NASA Secret Files: From Sex in Space to Alien Encounters Igor Kryan,2019-03-05 100 Billion humans lived and died on this planet and only 539 have been to the outer space. 21 of them never returned back. Those who survived returned as heroes. However, they also returned forever changed men and women because of what they saw, felt or heard out there. This book will take you to the alien empty void and show you from the first hand accounts that it's not so empty after all. Strange things are happening there: from weird sex in space to downright straight forward extraterrestrial alien encounters that cannot be explained by science and kept in the deepest secrecy by NASA. Astronauts and cosmonauts are bound to remain silent about anything unusual by signing Non Disclosure Agreements but several of them choose to speak with Igor Kryan and other investigative journalists - some on the condition of anonymity, while others did not hesitate to come forward with the mind blowing facts that forever will change your mind about leaving mother earth and going into the space.
