Jumping Spider Tanya Turner,2018-05-15 The jumping spider is a family of 5000 different spider species that live all over the world. They vary in size and appearance but all have the most incredible ability to jump, sometimes up to 80 times its own body length! It's not just its amazing jumping skills that make this family of spiders special. Their eye sight is by far better than any other spider in the world. This is probably thanks to its eight eyes! Each pair does its own individual job and the result is the spider can see

almost 360 degree around its whole body and it is thought to be the only type of spider that can see in color! The jumping spider uses its super skills in jumping and powerful eyesight to hunt its prey because unlike other spider families, the jumping spider does not build webs; instead it actively hunts his prey. This spider also needs to use its powers to escape becoming a tasty meal itself. Want to learn more about the jumping spiders?
