Digital-supported workflow of orthopedic surgeries Benjamin Lahmann,2021-10-05 German hospitals are increasingly being asked to improve efficiency while striving to enhance the quality of standards that will afford a high level of patient safety and quality in the treatment process. The main objective of this Ph.D. thesis was to analyze whether digital support software used during surgery has a positive effect on selected clinical process and quality ratios in orthopedics. Two retrospective case-control studies of 383 hip joint endoprosthetic implantations and 297 knee joint endoprosthetic implantations were conducted at a German hospital between 2015 and 2020. Statistically significant results were evaluated commercially within the framework of the German diagnosis-related groups. Results show that the use of digitally assisted surgery leads to significantly shorter hospital stays and reduces postoperative complications, which in turn has a direct impact on treatment costs and hospital revenues.

The Personal Web Mark Chignell,James R. Cordy,Ryan Kealey,Joanna Ng,Yelena Yesha,2013-07-15 This book grew out of the First Symposium on the Personal Web, co-located with CASCON 2010 in Markham, Ontario, Canada. The purpose of the symposium was to bring together prominent researchers and practitioners from a diverse range of research areas relevant to the advancement of science and practice relating to the Personal Web. Research on the Personal Web is an outgrowth of the Smart Internet initiative, which seeks to extend and transform the web to be centred on the user, with the web as a calm platform ubiquitously providing cognitive support to its user and his or her tasks. As with the preceding SITCON workshop (held at CASCON 2009), this symposium involved a multi-disciplinary effort that brought together researchers and practitioners in data integration; web services modelling and architecture; human-computer interaction; predictive analytics; cloud infrastructure; semantics and ontology; and industrial application domains such as health care and finance. The discussions during the symposium dealt with different aspects of the architecture and functionality needed to make the Personal Web a reality. After the symposium the authors reworked their presentations into draft chapters that were submitted for peer evaluation and review. Every chapter went through two rounds of reviewing by at least two independent expert reviewers, and accepted chapters were then revised and are presented in this book.
