on sub-regional organisations and their path towards conflict transformation on the African continent.

Editorial Peer Review Ann C. Weller,2001 This book is the first to provide an in-depth analysis of the peer review process in scholarly publishing. Author Weller offers a systematic review of published studies of editorial peer review in the following broad categories: general studies of rejection rates, studies of editors, studies of authors, and studies of reviewers. The book concludes with an examination of new models of editorial peer review intended to enhance the scientific communication process as it moves from a print to an electronic environment.

The Palgrave Handbook of Africa's Economic Sectors Evelyn F. Wamboye,Bichaka

Fayissa,2022-05-27 This handbook provides a reference resource to showcase insightful and nuanced perspectives on Africa's agriculture, industry, services, and manufacturing sectors; factors affecting the sectors' competitiveness; and the sectors' contribution to employment, economic growth, and sustainable development. It also addresses the potential benefits that the sectors could harness from the planned Continental Free Trade Area (CFTA), and in particular how CFTA could increase the efficiency and competitiveness of these sectors. This book provides evidence-based holistic analyses of the past and current state of Africa's economic sectors, with a strong emphasis on tangible and specific policy recommendations for the purpose of enhancing future economic growth, employment, and sustainable development of the continent. It also assesses the impact of the first-ever Continental Free Trade Area in Africa, and its potential implications for Africa's integration into regional and global economy and competitiveness relative to other fast developing economies (such as those in Asia). This handbook gives an in-depth analysis of fundamental domestic factors that have relevance on the sectors' expansion and growth and their contributions to employment, economic growth, and sustainable development in Africa with differential effects across the continent.

Resolving the Late Paleozoic Ice Age in Time and Space Christopher R. Fielding,Tracy D.

Frank,John L. Isbell,2008-01-01 This volume summarizes new developments in understanding the longest-lived icehouse period in Phanerozoic Earth history, the late Paleozoic ice age. Resolving the

Late Paleozoic Ice Age in Time and Space provides summaries of existing and new data from the various Gondwanan continental relics, and also reviews stratigraphic successions from the paleotropical and temperate regions of Laurussia that preserve an indirect record of glaciation. It addresses the extent to which records of glaciation indicate protracted, long-term climatic austerity, as opposed to fluctuating, more dynamic climate, and provides new constraints on the timing of glaciation. Additionally, it tackles questions of synchronicity of glaciation across the various Gondwanan continental relics, and timing relationships between near-field and far-field records at greater levels of resolution than has been possible previously. Results point toward a dynamic icehouse regime that is comparable to the Cenozoic icehouse, and away from traditional interpretations of the late Paleozoic ice age as a single, protracted event that involved stable, long-lived ice centers.--Publisher's website.

Climate Change, Intercropping, Pest Control and Beneficial Microorganisms Eric Lichtfouse, 2009-09-23 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. Sustainable agriculture is a discipline that addresses current issues such as climate change, increasing food and fuel prices, poor-nation starvation, rich-nation obesity, water pollution, soil erosion, fertility loss, pest control, and biodiversity depletion. Novel, environmentally-friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy, and social sciences. Indeed, sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries. For that, scientists use the system approach that involves studying components and interactions of a whole system to address scientific, economic and social issues. In that respect, sustainable agriculture is not a classical, narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable agriculture treats problem sources. Because most actual society issues are now intertwined, global, and fast-developing, sustainable agriculture will bring solutions to build a safer world. This book series gathers review articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision-makers, professors, farmers and politicians who wish to build a safe agriculture, energy and food system for future generations.
