Pour Le Sport Roxanna Nydia Curto, Rebecca Wines, 2021 This edited volume gathers together studies examining various aspects of physical culture in literature written in French from Europe and around the Francophone world. We define physical culture as the systematic care for and development of the physique, and interpret it to include not only sport in the modern sense, but also all the athletic activities that preceded it or relate to it, such as bodily forms of exercise, leisure, and artistic creation. Our essays pursue diverse interpretive approaches and focus on texts from a wide variety of periods (medieval to the present) and genres (short stories, novels, essays, poetry) in order to consider the fundamental-yet highly neglected-place of physical activities in literature and culture from the French-speaking world. Some of the questions the essays explore include: Does the genre sports literature exist in French, and if so, what are its characteristics? How do governments or other political entities mobilize sports literature? What role

do narratives about sports-especially the creation of teams-play in the construction of national, regional and/or local identities? How is physical culture used in literary works for pedagogical or ideological purposes? To what extent do sports performances provide a metaphorical and figurative discourse for discussing literature and culture?

The Indy Car Wars Sigur E. Whitaker,2015-10-08 The world of Champ Car auto racing was changing in the 1970s. As cars became more sophisticated, the cost of supporting a team had skyrocketed, making things difficult for team owners. In an effort to increase purses paid by racing promoters and win lucrative television contracts, a group of owners formed Championship Auto Racing Teams (CART) in 1978. Soon after, CART split from its sanctioning body, the United States Auto Club (USAC). Though Champ Cars ran on numerous tracks, the Indianapolis 500 was the payday that supported most teams through the season. From the beginning, CART had most of the successful teams and popular drivers, and they focused on driving a wedge between the track owners and the USAC. Over the next 30 years, the tension between CART and USAC ebbed and flowed until all parties realized that reunification was needed for the sake of the sport. This book details the fight over control of Champ Car racing before reunification in 2008.

365 Sports Cars You Must Drive John Lamm, Steve Sutcliffe, Larry Edsall, James Mann, Kris Palmer, 2020-10-27 365 Sports Cars You Must Drive puts you in the driver's seat of a century's worth of sports car legends (and a few rather less legendary), each presented with a fun and informative profile and fact-and-spec box. It's the ultimate gearhead's bucket list and poses the challenge: How many have you driven? Whoever coined the phrase getting there is half the fun must have owned a sports car. And the wag who suggested that it's the journey not the destination? Probably driving a Lotus or MG at the time. From towering icons like Ferrari, Lamborghini, Porsche, and Corvette to everyman sportsters from Triumph, MG, Sunbeam, and Miata to oddballs like Crosley, Sabra, and DB, sports cars inspire passion and strong opinions as few other vehicles on the road can. In one beautiful book, long-time Road & Truck magazine chief photographer John Lamm, along with other top motoring contributors, gives the reader illustrated profiles of every sports car you've ever dreamed of driving! Now, imagine if you could drive a different sports car—any sports car—every single day for a year. Which would you choose?

Routledge Handbook of Sports Event Management Milena M. Parent, Jean-Loup Chappelet, 2017-07-14 From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial

challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

Sports on Television Dennis Deninger, 2012-11-12 In Sports on Television, Dennis Deninger provides an all-encompassing view of the sports television industry. He progresses from the need for this book, to the history of the industry and discipline, to the pioneering events of sports broadcasting and sports television, to a nuts-and bolts, behind-the-scenes look at a sports television production. All the while, he examines the impact that sports and

the mass media have had (and are continuing to have) on one another and on society.

1970 Plymouth Road Runner Scott Ross, 2018-01-15 By 1969, the muscle car war among Ford, General Motors, and Chrysler had reached a fevered pitch. Plymouth's Road Runner, Mopar's intermediate entry, was leading the charge. For 1970, the Road Runner had its strongest year yet as it housed the best street V-8s Chrysler had to offer. Author Scott Ross retraces the history of the Road Runner and brings the 1970 model year into full focus. The stripped-down Road Runner exemplified the essence of a purpose-built muscle car: brute power and stunning acceleration. A new aggressive grille and Air Grabber hood provided an audacious yet tasteful performance statement. The back-to-basics 'Bird had a unique character with its iconic cartoon Road Runner graphics and beep-beep horn.

Underneath the skin, the Road Runner lived up to its persona. The 335-hp 383 was one of the fastest 383s Chrysler built because it was fitted with the 440 camshaft, heads, and manifolds for even more performance. The 440 Six Pack car generated 390 hp and gained a reputation as a stout street performer. And at the top, the conservatively rated 425-hp 426 Hemi set the standard for performance. The Road Runner was lighter than the Cuda and somewhat overbuilt as it was one of the toughest and most consistent muscle cars. To transfer all this power to the ground, the Road Runner was equipped with the A-833 4-

speed or TorqueFlite 727 automatic. With a torsion-bar suspension and heavy-duty rear end, the Road Runner handled well. However, these are just a few of the highlights of this complete story. Each volume in the In Detail Series provides an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders, as well as production numbers.
