1% Better Chris Nikic, Nik Nikic, 2021-10-05 What would life look like if you measured your success by improvements instead of victories? Nik Nikic shares the incredible story of his son Chris's journey to become the first person with Down syndrome to ever complete an IRONMAN® triathlon, inspiring others to achieve their goals by getting 1 percent better every day. From the moment Chris Nikic was born, his parents knew he could achieve anything he set his mind to do. So when he became involved in triathlons with the Special Olympics, his dad, Nik, took on the role of coach and encouraged Chris to aim even higher. Together, they set their sights on making history—Chris becoming the first person with Down syndrome to complete an IRONMAN® triathlon. Written from Chris's father's perspective, Nik shares the 1% Better mindset that has helped Chris achieve many of his goals—and the underlying principles of the 1% Better system can help you pursue and achieve your dreams too! Through Chris and Nik's story, learn the benefits of applying the model to your own life and discover how to: Overcome the mental hurdles of pain Stay motivated using three irrefutable laws of motivation See failures as opportunities for improvement Form a lifelong habit of success You may never be the best. But you can be better than your best when you stop imposing self-limitations and begin the journey to reach your goals—one confident step at a time. Publisher's Note: 1% Better is written in Nik Nikic's voice. Chris and his accomplishments are the focus of 1% Better, and Chris is a coauthor of the book as he was interviewed by his father and the writer.

Disability in the Global Sport Arena Jill M. Le Clair, 2013-09-13 Sport is often at the centre of battles for rights to inclusion linked to class, race and gender, and this book explores struggles centred on disability in different cultural settings in Europe, North America, Africa, Asia and Oceania. It challenges oversights and assumptions about the 'normal' body, and describes how individual and organizational transformations can occur through sport. The abilities of a person are recognised and placed centre stage - instead of the individual being forgotten, excluded, or placed at the margins simply because they have a disability. National, regional and global change is part of the shift to the rights based approach reflected in the 2006 UN Convention on the Rights of Persons with Disabilities. Making sport inclusive affects the accessibility of facilities, funding, the media, policies, programs, organisations, sponsors and spectators, and at the same time changes the cultural values of the wider society. It also raises issues about competition access and eligibility for 'different' and technologically enhanced 'cyborg' bodies, and for those most socially disadvantaged. Addressing these questions which ultimately touch on the real meaning of sport can lead to profound changes in people's attitudes, and how sport is organized locally and globally. Growth in the influential global organisations of the Paralympic Games, Special Olympics and Deaflympics is examined, as is the approach to disability in sport in both advantaged and resource poor countries. The embodied lives of persons with disabilities are explored utilizing new theoretical models, perspectives and approaches. This book was previously published as a special issue of Sport in Society.

Encyclopedia of International Games Daniel Bell, 2016-03-17 The Olympic Games, revived in 1896, are the most well known international multisport gathering—but since 1896, hundreds of other competitions based on the Olympic Games model have been established whose histories have not been well documented. The Encyclopedia of International Games captures (in one alphabetical sequence) the histories of these games, many of them for the first time. The work includes major regional events such as the African, Asian, Arab, South Pacific, and Pan American Games; competitions such as the Indian Ocean Island Games, Arctic Winter Games, Island Games, and Games of the Small Countries of Europe; specific populations or professions such as the North American Indigenous Games, Maccabiah Games, World Military Games, World Police and Fire Games, and World Medical and Health Games; and Special Olympics, the Paralympics, games for the blind, and other regional games. Eight appendices, notes, bibliography, index.

Grace & Power Sally Bedell Smith, 2011-08-15 Unlike so many other books, Grace and Power rejects gossip and conspiracy theory to tell the story of John and Jackie's three years in the White House soberly, comprehensively and sensitively, from beginning to sudden end. Sally Bedell Smith's book on John and Jackie Kennedy was hailed by authoritative reviewers on both sides of the Atlantic as the most distinguished and well-written book on a perennially fascinating subject for years. In the US the hardback was high on the New York Times bestseller list for weeks. It is an immensely poignant chronicle of pivotal historical events seen from the inside out, from within the private home of the President and First Lady. Amidst the superficial opulence of their social circle, we see the Cuban Missile Crisis and the burgeoning American civil rights movement from the perspective of an invalid president often barely well enough to appear in public. Together with his young wife, abandoned by her husband's relentless womanising, nevertheless changed the politics and style of America. Grace and Power is the classic account of that time.

more refined forms. This pedagogical approach can help students to appreciate and value all forms of diversity and enrich learning. There is a need for administrators in education to institute policies that will support diversity and inclusion within special education classrooms. *Rethinking Inclusion and Transformation in Special Education* explores the latest findings on how children learn by discussing global policies and educational practices, considering professional expectations, establishing parent relationships that enhance communication, creating an effective learning environment that meets all students' needs, and using technology wisely. Covering topics such as language development promotion, school leadership practices, and long-term skill support, this book is essential for special education teachers, diversity officers, school administrators, instructional designers, curriculum developers, academicians, researchers, and upper-level students.

More Alike Than Different David Egan, 2020-09-07 In this inspiring memoir, David Egan tells his own story, giving us a window into a life spent pushing boundaries. With a family undaunted by his diagnosis of Down syndrome, Egan learned early to speak up for himself. He has since become a powerful advocate for all people with disabilities. His optimistic perspective rejected the limits of stereotypes and the expectations of others. He shares how the support of loving family and friends led him to overcome challenges and blaze new trails. It started with swimming and baseball, when he earned places on his neighborhood teams, competing fiercely and as a fully accepted teammate. He writes firsthand of the empowering feeling of being fully included in elementary school and at work as an adult. Egan has earned positions at prestigious companies and a distinguished fellowship on Capitol Hill. He sits on the boards of influential advocacy organizations. He has addressed audiences worldwide and has played a powerful global advocacy role with Special Olympics. He allowed himself to dream big, and he encourages everyone to do the same. His lesson to all of us is to focus on our shared humanity despite our differences--and our diagnoses. This hopeful memoir will encourage everyone to make the most of their lives.

An Oral History of the Special Olympics in China Volume 1 William P. Alford, Mei Liao, Fengming Cui, 2020-05-22 This open access book is unique in presenting the first oral history of individuals with an intellectual disability and their families in China. In this summary volume and the two accompanying volumes that follow, individuals with an intellectual disability tell their life stories, while their family members, teachers, classmates, and co-workers describe their professional, academic, and family relationships. Besides interview transcripts, each volume provides observations and records in real time the daily experiences of people with an intellectual disability. Drawing on the methodologies of sociology and oral history, the summary volume provides an unprecedented account of how people with intellectual disabilities in China understand themselves while also examining pertinent issues of public policy and civil society that have ramifications beyond the field of disability itself.

Special Olympics Florian Kiuppis, Daniela Schwarz, 2023-11-07 This book brings together academic work on Special Olympics and specifically on the social inclusion of people with intellectual disabilities in various sport contexts and other areas of life, by ways of both empirical research and theoretically informed papers. Inclusion in sport is a topic that is mostly explored in connection with the participation of people with disabilities in general. In public debates on inclusion and sport in the global society, participation is predominantly discussed in a normative way, e.g., in connection with the campaign The Revolution is Inclusion by Special Olympics, describing it as an “all-out effort to end discrimination against people with intellectual disabilities”. With this international collection, the authors seek to contribute to an interdisciplinary understanding of Special Olympics in Context of Inclusion Debates and establish a foundation for future scholarship. The chapters in this book can contribute to a new research agenda on Special Olympics, particularly participatory approaches. The chapters in this book were originally published in *Sport in Society*.
