The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society Helen Wells,2022-03-26 The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society presents a sociological and criminological perspective critical to understanding the driver's role at the centre of road safety interventions. Such an approach is, it is argued, as crucial to an understanding of attempts to reduce road crashes, deaths and injuries as approaching such questions from an engineering or educational perspective. The book offers an explanation for the continued debate about one road safety intervention - the speed camera - by situating that debate within contemporary literature about the 'risk society' (Beck, 1992) and more broadly understood experiences of risk faced on a daily basis by drivers. Rather than a focus on risk as something that can be objectively assessed, measured and managed separately from the social context in which it is encountered, it suggests that 'risk' is something that permeates this particular debate from every angle. The book achieves its aims by utilising sociological and criminological perspectives to investigate issues such as: - the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness - the self-defined 'respectability' of the population being problematised and its juxtaposition with a 'proper' police focus on 'real criminals' - the reconceptualisation of law-breaking as risk-taking rather than inherently 'wrong' behaviour and its consequences for the enforcement of laws based on risk assessment - the experience of being controlled by technology and of receiving what is essentially 'automated justice'. These and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context.

The American Speed Shop Bob McClurg,2021-02-15 The history of hot rodding and performance cars has been well chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like back in the day. The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here, longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and a overview of the giant mail-order speed shops of today.

Multidirectional Speed in Sport Paul A. Jones,Thomas Dos'Santos,2023-06-30 During field- and court-based sports, players are continually required to perceive their environment within a match and select and perform the most appropriate action to achieve their immediate goal within that match instance. This ability is commonly known as agility, considered a vital quality in such sports and may incorporate a variety of locomotion and instantaneous actions. Multidirectional speed is a global term to describe the competency and capacity to perform such actions: accelerate, decelerate, change direction, and ultimately maintain speed in multiple directions and movements within the context of sports-specific scenarios, encompassing agility, speed, and many other related qualities. Multidirectional speed in sport depends on a multitude of factors, including perceptual-cognitive abilities, physical qualities, and the technical ability to perform the previously mentioned actions. Multidirectional Speed in Sport: Research to Application reviews the science of multidirectional speed and translates this information into real-world application in order to provide a resource for practitioners to develop multidirectional speed with athletes, bringing together knowledge from a wealth of world-leading researchers and applied practitioners in the area of speed and agility to provide a complete resource to assist practitioners in designing effective multidirectional speed development programmes. This text is critical reading for undergraduate and graduate sports science students, all individuals involved in training athletes (e.g. coaches, physiotherapists, athletic trainers), and researchers in the field of sports science and sports medicine.

High Speed Photography P.J. Rolls,2012-12-06 The combination of color schlieren with high speed flash techniques has proved to be a valuable tool for investigating high speed transient events. Fully two dimensional refractive index information can be obtained. The resolution on 35 mm film was sharp enough to allow 50 cm by 75 cm color enlargements. REFERENCES 1. The 'Real Drivers' Guide to Beating the Speed Camera Thomas Heavey,2013-03-25 Do you really want protection from the speed camera? Have you ever thought about improving your own driving skills but didn't because of the time or expense? Would you like fewer people killed and injured on our roads? If the answer is 'YES' to all these questions then you're in the right place. There is no better protection from the speed camera and reducing casualties on our roads than the motorists own skill and judgement. Over the years we motorists have allowed our standards to slip which is why so many of us get caught out by speed cameras each year and why thousands are involved in serious, life changing collisions, but it doesn't have to be this way. We can enjoy motoring without causing casualties and avoid punishment at the same time. So why 'Real Driver'? because we are going to use 'real driving' skills to beat the speed camera with not a gadget in sight. The 'Real Driving' exercises are going to take six weeks for you to master. Question is...are you up for the challenge?

The Micro-World Observed by Ultra High-Speed Cameras Kinko Tsuji,2017-08-30 This volume is about ultra high-speed cameras, which enable us to see what we normally do not see. These are objects that are moving very fast, or that we just ignore. Ultra high-speed cameras invite us to a wonderland of microseconds. There Alice (the reader) meets a ultra high-speed rabbit (this volume) and travels together through this wonderland from the year 1887 to 2017. They go to the horse riding ground and see how a horse gallops. The rabbit takes her to a showroom where various cameras and illumination devices are presented. Then, he sends Alice into semiconductor labyrinths, wind tunnels, mechanical processing factories, and dangerous explosive fields. Sometimes Alice is large, and at other times she is very small. She sits even inside a car engine. She falls down together with a droplet. She enters a microbubble, is thrown out with a jet stream, and finds herself in a human body. Waking up from her dream, she sees children playing a game: "I see what you do not see, and this is....". Alice thinks: "The ultra high-speed rabbit showed me many things which I had never seen. Now I will go again to this wonderland, and try to find something new."

The Camera Assistant Douglas Hart,2012-10-12 Veteran camera assistant Doug Hart describes in this comprehensive technical guide all of the important facets and duties of the first and second camera assistants' jobs. Whether it is feature films, episodic television, documentaries, commercials, or music videos, The Camera Assistant: A Complete Professional Handbook explains both the practice and theory behind it with a concentration on technique rather than equipment. In addition, personal anecdotes from the author's years behind and beside the camera provide insight into this demanding field. Key topics include film formats and aspect ratios, testing lenses and camera equipment, focus theory, film loading and labeling, scene blocking, marking actors, shooting tips, slating, paperwork, equipment maintenance, set etiquette, and finding work. This is not a camera equipment handbook; it is a comprehensive procedures manual which describes and explains the most important responsibilities of the camera assistant on the set, the theory behind the practice, and the methods that get the job done properly and keep the assistant frequently employed. Douglas C. Hart has been a freelance first-camera assistant on feature films, documentaries, television shows, and commercials for more than 20 years, including 10 years (and 10 films) as first-camera assistant to Gordon Willis, ASC, as well as work in 42 states and 26 foreign countries. Drive Like the Pros Michael Neff,2013-03-07 The leading expert in 3-D gold instruction shows readers how to improve their golf game like the pros—with the unrivaled TaylorMade® MAT-T system. Recreational golfers and touring professionals are turning to video swing analysis to improve their game, and the most state-of-the-art video system today is TaylorMade®'s MAT-T (Motion Analysis Technology by TaylorMade®) system. Combining multiple high-speed cameras and specifically designed software to produce a three-dimensional, computer-animated image of a golfer's swing, the MAT-T system gives players of all handicaps the ability to compare their golf swings to the composite swing avatars of PGA players such as Dustin Johnson or Sergio Garcia, to see how the game's longest hitters align themselves and position their bodies throughout their golf swings. Michael Neff, founder of the first TaylorMade® Performance Lab, has vast experience helping players like Dave Stockton, Natalie Gulbis, and Charles Wi use the MAT-T system to improve their swings. In Drive Like the Pros, he shows how golfers at all levels can adjust everything from the position of their shoulders to the club's angle of descent and spin as they: • Increase clubhead speed, ball speed, and smash factor. • Consistently contact the "sweet spot" on the clubface. • Improve accuracy and have better control over misses. Providing an unprecedented level of customized feedback and advice—and sharing exclusive championship player swing data previously available to only a handful of insiders—Drive Like the Pros is an essential addition to every golfer's library.
