Antisocial Media Siva Vaidhyanathan,2018 One of the signal developments in democratic culture around the world in the past half-decade has been the increasing power of social media to both spread information and shape opinions. After the Arab Spring of 2011, many pointed to the liberating potential of platforms like Facebook andTwitter. Yet five years later, as many Americans reeled in shock from the election of an authoritarian bullshit artist (using philosopher Harry Frank's technical definition of the term), a few perceptive observers began looking at new at the social and political effects of dominant social mediaplatforms, particularly Facebook. And they did not like what they saw.The media studies and IP scholar Siva Vaidhyanathan is one of those sharp observers, and in Anti-Social Media he argues that our descent into dystopia stems in no small part from trends that have developed in the online world. The 2016 election saw a remarkable and dispiriting increase of peoplehiving themselves off within ideological echo chambers and treating fake news as real. Vaidhyanathan provides a structural explanation of why this happened, and he has located a culprit: social media, and more specifically Facebook. The founders of Facebook may have had (some) good intentions, buthe contends that they have created a Frankenstein's monster that they have neither the will nor capacity to rein in. Fake news abounds, and the algorithms that undergird the platform drive people inexorably to news sites that conform to their ideological predilections -

which Facebook can figure outwith ease. Serious news reporting, already in a parlous state, has suffered even more as people on platforms like Facebook (meaning most people) are bombarded by both snippets of news from multiple sources and ads that look like news. Deliberative democracies require informed citizenries able todistinguish facts and falsehoods. By weakening those skills, social media is eroding the very foundations of our democratic republican culture. Social media-driven false news campaigns and ideological echo chambers are not only visible in the US, either - they are clearly on the rise in Europe andacross the developing world too. Vaidhyanathan closes by offering offers a number of smart policy proposals that attack the problem, but they will undoubtedly be hard to enact. But the first order of business when facing a significant new crisis is to recognize its existence and explain what it is.Anti-Social Media promises to be that path-breaking initial step toward understanding how social media is quickly undermining not only centuries of democratic progress, but civil society itself.

Anti-Social Don Zolidis,2019 This collection of seven short plays explores the many facets and platforms of social media. From Instagram to Facebook, and even a #throwback to the days when MySpace was cool, Anti-Social pokes fun at the "social" in social media.

Contemporary African Mediations of Affect and Access Helene Strauss,Sarah Olutola,Jessie Forsyth,2018-10-11 Across Africa, new collectivities are shifting the terms within which

access to economic opportunity, social belonging, and political agency have historically been understood. Recent years have seen powerful waves of civic mobilization sweep across the continent. Less prominent articulations of contemporary political desire have also been percolating through the diffuse experiences of the African everyday. As differential access to global capitalism and its promises folds into modes of subjection—and escape—that are hard to predict, those who exercise power find ever more ways of guarding the borders and memberships of privileged groups. This book turns to the critically entangled terms of affect and access as a basis for exploring emergent orientations in the field of African cultural theorizing. It pays especial attention to scholarship engaging with the multifaceted coordinates of political and social participation, where complex assemblages of affective attachment, exchange, and realignment work in concert with demands for socio-political and economic forms of access. This book was originally published as a special issue of Safundi.

   Gangs of Social Media Vasimraja Bhavikatti,2020 India's one and only Forensic Cyber Psychologist, Professor Fabulous is summoned by National Cyber Defence of India to hunt down the mastermind behind a cyber-attack on social media users who intentionally or unintentionally spread fake news. He has twelve hours before all the private data of social media users will be made public and all the devices used to spread fake news will self-destruct. In the name of freedom of speech and

driven by blind emotion, all social media users are guilty of sharing, forwarding, tweeting fake unverified information. Will this be the end of fake news or the end of social media itself? In a desperate race against time, Professor Fabulous encounters online scammers, cyber hacktivist gangs, paid trolls, Social Media business executives, Politicians, Cyber security Start-ups and a forgotten victim of fake news before the mastermind reveals his motive behind the cyber-attack.

The Divide Taylor Dotson,2021-08-03 Why our obsession with truth--the idea that some undeniable truth will make politics unnecessary--is driving our political polarization. In The Divide, Taylor Dotson argues provocatively that what drives political polarization is not our disregard for facts in a post-truth era, but rather our obsession with truth. The idea that some undeniable truth will make politics unnecessary, Dotson says, is damaging democracy. We think that appealing to facts, or common sense, or nature, or the market will resolve political disputes. We view our opponents as ignorant, corrupt, or brainwashed. Dotson argues that we don't need to agree with everyone, or force everyone to agree with us; we just need to be civil enough to practice effective politics. Dotson shows that we are misguided to pine for a lost age of respect for expertise. For one thing, such an age never happened. For another, people cannot be made into ultra-rational Vulcans. Dotson offers a road map to guide both citizens and policy makers in rethinking and refashioning

political interactions to be more productive. To avoid the trap of divisive and fanatical certitude, we must stop idealizing expert knowledge and romanticizing common sense. He outlines strategies for making political disputes more productive: admitting uncertainty, sharing experiences, and tolerating and negotiating disagreement. He suggests reforms to political practices and processes, adjustments to media systems, and dramatic changes to schooling, childhood, the workplace, and other institutions. Productive and intelligent politics is not a product of embracing truth, Dotson argues, but of adopting a pluralistic democratic process.

  Reckoning with Social Media Aleena Chia,Ana Jorge,Tero Karppi,2021-11-04 Social media use is pervasive, and so is it's perceived harmful effects, dubbed 'techlash'. Disconnection practices—restricting, detoxing, deleting—often reinforce rather than confront the ways social media organize attention, everyday life, and society. This book addresses the ambivalence, commodification, and complicity involved in attempts to separate from social media.

  Communication in the Era of Attention Scarcity Waddick Doyle,Claudia Roda,2019-09-13 This book examines a series of phenomena that have accompanied the development of digital technology and focuses on the attentional processes that these phenomena have in common. Across the social order, complaints are growing about a lack of attention as well as an overriding push by corporations and institutions to capture and mobilize attention. With a particular focus on

social attention, the book highlights the need for an increased awareness about the agents that shape attention in our society, the effects that these agents (attempt to) produce, and the means by which individuals and groups may increase their control over personal and social attention. With a range of academic perspectives, this book is a crucial read for understanding the changing shape of political, business and personal communication.

  Engaging Social Media in China Guobin Yang,Wei Wang,2021-05-01 Introducing the concept of state-sponsored platformization, this volume shows the complexity behind the central role the party-state plays in shaping social media platforms. The party-state increasingly penetrates commercial social media while aspiring to turn its own media agencies into platforms. Yet state-sponsored platformization does not necessarily produce the Chinese Communist Party's desired outcomes. Citizens continue to appropriate social media for creative public engagement at the same time that more people are managing their online settings to reduce or refuse connection, inducing new forms of crafted resistance to hyper-social media connectivity. The wide-ranging essays presented here explore the mobile radio service Ximalaya.FM, Alibaba's evolution into a multi-platform ecosystem, livestreaming platforms in the United States and China, the role of Twitter in Trump's North Korea diplomacy, user-generated content in the news media, the emergence of new social agents mediating between state and society, social media art projects, Chinese and US scientists' use of social media, and reluctance to engage with

WeChat. Ultimately, readers will find that the ten chapters in this volume contribute significant new research and insights to the fast-growing scholarship on social media in China at a time when online communication is increasingly constrained by international struggles over political control and privacy issues.

Anti-Social Behaviour Orders J. Donoghue,2010-02-24 This book vigorously challenges the dominant academic view of ASBOs as erroneous tools of social control, and offers an alternative perspective on anti-social behaviour management which argues that ASBOs are capable of enabling a positive process of engagement among local authorities, housing professionals and residents.

The Frequency of God Mark William Jackson,2018-02-18 In his first collection, Australian poet Mark William Jackson is by turns reflective and rallying, as he explores closeness and distance, love and change, and perfectly articulates the hostile coopting of social space by technology. The Frequency of God is his first poetry collection.

Media, Democracy and Social Change Aeron Davis,Natalie Fenton,Des Freedman,Gholam Khiabany,2020-09-15 When we are told so regularly that we live in a 'post truth' age and are surrounded by 'fake news', it can be tempting to think of politics as primarily mediated. Discussion and analysis of public affairs is preoccupied with the power and reach of platforms or the passion and rage of social media exchanges. As important as these issues may be, a focus on

the communicative risks downgrading the political. Media, Democracy and Social Change puts politics back into political communications. It shows how within a digital media ecology, the wider context of neoliberal capitalism remains essential for understanding what political communications is, and can hope to be. Tackling broad themes of structural inequality, technological change, political realignment and social transformation, the book explores political communications as it relates to debates around the state, infrastructures, elites, populism, political parties, activism, the legacies of colonialism, and more. It is both an expert introduction to the field of political communications, and a critical intervention to help re-imagine what a democratic politics might mean in a digital age. It will be essential reading for students, researchers and activists. Aeron Davis, Natalie Fenton, Des Freedman and Gholam Khiabany all work at the Department of Media and Communication at Goldsmiths, University of London, where they teach together on the MA in Political Communications.

  Political Epistemology Elizabeth Edenberg,Michael Hannon,2021 The first edited collection to explore one of the most rapidly growing area of philosophy: political epistemology. The volume brings together leading philosophers to explore ways in which the analytic and conceptual tools of epistemology bear on political philosophy--and vice versa.

  Dependent, Distracted, Bored Susanna Paasonen,2021-04-20 A new approach to understanding the culture of ubiquitous

connectivity, arguing that our dependence on networked infrastructure does not equal addiction. In this book, Susanna Paasonen takes on a dominant narrative repeated in journalistic and academic accounts for more than a decade: that we are addicted to devices, apps, and sites designed to distract us, that drive us to boredom, with detrimental effect on our capacities to focus, relate, remember, and be. Paasonen argues instead that network connectivity is a matter of infrastructure and necessary for the operations of the everyday. Dependencies on it do not equal addiction but speak to the networks within which our agency can take shape.

Overdoing Democracy Robert B. Talisse,2019-09-27 We live in an age of political polarization. As political beliefs on the left and the right have been pulled closer to the extremes, so have our social environments: we seldom interact with those with whom we don't see eye to eye. Making matters worse, we are being appealed to--by companies, products, and teams, for example--based on our deep-seated, polarized beliefs. Our choice of Starbucks or Dunkin' Donuts, Costco or Sam's Club, soccer or football, New York Times vs. Wall Street Journal is an expression of our beliefs and a reinforcement of our choice to stay within the confines of our self-selected political community, making us even more polarized. Letting it bleed into these choices in every corner of our lives, we take democracy too far and it ends up keeping us apart. We overdo democracy. When we overdo democracy, we allow it to undermine and crowd out many of the most important social goods that

democracy is meant to deliver. What's more, in overdoing democracy, we spoil certain social goods that democracy needs in order to flourish. A thriving democracy needs citizens to reserve space in their social lives for collective activities that are not structured by political allegiances. To ensure the health and the future of democracy, we need to forge civic friendships by working together in social contexts in which political affiliations and party loyalties are not merely suppressed, but utterly beside the point. Drawing on his extensive research, Talisse sheds light on just how deeply entrenched our political polarization has become and opens our eyes to how often we allow politics to dictate the way we see almost everything. By limiting our interactions with others and our experience of the world so that we only encounter the politically like-minded, we are actually damaging the thing that democracy is meant to preserve in the first place: the more fundamental good of recognizing and respecting each other's standing as equals.

  Digitized Lives T.V. Reed,2018-12-12 In chapters examining a broad range of issues—including sexuality, politics, education, race, gender relations, the environment and social protest movements—Digitized Lives argues that making sense of digitized culture means looking past the glossy surface of techno gear to ask deeper questions about how we can utilize technology to create a more socially, politically and economically just world. This second edition includes important updates on mobile and social media, examining how new platforms and devices have altered how we

interact with digital technologies in an allegedly 'post-truth' era. A companion website (culturalpolitics.net/index/digital_cultures) includes links to online articles and useful websites, as well as a bibliography of offline resources, and more.

  The Routledge Handbook of Developments in Digital Journalism Studies Scott Eldridge II,Bob Franklin,2018-09-03 The Routledge Handbook of Developments in Digital Journalism Studies offers a unique and authoritative collection of essays that report on and address the significant issues and focal debates shaping the innovative field of digital journalism studies. In the short time this field has grown, aspects of journalism have moved from the digital niche to the digital mainstay, and digital innovations have been 'normalized' into everyday journalistic practice. These cycles of disruption and normalization support this book's central claim that we are witnessing the emergence of digital journalism studies as a discrete academic field. Essays bring together the research and reflections of internationally distinguished academics, journalists, teachers, and researchers to help make sense of a reconceptualized journalism and its effects on journalism's products, processes, resources, and the relationship between journalists and their audiences. The handbook also discusses the complexities and challenges in studying digital journalism and shines light on previously unexplored areas of inquiry such as aspects of digital resistance, protest, and minority voices. The Routledge Handbook of Developments in Digital

Journalism Studies is a carefully curated overview of the range of diverse but interrelated original research that is helping to define this emerging discipline. It will be of particular interest to undergraduate and postgraduate students studying digital, online, computational, and multimedia journalism.

   Information and Communications Technology in Support of Migration Babak Akhgar,Karen Latricia Hough,Yara Abdel Samad,Petra Saskia Bayerl,Anastasios Karakostas,2022-05-31 The book provides a holistic review, presenting a multi-stakeholder, multi-disciplinary, international, and evidence-based approach to Information and Communications Technology (ICT) in migration. The book brings together different views and multifaceted responses to ICT-based migration management, examining their overlap, conflict, and synergies. The book is a major addition to the field, tackling important debates concerning humanitarianism and securitization in the reception of migrants, as well as exploring the role of digital technology in aiding migrant integration. The authors explore contentious areas such as the use of new technologies deployed on borders for migration management and border security under the umbrella of smart border solutions including drones, AI algorithms, and face recognition, which are widely criticized for ignoring the fundamental human rights of migrants. The research presented will depart from the

euphoric appraisals that technology has made things easier for migrants and those who assist them, to critically examine the bane and boon, benefits and afflictions, highlighting the barriers, as well as the solutions, including several under-researched aspects of digital surveillance and the digital divide. This edited volume has been developed by the MIICT project, funded under the EU Horizon 2020 Action and Innovation programme, under grant agreement No 822380.    The Antisocial Network Ben Mezrich,2021-09
   Democracy and the Public Sphere Hans-Jörg Trenz,2023-11-23 From fake news to infringement of privacy in digital spheres, the changing landscapes of media and public communication have completely transformed contemporary democracies in recent decades. Disruptions of media functioning can be seen as evidence for a transition from democracy to post-democracy, but how plausible is this scenario? Using empirical evidence, the author asks how imminent the threat of the end of democracy is, and how it can be restored. Exploring the creative and destructive ways individuals and groups make use of new digital and

social media in democratic societies across the world, the book presents a much-needed critical theory of the public sphere as we enter the new digital age.
