Narrowboat Life Jim Batty,2019-05-02 'A colourful and comprehensive guide to life on the waterways. Practical, pretty and accessible, it's charmingly designed while providing excellent advice.' BBC Countryfile Magazine Full-time life on a narrowboat is a novelty for so many of us, and is endlessly fascinating. How do people downsize their lives and belongings into what looks like a large, crayon-coloured floating toy-box? Narrowboat Life answers all the questions we've wanted to ask about the ins and outs of liveaboard life on the inland waterways. The book is filled with beautiful, enthralling photography of the waterways themselves, the narrowboats that occupy them and, most importantly, every nook and cranny of their insides. Should you become seduced, the author gives solid hands-on advice about how to make a narrowboat (or widebeam, cruiser or small Dutch barge) your home. Accompanying these absorbing images, the playful and always informative text satisfies our curiosity to know, among other things: · How do you fit all of your stuff into such a restricted space? · How much does a narrowboat cost? · How do you hold down a job if you're always on the move? · Does s/he (the cat, dog, parrot) live on the boat as well? · Is it cold in the winter? This revised edition of Narrowboat Life features new and expanded sections on ecological living on the waterways – recycling, upcycling and living green – and living aboard in cities versus living on-land, as well as new profiles of more beautiful boats.

Cover Art Vanessa Westermann,2022-05-28 Death by chocolate may be a favourite fantasy, but death by poisoned chocolate is another matter entirely. Charley Scott is thrilled to be running a summer pop-up gallery in cottage country. Returning to the lakeside village, not on vacation but as an artist, she's determined to turn her hobby into a career. Joined by two other artists, including her childhood friend Kayla, the Cover Art Exhibit is a dream come true. But, beneath the surface of this peaceful town, darkness lurks. There's a history. Local chocolatier, Matt Thorn, is struggling to come to terms with his father's recent death and his legacy of deception. As Matt plans to expose his father's secrets, Kayla's husband is found dead, the result of eating Matt's boutique chocolates. The homicide investigation threatens to make Charley's pop-up gallery a failure before it even begins. Luckily, art is all about perspective and she's always had a keen eye. Can she see past the obvious and find the killer?

Ayiti Roxane Gay,2018-06-12 From the New York Times–bestselling author of *Hunger* and *Bad Feminist*, a powerful short story collection exploring the Haitian diaspora experience. In *Ayiti*, a married couple seeking boat passage to America prepares to leave their homeland. A young woman procures a voodoo love potion to ensnare a childhood classmate. A mother takes a foreign soldier into her home as a boarder, and into her bed. And a woman conceives a daughter on the bank of a river while fleeing a horrific massacre, a daughter who later moves to America for a new life but is perpetually haunted by the mysterious scent of blood. Roxane Gay is an award-winning literary voice praised for her fearless and vivid prose, and her debut collection *Ayiti* exemplifies the raw talent that made her “one of the voices of our age” (National Post, Canada). Praise for *Ayiti* “Highly dimensioned characters and unforgettable moments. . . . Dismantling the glib misconceptions of her complex ancestral home, Gay cuts and thrills. Readers will find her powerful first book difficult to put down.” –Booklist “The themes explored in Gay's nonfiction, such as the transactional nature of violence and the ways in which stereotypes of poverty add another layer of dehumanization, are just as potent here. Even her more lyrical mode is filtered through a keen sense of the lost promise of one country and the blinkered privilege of the other. It's Gay's unflinching directness—the sense that her characters are in the room with you, telling it like it is—that makes her irresistible.” –Vogue “A set of brief, tart stories mostly set amid the Haitian-American community and circling around themes of violation, abuse, and heartbreak . . . This book set the tone that still characterizes much of Gay's writing: clean, unaffected, allowing the (often furious) emotions to rise naturally out of calm, declarative sentences. That gives her briefest stories a punch even when they come in at two pages or fewer, sketching out the challenges of assimilation in terms of accents, meals, or ‘What You Need to Know About a Haitian Woman’. . . . This debut amply contains the righteous energy that drives all her work.” –Kirkus Reviews

Good Without God Greg Epstein,2010-10-26 An inspiring and provocative exploration of an alternative to traditional religion Questions about the role of God and religion in today's world have never been more relevant or felt more powerfully. Many of us are searching for a place where we can find not only facts and scientific reason but also hope and moral courage. For some, answers are found in the divine. For others, including the New Atheists, religion is an enemy. But in *Good Without God*, Greg Epstein presents another, more balanced and inclusive response: Humanism. He highlights humanity's potential for goodness and the ways in which Humanists lead lives of purpose and compassion. Humanism can offer the sense of community we want and often need in good times and bad—and it teaches us that we can lead good and moral lives without the supernatural, without higher powers . . . without God.

Ghost Work Mary L. Gray,Siddharth Suri,2019 A startling exposé of the invisible human workforce that powers the web--and how to bring it out of the shadows. Hidden beneath the surface of the internet, a new, stark reality is looming--one that cuts to the very heart of our endless debates about the impact of AI. Anthropologist Mary L. Gray and computer scientist Siddharth Suri unveil how the services we use from companies like Amazon, Google, Microsoft, and Uber can only function smoothly thanks to the judgment and experience of a vast human labor force that is kept deliberately concealed. The people who do 'ghost work' make the internet seem smart. They perform high-tech, on-demand piecework: flagging X-rated content, proofreading, transcribing audio, confirming identities, captioning video, and much more. The shameful truth is that no labor laws protect them or even acknowledge their existence. They often earn less than legal minimums for traditional work, they have no health benefits, and they can be fired at any time for any reason, or for no reason at all. An estimated 8 percent of Americans have worked in this 'ghost economy,' and that number is growing every day. In this unprecedented investigation, Gray and Suri make the case that robots will never completely eliminate 'ghost work' and the unchecked quest for artificial intelligence could spark catastrophic work conditions if not stopped in its tracks. Ultimately, they show how this essential type of work can create opportunity--rather than misery--for those who do it.--Dust jacket.

Who Will Care For Us? Paul Osterman, 2017-09-06 The number of elderly and disabled adults who require assistance with day-to-day activities is expected to double over the next twenty-five years. As a result, direct care workers such as home care aides and certified nursing assistants (CNAs) will become essential to many more families. Yet these workers tend to be low-paid, poorly trained, and receive little respect. Is such a workforce capable of addressing the needs of our aging population? In *Who Will Care for Us?* economist Paul Osterman assesses the challenges facing the long-term care industry. He presents an innovative policy agenda that reconceives direct care workers' work roles and would improve both the quality of their jobs and the quality of elder care. Using national surveys, administrative data, and nearly 120 original interviews with workers, employers, advocates, and policymakers, Osterman finds that direct care workers are marginalized and often invisible in the health care system. While doctors and families alike agree that good home care aides and CNAs are crucial to the well-being of their patients, the workers report poverty-level wages, erratic schedules, exclusion from care teams, and frequent incidences of physical injury on the job. Direct care workers are also highly constrained by policies that specify what they are allowed to do on the job, and in some states are even prevented from simple tasks such as administering eye drops. Osterman concludes that broadening the scope of care workers' duties will simultaneously boost the quality of care for patients and lead to better jobs and higher wages. He proposes integrating home care aides and CNAs into larger medical teams and training them as "health coaches" who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals. Osterman shows that restructuring direct care workers' jobs, and providing the appropriate training, could lower health spending in the long term by reducing unnecessary emergency room and hospital visits, limiting the use of nursing homes, and lowering the rate of turnover among care workers. As the Baby Boom generation ages, *Who Will Care for Us?* demonstrates the importance of restructuring the long-term care industry and establishing a new relationship between direct care workers, patients, and the medical system.

Team Human Douglas Rushkoff, 2019-01-22 "A provocative, exciting, and important rallying cry to reassert our human spirit of community and teamwork."—Walter Isaacson *Team Human* is a manifesto—a fiery distillation of preeminent digital theorist Douglas Rushkoff's most urgent thoughts on civilization and human nature. In one hundred lean and incisive statements, he argues that we are essentially social creatures, and that we achieve our greatest aspirations when we work together—not as individuals. Yet today society is threatened by a vast antihuman infrastructure that undermines our ability to connect. Money, once a means of exchange, is now a means of exploitation; education, conceived as way to elevate the working class, has become another assembly line; and the internet has only further divided us into increasingly atomized and radicalized groups. *Team Human* delivers a call to arms. If we are to resist and survive these destructive forces, we must recognize that being human is a team sport. In Rushkoff's own words: "Being social may be the whole point." Harnessing wide-ranging research on human evolution, biology, and psychology, Rushkoff shows that when we work together we realize greater happiness, productivity, and peace. If we can find the others who understand this fundamental truth and reassert our humanity—together—we can make the world a better place to be human.

The Internet of Women - Accelerating Culture Change Nada Anid, Monique J. Morrow, Laurie Cantileno, 2022-09-01 Female scientists, technologists, engineers, and mathematicians worldwide are making historic contributions to their fields. The modern workforce is closer to gender-equal than it has ever been, and many efforts are in place to support further progress. *The Internet of Women* provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend. From the United Nations' emphasis on girls and technology education in the SDGs (Sustainable Development Goals) to the increased female labor force in Zambia, a policy change that was inspired by the MDGs (UN Millennium Development Goals), *The Internet of Women* captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change. Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry. Gender equality and female participation in the tech field is critical to both developing and developed economies; nevertheless, this gap remains a global phenomenon. The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations. Few publicly traded tech companies have female CEOs - in fact, most nations have zero female leadership in the tech industry. This gap does indicate a slow pace of progress for gender equality in tech employment. Women's pay still lags nearly a decade behind, according to the World Economic Forum, meaning that women's on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006. Without significant progress, the current rate of change will not lead to parity for 118 years, according to the World Economic Forum (WEF). However there's significant work being done to shift this tide. Take for instance Michelle Lee, the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (USPTO), reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired to create an IP badge that exposes young women to the process of invention. Social entrepreneur, investor, and Malala Fund co-founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe. And Elizabeth Isele, a senior fellow in Social Innovation at Babson College, shares her research on women and ageism saying we need to retire the word retirement. The book is divided into six parts, each with unique areas of focus: • Millennials Leading: Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology • Men and Women Empowering One Another • Bold Leadership: Women Changing the Culture of Investment and Entrepreneurship • Educating for the 21st Century • Breaking the Glass Ceiling: A Generation of Women Forging into Technology Leadership • Emerging Fields of Technology *The Internet of Women* gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries. Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator. The book is intended for corporations, academic institutions, the private sector, government agencies, gender experts, and the general public, and its key benefit is to let the reader understand a path towards

implementing diversity overall globally. It also showcases the strategies, tools, and tactical execution on how create cultural change in all parts of the world.
