The Insect Crisis: The Fall of the Tiny Empires That Run the World Oliver Milman,2022-03-01 A devastating examination of how collapsing insect populations worldwide threaten everything from wild birds to the food on our plate. From ants scurrying under leaf litter to bees able to fly higher than Mount Kilimanjaro, insects are everywhere. Three out of every four of our planet's known animal species are insects. In The Insect Crisis, acclaimed journalist Oliver Milman dives into the torrent of recent evidence that suggests this kaleidoscopic group of creatures is suffering the greatest existential crisis in its remarkable 400-million-year history. What is causing the collapse of the insect world? Why does this alarming decline pose such a threat to us? And what can be done to stem the loss of the miniature empires that hold aloft life as we know it? With urgency and great clarity, Milman

explores this hidden emergency, arguing that its consequences could even rival climate change. He joins the scientists tracking the decline of insect populations across the globe, including the soaring mountains of Mexico that host an epic, yet dwindling, migration of monarch butterflies; the verdant countryside of England that has been emptied of insect life; the gargantuan fields of U.S. agriculture that have proved a killing ground for bees; and an offbeat experiment in Denmark that shows there aren't that many bugs splattering into your car windshield these days. These losses not only further tear at the tapestry of life on our degraded planet; they imperil everything we hold dear, from the food on our supermarket shelves to the medicines in our cabinets to the riot of nature that thrills and enlivens us. Even insects we may dread, including the hated cockroach, or the stinging wasp, play crucial ecological roles, and their decline would profoundly shape our own story. By connecting butterfly and bee, moth and beetle from across the globe, the full scope of loss renders a portrait of a crisis that threatens to upend the workings of our collective history. Part warning, part celebration of the incredible variety of insects, *The Insect Crisis* is a wake-up call for us all.

Herd on the Street Ken Wells, 2007-11-01 For more than sixty years, The Wall Street Journal has prided itself not just on its serious journalism, but also on the whimsical and arcane stories that amuse and delight its readers. In that regard, animal stories have proven to be the most beloved of all. Now, veteran Journal reporter and Page One editor Ken Wells gathers the finest, funniest, and most fascinating of these animal tales in one exceptional book. Here are lighthearted, witty stories of breakthroughs in goldfish surgery, the untiring efforts of British animal lovers who guide lovesick toads across dangerous motorways, and the quest to tame doggy anxieties by prescribing the human pacifier Prozac. Other pieces reflect on mankind's impact on the animal kingdom: a close-up look at the nascent fish-rights movement, the retirement of U.S. Air Force chimpanzees that once soared through space, and ongoing scientific efforts to defeat that most hardy enemy -- the cockroach. Each of these fifty-odd stories -- from the outlandish to the poignant -- exemplifies the superb feature writing that makes The Wall Street Journal one of America's best-written newspapers. This charming and utterly captivating collection will be a joy not only to animal lovers, but to all those who appreciate artful storytelling by writers who are obviously having a wonderful time spinning the tales.

Blue Bug, Red Road Gaines Post, 2008 This wonderful narrative by a retired history professor takes us back through the time and space of his ancestors and his own youth. Weaving between present and past, it offers a unique blend of nostalgia and incisive commentary about the imprint of Americans on the land and on each other. Gaines Post Jr. shares with us an odyssey that is at once personal and universal. James McPherson, Emeritus Professor of History, Princeton University, and author of *Battle Cry of Freedom* On a solo trip in 2002, Gaines Post Jr. drives his 1966 Volkswagen Bug from California to Wisconsin and back, traveling so slowly that the land and its history seep into his bones. Crossing old trails kindles his imagination of the westward expansion that attracted his

ancestors and shaped America's national character. In South Dakota, he visits Red Cloud's grave and hears the great Lakota leader whisper that Post is not at the end of his path. While working cattle on a Wyoming ranch, Post recalls his grandfather, born during Red Cloud's War. Part travelogue, part memoir, and overflowing with history's natural wonder, *Blue Bug, Red Road* speaks to those with a wandering spirit searching for quiet layers of time and memory within the American landscape.

A Bug's Life: Blueberries on Parade Disney Book Group, 2011-07-08 Francis the ladybug hurt his leg saving Princess Dot from a bird. Boundary Objects and Beyond Geoffrey C. Bowker, Stefan Timmermans, Adele E. Clarke, Ellen Balka, 2016-02-26 The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues. Susan Leigh Star (1954–2010) was one of the most influential science studies scholars of the last several decades. In her work, Star highlighted the messy practices of discovering science, asking hard questions about the marginalizing as well as the liberating powers of science and technology. In the landmark work *Sorting Things Out*, Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems. Star's most celebrated concept was the notion of boundary objects: representational forms—things or theories—that can be shared between different communities, with each holding its own understanding of the representation. Unfortunately, Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work. This volume collects articles by Star that set out some of her thinking on boundary objects, marginality, and infrastructure,

together with essays by friends and colleagues from a range of disciplines—from philosophy of science to organization science—that testify to the wide-ranging influence of Star's work. Contributors Ellen Balka, Eevi E. Beck, Dick Boland, Geoffrey C. Bowker, Janet Ceja Alcalá, Adele E. Clarke, Les Gasser, James R. Griesemer, Gail Hornstein, John Leslie King, Cheris Kramarae, Maria Puig de la Bellacasa, Karen Ruhleder, Kjeld Schmidt, Brian Cantwell Smith, Susan Leigh Star, Anselm L. Image operations Jens Eder, Charlotte Klonk, 2016-12-14 Still and moving images are crucial factors in contemporary political conflicts. They not only have representational, expressive or illustrative functions, but also augment and create significant events. Beyond altering states of mind, they affect bodies and often life or death is at stake. Various forms of image operations are currently performed in the contexts of war, insurgency and activism. Photographs, videos, interactive simulations and other kinds of images steer drones to their targets, train soldiers, terrorise the public, celebrate protest icons, uncover injustices, or call for help. They are often parts of complex agential networks and move across different media and cultural environments. This book is a pioneering interdisciplinary study of the role and function of images in political life. Balancing theoretical reflections with in-depth case studies, it brings together renowned scholars and activists from different fields to offer a multifaceted critical perspective on a crucial aspect of contemporary visual

culture.

Crisis Vision Torin Monahan, 2022-08-29 In *Crisis Vision*, Torin Monahan explores how artists confront the racializing dimensions of contemporary surveillance. He focuses on artists ranging from Kai Wiedenhöfer, Paolo Cirio, and Hank Willis Thomas to Claudia Rankine and Dread Scott, who engage with what he calls crisis vision—the regimes of racializing surveillance that position black and brown bodies as targets for police and state violence. Many artists, Monahan contends, remain invested in frameworks that privilege transparency, universality, and individual responsibility in ways that often occlude racial difference. Other artists, however, disrupt crisis vision by confronting white supremacy and destabilizing hierarchies through the performance of opacity. Whether fostering a recognition of a shared responsibility and complicity for the violence of crisis vision or critiquing how vulnerable groups are constructed and treated globally, these artists emphasize ethical relations between strangers and ask viewers to question their own place within unjust social orders.
