Split Second Douglas E. Richards,2015-08-31 The breathtaking new thriller from the New York Times bestselling author of WIRED, who has been called a worthy successor to Michael Crichton. (SF Book.com)What if you found a way to send something back in time? But not millions of years back, to the age of the dinosaur. Not a day back. Not even a minute back.What if you could only send something back less than the blink of an eye? Would this be of any use? You wouldn't have nearly enough time to right a wrong, change an event, or win a lottery. Nathan Wexler is a brilliant physicist who thinks he's found a way to send matter a split second back into the past. But before he can even confirm his findings, he and his wife-to-be, Jenna Morrison, find themselves in a battle for their very lives. Because while time travel to an instant earlier seems useless, Jenna comes to learn that no capability in history has ever been more profound or far-reaching. Now, as Jenna fights to defeat the powerful forces arrayed against her, nothing less than the fate of humanity hangs in the balance. . . SPLIT SECOND is a roller coaster ride of a thriller, one that will have readers pondering the nature of time, and of reality, long after they've read the last page.Richards is a tremendous new talent (Stephen Coonts) who can keep you turning the pages all night long (Douglas Preston)

A Split Second to Midnight Joe Dipietro,2005-08-10 Author Creates Fictional Scenario for Global Firestorm The time to avert ecological disaster is running out, and one scientist and an alien race may be all that can prevent imminent disaster. You're invited into a world on the brink in this action-packed science fiction thriller Atmospheric carbon dioxide increased 25%, during the twentieth century, causing the oceans to warm one degree, resulting in catastrophic hurricanes, followed by bureaucratic mayhem. With increases in atmospheric oxygen of as little as 4% during the twenty-first century, the world risks a global disaster. Alexander Petrov is an inventor turned CEO in the mid twenty 21st century. His amazing inventions eventually lead him to the discovery of an alien race known as Andromedans who are living on earth as scientists and geneticists. These alien visitors are growing increasingly concerned about the ecological future of their planet, and their studies show a grim future. Through politics and petty business trickery, his cousin, Stefano, covertly sells Alexander's inventions to NASA. Unresolved family issues have caused a rift between the two cousins, and Alexander's success has made the bitterness grow even deeper in Stefano. Combining raw intelligence, aggressive tactics and risk taking, Alexander tries to cope with his adversaries. Meanwhile, as the conflict between the two cousins swells, the Andromedan Federation, realizing the global significance of the growing battle, seizes the opportunity to colonize the Earth in an attempt to prevent the ensuing mayhem and impending calamity. A fast-paced, riveting ecological thriller, *A Split Second to Midnight*, uses vivid imagery and scientific speculation to race toward an exciting climax.

Split Second David Baldacci,2004-08 Two Secret Service agents, one of them retired, have each had similar experiences losing presidential candidates while assigned to protect them. Split-Second Lifetime Denise Kahn,2013-09 On a business trip from the U.S. to Paris, Jebby meets Dodi on a flight. Jebby is an ethnomusicologist, and Dodi is an international photographer. They are immediately attracted to each other, but from the very first moment Dodi triggers what seems like past life memories for Jebby of a poignant and passionate time they shared together. As Jebby tries to figure out if she is “losing it” or if past lives really do exist, they embark on a path of adventure and romance where lifetimes and cultures interweave in modern day Paris, Uzbekistan, and in the old Southwest. Jebby and Dodi live their unusually diverse and rich adventure and romance, surrounded by an international cast and superb musicians. At the same time Jebby discovers where the Hopi originated from, that death is not a finality, love transcends lifetimes, and music is eternal.

Dictionary for Air Travel and Tourism Activities Homero E. Martinez,2008-10 Travel and Tourism are wide and multifaceted systems whose complexity is reflected in the terminology employed to describe them or to operate them. Their communication language appears at times secretive; but there is no secrecy, in fact. Travel activities are bound to a vehicle distinguished by its velocity. Operating such activities demands, therefore, a communication system able to match such rapidity. It is required that all performers are fluent in travel terminology, including students, airlines staff, travel agents, and other service providers. The Dictionary for Travel and Tourism Activities has been designed to solve the need to learn, understand and succeed with the most common terms and expressions used by these so-called Industries. It is an educational tool for students and professionals, but is also an understanding means for travelers.

The Second Front Kenneth J. Conboy, 2006 Decades before al-Qaeda took shape, religious radicals in Southeast Asia were laying the groundwork for a struggle to achieve a backward-looking utopia. This is the story of Jemaah Islamiyah (JI), the secretive organization that spans no less than half a dozen nations and seeks the full implementation of their intolerant take on Islam. In *The Second Front: Inside Asia's Most Dangerous Terrorist Network*, best-selling author Ken Conboy pieces together the planning and execution of JI's most deadly terrorist acts from exclusive interviews and classified reports. In details never before revealed, it delves into the minds of the group's leaders - from the professorial bomb expert Azhari to the al-Qaeda proxy Hambali. From the shadows of the Hindu Kush to battlefields on the Spice Islands, *The Second Front* peels back the veil of secrecy and chronicles the successes in bringing down this network, as well as exposes the missed opportunities by regional governments to prevent terrorist acts and sectarian violence that have taken the lives of thousands. KEN CONBOY, the bestselling author of *INTEL: Inside Indonesia's Intelligence Service* and *KOPASSUS: Inside Indonesia's Special Forces*, is country manager for Risk Management Advisory, a private security consultancy in Jakarta. Prior to that, he served as deputy director at the Asian Studies Center, an influential Washington-based think tank, where his duties including writing policy papers for the U.S. Congress and Executive on economic and strategic relations with the nations of South and Southeast Asia. A graduate of Georgetown University's School of Foreign Service and of Johns Hopkins' School of Advanced International Studies, Conboy was also a visiting fellow at Chulalongkorn University in Bangkok and has lived in Indonesia since 1992.

Springer Handbook of Odor Andrea Büttner, 2017-02-28 The Springer Handbook of Odor is the definitive guide to all aspects related to the study of smell and their impact on human life. For the first time, this handbook aligns the senso-chemo-analytical characterization of everyday smells encountered by mankind, with the elucidation of perceptual, hedonic, behavioral and physiological responses of humans to such odors. From birth onwards we learn to interact with our environment using our sense of smell. Moreover, evolutionary processes have engendered a multi-faceted communication that is supported - even dominated - by olfaction. This compilation examines the responses of humans to odors at different stages of life, thereby building a foundation for a widely overseen area of research with broader ramifications for human life. The expert international authors and editor align aspects, concepts, methodologies and perspectives from a broad range of different disciplines related to the science of smell. These include chemistry, physiology, psychology, material sciences, technology but also disciplines related to linguistics, culture, art and design. This handbook, edited by an internationally renowned aroma scientist with the support of an outstanding team of over 60 authors, is an authoritative reference for researchers in the field of odors both in academia and in industry and is also a useful reference for newcomers to the area.
