iPodpedia Michael Miller,2007-04-26 iPodpedia is the first book to show you everything that the iPod and iTunes have to offer—from music to movies and beyond. Whether you want to get the most out of your iPod's music playback, create your own playlists, edit your music info and album art, convert your home movies and DVDs to iPod videos, listen to audiobooks and podcasts, or just unfreeze a frozen iPod, iPodpedia will show you how to do it. Michael Miller has written more than 75 non-fiction how-to books over the past two decades, including Googlepedia: The Ultimate Google Reference, Absolute Beginner's Guide to Computer Basics, How Microsoft Windows Vista Works, How Home Theater and HDTV Work, Tricks of the eBay Masters, and YouTube 4 You. His books have collectively sold more than a million copies worldwide, and he has established a reputation for offering real-world advice about complicated topics. More information can be found at the author's website (www.molehillgroup.com) and at iPodPedia: The Blog (ipodpediatheblog.blogspot.com).   Neural Networks with Keras Cookbook V Kishore Ayyadevara,2019-02-28 Implement neural network architectures by building them from scratch for multiple real-world applications. Key FeaturesFrom scratch, build multiple neural network

architectures such as CNN, RNN, LSTM in KerasDiscover tips and tricks for designing a robust neural network to solve real-world problemsGraduate from understanding the working details of neural networks and master the art of fine-tuning themBook Description This book will take you from the basics of neural networks to advanced implementations of architectures using a recipe-based approach. We will learn about how neural networks work and the impact of various hyper parameters on a network's accuracy along with leveraging neural networks for structured and unstructured data. Later, we will learn how to classify and detect objects in images. We will also learn to use transfer learning for multiple applications, including a self-driving car using Convolutional Neural Networks. We will generate images while leveraging GANs and also by performing image encoding. Additionally, we will perform text analysis using word vector based techniques. Later, we will use Recurrent Neural Networks and LSTM to implement chatbot and Machine Translation systems. Finally, you will learn about transcribing images, audio, and generating captions and also use Deep Q-learning to build an agent that plays Space Invaders game. By the end of this book, you will have developed the skills to choose and customize multiple neural network architectures for various deep learning problems you might encounter. What you will learnBuild multiple advanced neural network architectures from scratchExplore transfer learning to perform object detection and classificationBuild self-driving car applications using instance and

semantic segmentationUnderstand data encoding for image, text and recommender systemsImplement text analysis using sequence-to-sequence learningLeverage a combination of CNN and RNN to perform end-to-end learningBuild agents to play games using deep Q-learningWho this book is for This intermediate-level book targets beginners and intermediate-level machine learning practitioners and data scientists who have just started their journey with neural networks. This book is for those who are looking for resources to help them navigate through the various neural network architectures; you'll build multiple architectures, with concomitant case studies ordered by the complexity of the problem. A basic understanding of Python programming and a familiarity with basic machine learning are all you need to get started with this book.

  Kids' Computer Capers Sandra Markle,1983 Presents the history of computers, investigates what computers can and cannot do, explores how they work, and explains how to operate a computer and write programs. Includes puzzles, activities, and mini-mysteries.

  The History of the Computer Rachel Ignotofsky,2022-05-17 A strikingly illustrated overview of the computing machines that have changed our world—from the abacus to the smartphone—and the people who made them, by the New York Times bestselling author and illustrator of Women in Science. "A beautifully illustrated journey through the history of computing, from the

Antikythera mechanism to the iPhone and beyond—I loved it."—Eben Upton, Founder and CEO of Raspberry Pi ONE OF THE BEST BOOKS OF THE YEAR: The New York Public Library Computers are everywhere and have impacted our lives in so many ways. But who created them, and why? How have they transformed the way that we interact with our surroundings and each other? Packed with accessible information, fun facts, and discussion starters, this charming and art-filled book takes you from the ancient world to the modern day, focusing on important inventions, from the earliest known counting systems to the sophisticated algorithms behind AI. The History of the Computer also profiles a diverse range of key players and creators—from An Wang and Margaret Hamilton to Steve Jobs and Sir Tim Berners-Lee—and illuminates their goals, their intentions, and the impact of their inventions on our everyday lives. This entertaining and educational journey will help you understand our most important machines and how we can use them to enhance the way we live. You'll never look at your phone the same way again!

A Confiscated Memory Yfaat Weiss,2011 Yfaat Weiss tells the story of an Arab neighborhood in Haifa that later acquired iconic status in Israeli memory. Weiss investigates the erasure of Wadi Salib's Arab heritage and its emergence as an Israeli site of memory. Through her sensitive reading of events, she offers uncommon perspective on the personal and political making of Israeli belonging.

  Memory and Identity in Canadian Fiction Sharon Selby,2018-09-14 Covering the works of Canadian authors Alistair Macleod, Michael Ondaatje, Jane Urquhart, Margaret Atwood and Drew Hayden Taylor, the author explores how the themes of memory, storytelling and identity develop in their fiction. For the narrative voices in these works, the past is embedded in the present and a wider cultural history is written over with personal significance. The act of storytelling shapes the characters' lives, letting them rewrite the past and be haunted by it. Storytelling becomes an existential act of everyday connection among ordinary people and daily (often unrecognized) acts of heroism.

  Memory Ireland Oona Frawley,Katherine O'Callaghan,2014-05-16 In the fourth and final volume of the Memory Ireland series, Frawley and O'Callaghan explore the manifestations and values of cultural memory in Joyce's Ireland, both real and imagined. An exemplary author to consider in relation to questions of how history is remembered and recycled, Joyce creates characters who confront particularly the fraught relationship between the individual and the historical past; between the crisis of colonial history and the colonized state; and between the individual's memory of his or her own past and the past of the broader culture. The collection includes leading Joyce scholars—Vincent Cheng, Anne Fogarty, Luke Gibbons, and Declan Kiberd—and considers such topics as Jewish memory in Ulysses, history and

memory in Finnegans Wake, and Joyce and the Bible.

Smarter Than You Think Clive Thompson,2013-09-12 A revelatory and timely look at how technology boosts our cognitive abilities—making us smarter, more productive, and more creative than ever It's undeniable—technology is changing the way we think. But is it for the better? Amid a chorus of doomsayers, Clive Thompson delivers a resounding "yes." In Smarter Than You Think, Thompson shows that every technological innovation—from the written word to the printing press to the telegraph—has provoked the very same anxieties that plague us today. We panic that life will never be the same, that our attentions are eroding, that culture is being trivialized. But, as in the past, we adapt—learning to use the new and retaining what is good of the old. Smarter Than You Think embraces and extols this transformation, presenting an exciting vision of the present and the future.

Inhabiting Memory in Canadian Literature / Habiter la mémoire dans la littérature canadienne Benjamin Authers,Maïté Snauwaert,Daniel Laforest,2017-11-30 This book examines the cultural work of space and memory in Canada and Canadian literature, and encourages readers to investigate Canada within its regional, national, and global contexts. It features seven chapters in English and five in French, with a bilingual introduction. The contributors invite us to recognize local intersections that are so easily overlooked, yet are so important. They reveal the unities and fractures in national understanding, telling stories of otherness and marginality and

of dislocation and un-belonging. Ce livre examine l'importance culturelle de l'espace et de la mémoire en contexte canadien et plus spécifiquement dans les littératures du pays, afin d'inviter des lectures neuves des questions régionales, nationales et globales. Il rassemble sept chapitres en anglais et cinq en français, en plus d'une introduction bilingue. Les contributions, favorisant des approches thématiques et théoriques variées, sont réunies par leur désir de mettre en lumière des croisements inédits entre la mémoire et l'espace en tant qu'ils définissent certains des problèmes les plus brûlants de notre époque au Canada. S'y révèle l'équilibre fort instable entre récits unitaires et fractures communautaires, entre altérité et marginalité, ou entre dislocation et désappartenance.   Atari to Zelda Mia Consalvo,2022-06-07 The cross-cultural interactions of Japanese videogames and the West—from DIY localization by fans to corporate strategies of "Japaneseness." In the early days of arcades and Nintendo, many players didn't recognize Japanese games as coming from Japan; they were simply new and interesting games to play. But since then, fans, media, and the games industry have thought further about the "Japaneseness" of particular games. Game developers try to decide whether a game's Japaneseness is a selling point or stumbling

block; critics try to determine what elements in a game express its Japaneseness—cultural motifs or technical markers. Games were "localized," subjected to sociocultural and technical tinkering. In this book, Mia Consalvo looks at what happens when Japanese games travel outside Japan, and how they are played, thought about, and transformed by individuals, companies, and groups in the West. Consalvo begins with players, first exploring North American players' interest in Japanese games (and Japanese culture in general) and then investigating players' DIY localization of games, in the form of ROM hacking and fan translating. She analyzes several Japanese games released in North America and looks in detail at the Japanese game company Square Enix. She examines indie and corporate localization work, and the rise of the professional culture broker. Finally, she compares different approaches to Japaneseness in games sold in the West and considers how Japanese games have influenced Western games developers. Her account reveals surprising cross-cultural interactions between Japanese games and Western game developers and players, between Japaneseness and the market.

   The Future of the Self Jay Friedenberg,2020-08-04 We live in the digital age where our sense of self and identity has moved beyond the body to encompass hardware and software. Cyborgs, online representations in social media, avatars, and virtual reality extend our notion of what it means to be human. This book looks at the progression of self from the biological to the technological using a

multidisciplinary approach. It examines the notion of personhood from philosophical, psychological, neuroscience, robotics, and artificial intelligence perspectives, showing how the interface between bodies, brains, and technology can give rise to new forms of human identity. Jay Friedenberg presents the content in an organized and easy-to-understand fashion to facilitate learning. A gifted researcher, author, and classroom teacher, he is one of the most influential voices in the field of artificial psychology.

  Racing the Beam Nick Montfort,Ian Bogost,2020-02-25 A study of the relationship between platform and creative expression in the Atari VCS, the gaming system for popular games like Pac-Man and Star Wars: The Empire Strikes Back. The Atari Video Computer System dominated the home video game market so completely that "Atari" became the generic term for a video game console. The Atari VCS was affordable and offered the flexibility of changeable cartridges. Nearly a thousand of these were created, the most significant of which established new techniques, mechanics, and even entire genres. This book offers a detailed and accessible study of this influential video game console from both computational and cultural perspectives. Studies of digital media have rarely investigated platforms—the systems underlying computing. This book, the first in a series of Platform Studies, does so, developing a critical approach that examines the relationship between platforms and creative expression. Nick Montfort and Ian Bogost

discuss the Atari VCS itself and examine in detail six game cartridges: Combat, Adventure, Pac-Man, Yars' Revenge, Pitfall!, and Star Wars: The Empire Strikes Back. They describe the technical constraints and affordances of the system and track developments in programming, gameplay, interface, and aesthetics. Adventure, for example, was the first game to represent a virtual space larger than the screen (anticipating the boundless virtual spaces of such later games as World of Warcraft and Grand Theft Auto), by allowing the player to walk off one side into another space; and Star Wars: The Empire Strikes Back was an early instance of interaction between media properties and video games. Montfort and Bogost show that the Atari VCS—often considered merely a retro fetish object—is an essential part of the history of video games.

   Computer Martin Campbell-Kelly,William F. Aspray,Jeffrey R. Yost,Honghong Tinn,Gerardo Con Díaz,2023-06-19 This volume provides a history of the computer which now comes properly up to the ubiquitous age, with new chapters that look at globalization, platformitization and regulation, allowing readers to engage with the more recent takeover by computers in their historical perspective. With the growing ubiquity of computers, the subject is one of interest to many students and this will feature in history of science and technology courses, and world history courses as well as ones specifically on computing. Books on the history of computing tend to be quite technically or business focused, this covers the social and cultural history as well.

Museums and Sites of Persuasion Joyce Apsel,Amy
Sodaro,2019-10-14 Museums and Sites of Persuasion
examines the concept of museums and memory sites
as locations that attempt to promote human rights,
democracy and peace. Demonstrating that such sites
have the potential to act as powerful spaces of
persuasion or contestation, the book also shows
that there are perils in the selective memory and
history that they present. Examining a range of
museums, memorials and exhibits in places as
varied as Burundi, Denmark, Georgia, Kosovo,
Mexico, Peru, Vietnam and the US, this volume
demonstrates how they represent and try to come to
terms with difficult histories. As sites of
persuasion, the contributors to this book argue,
their public goal is to use memory and education
about the past to provide moral lessons to
visitors that will encourage a more democratic and
peaceful future. However, the case studies also
demonstrate how political, economic and social
realities often undermine this lofty goal, raising
questions about how these sites of persuasion
actually function on a daily basis. Straddling
several interdisciplinary fields of research and
study, Museums and Sites of Persuasion will be
essential reading for those working in the fields
of museum studies, memory studies, and genocide
studies. It will also be essential reading for
museum practitioners and anyone engaged in the
study of history, sociology, political science,
anthropology and art history. Chapter 3 of this
