⁇ Taking Your Talent to the Web Jeffrey Zeldman,2001 This is an explicit and detailed guide, an intelligent how-to book for professionals. It lays the groundwork and creates context by exploring essential concepts, defines terms that may be new or unfamiliar, and then moves forward with practical software techniques. All the while it is building on the existing knowledge and experience of its professional design audience. Taking Your Talent to the Web is based on the Populi Curriculum in Web Communications Design, developed by Jeffrey Zeldman in cooperation with Populi, Inc., (www.populi.com) and the Pratt Institute. The book's purpose is to guide traditional art directors and print designers as they expand their existing careers to include the new field of professional Web Design.

⁇ The WordNet in Indian Languages Niladri Sekhar Dash,Pushpak Bhattacharyya,Jyoti D. Pawar,2016-10-20 This contributed volume discusses in detail the process of construction of a WordNet of 18 Indian languages, called "Indradhanush" (rainbow) in Hindi. It delves into the major challenges involved in developing a WordNet in a multilingual country like India, where the information spread across the languages needs utmost care in processing, synchronization and representation. The project has emerged from the need of millions of people to have access to relevant content in their native languages, and it provides a common interface for information sharing and reuse across the Indian languages. The chapters discuss important methods and strategies of language computation, language data processing, lexical selection and management, and language-specific synset collection and representation, which are of utmost value for the development of a WordNet in any language. The volume overall gives a clear picture of how WordNet is developed in Indian languages and how this can be utilized in similar projects for other languages. It includes illustrations, tables, flowcharts, and diagrams for easy comprehension. This volume is of interest to researchers working in the areas of language processing, machine translation, word sense disambiguation, culture studies, language corpus generation, language teaching, dictionary compilation, lexicographic queries, cross-lingual knowledge sharing, e-governance, and many other areas of linguistics and language technology.

⁇ Big Data Analytics Sanjay Madria,Philippe Fournier-Viger,Sanjay Chaudhary,P. Krishna Reddy,2019-12-12 This book constitutes the refereed proceedings of the 7th International Conference on Big Data analytics, BDA 2019, held in Ahmedabad, India, in December 2019. The 25 papers presented in this volume were carefully reviewed and selected from 53 submissions. The papers are organized in topical sections named: big data analytics: vision and perspectives; search and information extraction; predictive analytics in medical and agricultural domains; graph analytics; pattern mining; and machine learning.

⁇ Enhancing the Resilience of the Nation's Electricity System National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Enhancing the Resilience of the Nation's Electric Power Transmission and Distribution System,2017-10-25 Americans' safety, productivity, comfort, and convenience depend on the reliable supply of electric power. The electric power system is a complex cyber-physical system composed of a network of millions of components spread out across the continent. These components are owned, operated, and regulated by thousands of different entities. Power system operators work hard to assure safe and reliable service, but large outages occasionally happen. Given the nature of the system, there is simply no way that outages can be completely avoided, no matter how much time and money is devoted to such an effort. The system's reliability and resilience can be improved but never made perfect. Thus, system owners, operators, and regulators must prioritize their investments based on potential benefits. Enhancing the Resilience of the Nation's Electricity System focuses on identifying, developing, and implementing strategies to increase the power system's resilience in the face of events that can cause large-area, long-duration outages: blackouts that extend over multiple service areas and last several days or longer. Resilience is not just about lessening the likelihood that these outages will occur. It is also about limiting the scope and impact of outages when they do occur, restoring power rapidly afterwards, and learning from these experiences to better deal with events in the future.

⁇ Governing Cyberspace Dennis Broeders,Bibi van den Berg,2020-06-26 Cyber norms and other ways to regulate responsible state behavior in cyberspace is a fast-moving political and diplomatic field. The academic study of these processes is varied and interdisciplinary, but much of the literature has been organized according to discipline. Seeking to cross disciplinary boundaries, this timely book brings together researchers in fields ranging from international law, international relations, and political science to business studies and philosophy to explore the theme of responsible state behavior in cyberspace. . Divided into three parts, Governing Cyberspace first looks at current debates in and about international law and diplomacy in cyberspace. How does international law regulate state behaviour and what are its limits? How do cyber superpowers like China and Russia shape their foreign policy in relation to cyberspace? The second focuses on power and governance. What is the role for international organisations like NATO or for substate actors like intelligence agencies? How do they adapt to the realities of cyberspace and digital conflict? How does the classic balance of power play out in cyberspace and how do different states position themselves? The third part takes a critical look at

multistakeholder and corporate diplomacy. How do global tech companies shape their role as norm entrepreneurs in cyberspace, and how do their cyber diplomatic efforts relate to their corporate identity?

⏁ ⏃-Science Claudia Koschtial,Thomas K⏃hler,Carsten Felden,2021-03-19 This open access book shows the breadth and various facets of e-Science, while also illustrating their shared core. Changes in scientific work are driven by the shift to grid-based worlds, the use of information and communication systems, and the existential infrastructure, which includes global collaboration. In this context, the book addresses emerging issues such as open access, collaboration and virtual communities and highlights the diverse range of developments associated with e-Science. As such, it will be of interest to researchers and scholars in the fields of information technology and knowledge management.

⏁ ⏆ata Mining the Web Zdravko Markov,Daniel T. Larose,2007-04-06 This book introduces the reader to methods of data mining on the web, including uncovering patterns in web content (classification, clustering, language processing), structure (graphs, hubs, metrics), and usage (modeling, sequence analysis, performance).

⏁ ⏇ntelligent Information Processing and Web Mining Mieczyslaw A. Klopotek,Slawomir T. Wierzchon,Krzysztof Trojanowski,2006-05-28 The international conference Intelligent Information Processing and Web Mining IIS:IIPWM'05, organized in Gda?sk-Sobieszewo on 13–16th June, 2005, was a continuation of a long tradition of conferences on applications of Arti?cial Intelligence (AI) in Information Systems (IS), organized by the Institute of Computer Science of Polish Academy of Sciences in cooperation with other scienti?c and business institutions. The Institute itself is deeply engaged in research both in AI and IS and many scientists view it as a leading institution both in fundamental and - plied research in these areas in Poland. The originators of this conference series, Prof. M. D?browski and Dr. M. Michalewicz had in 1992 a long-term goal of bringing together scientists and industry of di?erent braches from Poland and abroad to achieve a creative synthesis. One can say that their dream has come to reality. Scientists from ?ve continents made their subm- sions to this conference. A brief look at the a?liations makes international cooperation visible. The research papers have either a motivation in c- crete applications or are o?-springs of some practical requests. This volume presents the best papers carefully chosen from a large set of submissions (about 45%). At this point we would like to express our thanks to the m- bers of Programme Committee for their excellent job. Also we are thankful to the organizers of the special sessions accompanying this conference: Jan Komorowski, Adam Przepi⏁rkowski, Zbigniew W.

⏁ ⏆aw and the "Sharing Economy" Derek McKee,Finn Makela,Teresa Scassa,2018-11-27 Controversy shrouds sharing economy platforms. It stems partially from the platforms' economic impact, which is felt most acutely in certain sectors: Uber drivers compete with taxi drivers; Airbnb hosts compete with hotels. Other consequences lie elsewhere: Uber is associated with a trend toward low-paying, precarious work, whereas Airbnb is accused of exacerbating real estate speculation and raising the cost of long-term rental housing. While governments in some jurisdictions have attempted to rein in the platforms, technology has enabled such companies to bypass conventional regulatory categories, generating accusations of "unfair competition" as well as debates about the merits of existing regulatory regimes. Indeed, the platforms blur a number of familiar distinctions, including personal versus commercial activity; infrastructure versus content; contractual autonomy versus hierarchical control. These ambiguities can stymie legal regimes that rely on these distinctions as organizing principles, including those relating to labour, competition, tax, insurance, information, the prohibition of discrimination, as well as specialized sectoral regulation. This book is organized around five themes: technologies of regulation; regulating technology; the sites of regulation (local to global); regulating markets; and regulating labour. Together, the chapters offer a rich variety of insights on the regulation of the sharing economy, both in terms of the traditional areas of law they bring to bear, and the theoretical perspectives that inform their analysis. Published in English.

⏁ ⏆igital Authoritarianism in the Middle East Marc Owen Jones,2022-07-15 You are being lied to by people who don't even exist. Digital deception is the new face of information warfare. Social media has been weaponised by states and commercial entities alike, as bots and trolls proliferate and users are left to navigate an infodemic of fake news and disinformation. In the Persian Gulf and the wider Middle East, where authoritarian regimes continue to innovate and adapt in the face of changing technology, online deception has reached new levels of audacity. From pro-Saudi entities that manipulate the tweets of the US president, to the activities of fake journalists and Western PR companies that whitewash human rights abuses, Marc Owen Jones' meticulous investigative research uncovers the full gamut of tactics used by Gulf regimes and their allies to deceive domestic and international audiences. In an age of global deception, this book charts the lengths bad actors will go to when seeking to impose their ideology and views on citizens around the world.

⏁ ⏈tatistical Machine Translation Philipp Koehn,2010 The dream of automatic language translation is now closer thanks to recent advances in the techniques that underpin statistical machine translation. This class-tested textbook from an active researcher in the field, provides a clear and careful introduction to the

LATEST METHODS AND EXPLAINS HOW TO BUILD MACHINE TRANSLATION SYSTEMS FOR ANY TWO LANGUAGES. IT INTRODUCES THE SUBJECT'S BUILDING BLOCKS FROM LINGUISTICS AND PROBABILITY, THEN COVERS THE MAJOR MODELS FOR MACHINE TRANSLATION: WORD-BASED, PHRASE-BASED, AND TREE-BASED, AS WELL AS MACHINE TRANSLATION EVALUATION, LANGUAGE MODELING, DISCRIMINATIVE TRAINING AND ADVANCED METHODS TO INTEGRATE LINGUISTIC ANNOTATION. THE BOOK ALSO REPORTS THE LATEST RESEARCH, PRESENTS THE MAJOR OUTSTANDING CHALLENGES, AND ENABLES NOVICES AS WELL AS EXPERIENCED RESEARCHERS TO MAKE NOVEL CONTRIBUTIONS TO THIS EXCITING AREA. IDEAL FOR STUDENTS AT UNDERGRADUATE AND GRADUATE LEVEL, OR FOR ANYONE INTERESTED IN THE LATEST DEVELOPMENTS IN MACHINE TRANSLATION.

Living Machines Tony J. Prescott,Nathan Lepora,Paul F. M. J. Verschure,2018 Contemporary research in the field of robotics attempts to harness the versatility and sustainability of living organisms with the hope of rendering a renewable, adaptable, and robust class of technology that can facilitate self-repairing, social, and moral-even conscious-machines. This landmark volume surveys this flourishing area of research.

Data Science and Analytics Usha Batra,Nihar Ranjan Roy,Brajendra Panda,2020-05-27 This two-volume set (CCIS 1229 and CCIS 1230) constitutes the refereed proceedings of the 5th International Conference on Recent Developments in Science, Engineering and Technology, REDSET 2019, held in Gurugram, India, in November 2019. The 74 revised full papers presented were carefully reviewed and selected from total 353 submissions. The papers are organized in topical sections on data centric programming; next generation computing; social and web analytics; security in data science analytics; big data analytics.

Music Data Mining Tao Li,Mitsunori Ogihara,George Tzanetakis,2011-07-12 The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, Music Data Mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.

E-Commerce and Development Report 2001 United Nations Conference on Trade and Development,2001 This report reviews trends important for developing countries trying to take advantage of ICT and the Internet. It supplies basic facts and statistics about electronic commerce and considers their relevance to developing economies, especially in relation to tourism, business-to-business markets, and electronic government. It also offers recommendations for creating enabling environments for e- commerce. China's ICT strategy is considered in detail. No index. Annotation copyrighted by Book News, Inc., Portland, OR

The Scientific Article in the Age of Digitization John Mackenzie Owen,2006-11-18 This book outlines the consequences of digitization for peer-reviewed research articles published in electronic journals. It is argued that digitization will revolutionize scientific communication. However, this study shows that this is not the case where scientific journals are concerned. Authors make little use of the possibilities offered by the digital medium; electronic peer review procedures have not replaced traditional ones, and users have not embraced new forms of interaction offered by some electronic journals.

Reporting Beyond the Problem Karen McIntyre Hopkinson,Nicole Smith Dahmen,2021 This edited collection provides an in-depth examination of socially-responsible news reporting practices, such as constructive journalism, solutions journalism, and peace journalism.
