Interdisciplinary Learning Through Dance Lynnette Young Overby, Beth C. Post, Diane Newman, 2005 The lesson plans in Interdisciplinary Learning Through Dance: 101 MOVEntures are broad (covering six disciplines) and deep (101 plans in all). Each lesson is based on national standards and has been field tested with students in grades K-5 with positive results. In fact, both teachers and students enjoy the plans and the learning gained through Interdisciplinary Learning Through Dance: 101 MOVEntures. Teachers value the materials: a book, a music CD to be used with selected lessons, and a 60-minute DVD that demonstrates teaching methodologies and shows selected lesson plans in action. All are designed to be used in lessons that focus on science, social studies, language arts, math, physical education, and creative arts. Students respond with enthusiasm to the active learning of subjects through playful movement. The book's content inspires engaging and active learning with these features: - Basic language of dance - How-tos of lesson planning - Classroom-management techniques - Thinking tools for promoting conceptual understanding - Assessment choices and forms Each lesson plan addresses the national standards for dance and the core curriculum subject areas, as well as the grade level, length, student objectives, and materials needed. In addition, each plan contains these special features: - Introduction - Moving adventure - Assessment - Extensions The book explores the benefits of crossing curricular boundaries with dance and delves into the vocabulary of dance and the pedagogy for creating moving adventures, or MOVEntures. It lays out the 101 lesson plans in six disciplines, providing assessment tools, lesson schematics, and additional resources- including the national standards and thinking tools. Complete. Cross-disciplinary. Broad and deep. Instructive. And fun. Teachers can't go wrong with Interdisciplinary Learning Through Dance: 101 MOVEntures, because the students learn the subjects and come back wanting to learn more.

Animal Signals John Maynard Smith,Dr. David Harper,2003-11-06 The reliability of animal signals is a central problem for evolutionary biologists. This text argues that it is maintained in several ways, relevant in different circumstances, and that biologists must learn to distinguish between them.

On the Trail of Spider Woman Carol Patterson-Rudolph,1997 This book weaves together the stories of tiny elusive Spider Woman as she is mythologised by the Keresan Pueblo, Hopi and Navajo people. Each tribe sees this mythic figure differently, yet there is no need to depict her in a realistic form. Instead she is described in symbols that reflect her attributes. She is a metaphor for something small and invisible yet very powerful. She represents creativity, spirit, old age, and wisdom. The myths are those that were left in the petroglyphs and pictographs of the San Juan Basin, south-

eastern Utah, and north-western New Mexico. Both the myths and the petroglyphs need to be understood from the perspective of the native people who made them. The petroglyphs refer to the myths and encapsulate definitions of the cosmos; they describe dreams, spirits and all the elements a person needed to survive. These are some of the many places where Spider Woman dwells. The petroglyphs and pictographs are a veil between the observer and other transcendental realms. They are a portal through which to enter the world of Spider Woman.

Mina's Rain Dance Sarah McAneney, 2021-06-04 In *Mina's Rain Dance*, a special girl finds joy when her imperfect dancing helps others-and ultimately herself. A heartwarming and beautifully illustrated picture book that celebrates the magnificence of compassion, kindness and community.

Neotropical Primates ,2000

How Mockingbirds Are Donald Bahr, 2011-06-24 The power of mockingbirds and the enduring significance of indigenous ceremonial speeches are deftly revealed in this brilliant analysis of ritual orations created and delivered by the O'odham people (also known as the Pima-Papago). Making their homes along the Akimel rivers and across the arid expanses and mountains of the desert of southern Arizona and northern Sonora, the O'odham people traditionally lived in small villages with scattered brush-walled round houses. Public ceremonies involved many villages and centered around small brush-walled rainhouses. One hundred years ago, two very different versions of a speech delivered during rain ceremonies were heard at these rainhouses. The Pimas (Akimel O'odham) told of nearly silent and stately events—the calming of a heaving earth, the building of a house on the stilled land, the breathing out of smoke, and the coming of gentle rain. In marked contrast, the Papagos (Tohono O'odham) told of how raucous, drunken people caused clouds to rise and explode with rain like vomiting drunks. Both stories featured mockingbirds and both involved the coming of rain. Today, the

gentler, Pima version is extinct while the wilder Papago story endures. Why? Drawing upon a rich reservoir of O'odham oral traditions and ceremonial performances, a meticulous deciphering of particular texts, and an insightful assessment of the impact of Christianity upon the O'odham people, Donald Bahr offers a brilliant analysis of why some indigenous stories cease to be relevant and told. The clues lie in the very different trajectories of the Pima and Papago communities in the late nineteenth and twentieth centuries, trajectories resulting in part with how Christianity fared in the respective communities.

Animal Tool Behavior Robert W. Shumaker, Kristina R. Walkup, Benjamin B. Beck, 2011-05-02 When published in 1980, Benjamin B. Beck's *Animal Tool Behavior* was the first volume to catalog and analyze the complete literature on tool use and manufacture in non-human animals. Beck showed that animals—from insects to primates—employed different types of tools to solve numerous problems. His work inspired and energized legions of researchers to study the use of tools by a wide variety of species. In this revised and updated edition of the landmark publication, Robert W. Shumaker and Kristina R. Walkup join Beck to reveal the current state of knowledge regarding animal tool behavior. Through a comprehensive synthesis of the studies produced through 2010, the authors provide an updated and exact definition of tool use, identify new modes of use that have emerged in the literature, examine all forms of tool manufacture, and address common myths about non-human tool use. Specific examples involving invertebrates, birds, fish, and mammals describe the differing levels of sophistication of tool use exhibited by animals.

The Rain Dance Martin Bailey, Murdoch Books Pty Limited, 1998

Native American Myths and Beliefs Tom Lowenstein, Piers Vitebsky, 2011-12-15 Readers explore the rich worldview of the Native Americans through myths and legends. Tales originating from various tribes functioned in a number of important ways: they explained the story of creation, described the relationship of humans to the rest of the universe, and preserved the sacred history of the tribe. In addition, myths and storytelling helped Native Americans pass on knowledge related to hunting, fishing, farming, healing the sick, and dealing with conflict or disaster. This book also places their mythology in historical context, for example, connecting earth myths with the Native Americans' real-life, tragic struggle to preserve their lands. Filled with colorful photographs and works of art, Native Americans' beliefs are beautifully illustrated, including their reverence for animals and the earth.

Each of them is connected directly or indirectly with the top-secret Trinity project, and over the course of the evening the horror of what is about to be unleashed on the world begins to dawn on them. Tap Roots Mark Knowles, 2002-06-03 Tracing the development of tap dancing from ancient India to the Broadway stage in 1903, when the word Tap was first used in publicity to describe this new American style of dance, this text separates the cultural, societal and historical events that influenced the development of Tap dancing. Section One covers primary influences such as Irish step dancing, English clog dancing and African dancing. Section Two covers theatrical influences (early theatrical developments, Daddy Rice, the Virginia Minstrels) and Section Three covers various other influences (Native American, German and Shaker). Also included are accounts of the people present at tap's inception and how various styles of dance were mixed to create a new art form.
