Introduction to Probability Joseph K. Blitzstein, Jessica Hwang, 2014-07-24 Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

**The King's Shilling and Stalag V111B** Anthony G. Parnell., 2017-10-24 Born in London, England in 1922, Anthony Parnell's interest in aeroplanes took hold of his imagination at an early age. He became a plane spotter with his friend at Croydon Aerodrome. As his love grew, his dream was that one day he would fly. Becoming a pilot in the RAF fulfilled that dream. On March 28, 1942 leaving at dawn on a Top Secret Mission, Anthony's flight came to an abrupt end when he made an emergency landing with his crippled plane on a beach he believed was on the English coast. He and his crew were taken prisoner and thus began his WWII experience as a Prisoner Of War in Stalag V111B. This book tells the story of Anthony's experience during that suspenseful and hopeless time, including his attempts at escape and the 1,000 kilometres walk across Europe in winter conditions that would later become known as The Death March. Per Ardua ad Astra - Through Adversity to the Stars - that is the RAF Motto, and the motto that Anthony Parnell would attempt to follow in his struggle for survival.

**Psychology of Intelligence Analysis** Richards J Heuer, 2020-03-05 In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped (poorly wired) to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.

**Normal Life** Dean Spade, 2015-07-13 Revised and Expanded Edition Wait—what's wrong with rights? It is usually assumed that trans and gender nonconforming people should follow the civil rights and equality strategies of lesbian and gay rights organizations by agitating for legal reforms that would ostensibly guarantee nondiscrimination and equal protection under the law. This approach assumes that the best way to address the poverty and criminalization that plague trans populations is to gain legal recognition and inclusion in the state's institutions. But is this strategy effective? In Normal Life Dean Spade presents revelatory critiques of the legal equality framework for social change, and points to examples of transformative grassroots trans activism that is raising demands that go beyond traditional civil rights reforms. Spade explodes assumptions about what legal rights can do for marginalized populations, and describes transformative resistance processes and formations that address the root causes of harm and violence. In the new afterword to this revised and expanded edition, Spade notes the rapid mainstreaming of trans politics and finds that his predictions that gaining legal recognition will fail to benefit trans populations are coming to fruition. Spade examines recent efforts by the Obama administration and trans equality advocates to pinkwash state violence by articulating the US military and prison systems as sites for trans inclusion reforms. In the context of recent increased mainstream visibility of trans people and trans politics, Spade continues to advocate for the dismantling of systems of state violence that shorten the lives of trans people. Now more than ever, Normal Life is an urgent call for justice and trans liberation, and the radical transformations it will require.

**Popular Politics and the English Reformation** Ethan H. Shagan, 2003 This book is a study of popular responses to the English Reformation. It takes as its subject not the conversion of English subjects to a new religion but rather their political responses to a Reformation perceived as an act of state and hence, like all early modern acts of state, negotiated between government and people. These responses included not only resistance but also significant levels of accommodation, co-operation and collaboration as people attempted to co-opt state power for their own purposes. This study argues, then, that the English Reformation was not done to people, it was done with them in a dynamic process of engagement between government and people. As such, it answers the twenty-year-old scholarly dilemma of how the English Reformation could have succeeded despite the inherent conservatism of the English people, and it presents a genuinely post-revisionist account of one of the central events of English history.

*Aircraft of the Luftwaffe, 1935-1945* Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.
