Spain's Sendero Historico: The GR1 John Hayes,2015-10-05 The GR1 (Sendero Historico) is a long traverse of northern Spain from west to east over 1250km of remote country and mountain walking. The waymarked route runs through the Pyrenean foothills from Puerto de Tarna at the western end to near L'Escala on the Mediterranean coast. Arguably one of Spain's best long-distance paths, it follows gently graded paths, making a long but easy walk suitable for a reasonably fit walker. The complete trail requires around 53 days to complete end to end, but the guidebook splits the route into 7 sections, each with a start or endpoint that can be easily reached by train or bus, allowing walkers to explore the route in manageable chunks. The guidebook also describes how to extend the route to Finisterre and the Atlantic using GR routes. Providing all the information you will need, the guide combines practical information about planning your own itinerary, when to go, cuisine and terrain with general information about the varied geology and history of the area. Route description is accompanied by contoured mapping and stage and section summary information, as well as detailed information about any accommodation available en route.

Policies and Practices for Mental Health in Europe ,2008 This WHO report co-funded by the European Commission gives an overview of policies and practices for mental health in 42 Member States of the European Region. A large majority of countries have made significant progress over the past few years, and several are world leaders in mental health promotion, mental disorder prevention activities, service reform and human rights. Nevertheless, this report also identifies weaknesses in Europe, some systematic, such as a lack of consensus on definitions, and of compatible data collection, and others such as the need for development and investment across several areas. It identifies gaps in information where further work must be done, and is a baseline against which progress can be measured towards the vision and the milestones of the Mental Health Declaration for Europe. The data were obtained from the ministries of health of 42 European Member States. Over 150 figures and tables in the report demonstrate the diversity across the European Region, and allow country to country comparisons of indicators such as numbers of psychiatrists, financing, community services, training of the workforce, the prescription of anti-depressants and representation of users and carers.

The Geology of Iberia: A Geodynamic Approach Cecilio Quesada, José Tomás Oliveira, 2019-05-11 Adopting a global approach, this unique book provides an updated review of the geology of Iberia and its continental margins from a geodynamic perspective. Owing to its location close to successive plate margins, Iberia has played a pivotal role in the geodynamic evolution of the Gondwanan, Rheic, Pangea, Tethys and Eurasian plates over the last 600 Ma of Earth's history. The geological record starts with the amalgamation of Gondwana in the Neoproterozoic, which was succeeded by the rifting and spreading of the Rheic ocean; its demise, which led to the amalgamation of Pangea in the late Paleozoic; and the rifting and spreading of several arms of the Neotethys ocean in the Mesozoic Era and their ongoing closure, which was responsible for the Alpine orogeny. The significant advances in the last 20 years have increasingly attracted international interest in exploring the geology of the Iberian Peninsula. This final volume of the Geology of Iberia focuses on the active geological processes in Iberia including seismicity and active faulting as well as the modern landscapes in the Iberian Peninsula.
