Applied Sport Management Skills Robert N. Lussier, David C. Kimball, 2019-04-17 *Applied Sport Management Skills, Third Edition With Web Study Guide*, takes a unique and effective approach to teaching students how to become strong leaders and managers in the world of sport. Organized around the central management functions—planning, organizing, leading, and controlling—this third edition addresses the Common Professional Component topics outlined by the Commission on Sport Management Accreditation (COSMA). The text explains important concepts but then takes the student beyond theories, to applying those management principles and developing management skills. This practical how-to approach, accompanied by unmatched learning tools, helps students put concepts into action as sport managers—developing the skills of creative problem solving and strategic planning, and developing the ability to lead, organize, and delegate. *Applied Sport Management Skills, Third Edition*, has been heavily revised and touts a full-color format with 1,300 new references. Content updates keep pace with industry trends, including deeper discussions of legal liability, risk management and equipment management, servant leadership, sport culture, and social media. Particularly valuable are the special elements and practical applications that offer students real opportunities to develop their skills: Features such as *Reviewing Their Game Plan* and *Sport Management Professionals @ Work* (new to this edition) provide a cohesive thread to keep students focused on how sport managers use the concepts on the job. Applying the Concept and Time-Out sidebars offer opportunities for critical thinking by having the student think about how specific concepts relate to a sport situation or to the student's actual experiences in sports, including part-time jobs, full-time jobs, internships, and volunteer work. Self-Assessment exercises offer insight into students' strengths and weaknesses and how to address shortcomings. An enhanced web study guide is integrated with the text to facilitate a more interactive setting with which to complete many of the learning activities. Several of the exercises require students to visit a sport organization and answer questions to gain a better understanding of sport management. Skill-Builder Exercises present a variety of scenarios and provide step-by-step guidance on handling day-to-day situations such as setting priorities, conducting job interviews, handling conflict, and coaching employees to better performance. Sports and Social Media Exercises offer Internet-based activities that expose students to the role of social media in managing a sport organization. Students are required to use popular social media sites such as Facebook, Twitter, and LinkedIn and visit sport websites. *Game Plan for Starting a Sport Business* cases put students in the driver's seat and ask them to perform managerial activities such as developing an organization structure and formulating ideas on how to lead their employees. The web study guide allows students to complete most of the learning activities online or download them and then submit them to the instructor. Instructors will also have access to a suite of ancillaries: an instructor guide, test package, and presentation package. *Applied Sport Management Skills, Third Edition*, is a critical resource that provides students with a thorough understanding of the management principles used in sport organizations while also helping students developing their practical skills. Students will appreciate the opportunity to begin building a solid foundation for a fulfilling career in sport management.

Doping in Sport Angela J. Schneider, Fan Hong, 2020-10-28 This book considers ethical arguments about performance enhancing drugs in sport in a global context. It examines: * The forces that are bringing about the debate of ethical issues in performance enhancing drugs in sport * The sources of ethical debates in different continents and countries * The variation of ethical arguments in different cultural, political, ideological and sports systems. Whilst there has been a significant body of work that has looked at the importance of ethical issues in performance enhancing drugs in sport - there has been little, if any, consideration of the various ethical concepts in different countries and cultures involving

sport. This is a major omission. This book fills the gap and provides a thorough review and analysis of the ethical literature on performance enhancing drugs in sport in the global society. It makes a major contribution to the worldwide anti-doping campaign in sport. This volume was previously published as a special issue of the journal *Sport In Global Society*.

Introducing core managerial functions and surveying every sector of contemporary sport from school and community sport to professional leagues and international megaevents, this edition includes brand-new chapters focused on diversity, equity, and inclusion; on esports; and on governance in times of crisis, covering issues such as COVID-19, climate change, scandal, and security risks. Helping readers to see a big picture across the contemporary sport industry, at all levels, and to find their place in it as future sport managers, this textbook is essential for all courses on sport governance, sport policy, or sport development. The Palgrave Handbook of Disability Sport in Europe Caroline van Lindert, Jeroen Scheerder, Ian Brittain, 2023-06-28 This handbook explores the various ways in which disability sport is governed and organised across Europe, as well as examining the extent to which persons with a disability participate in sport at the grassroots level. Based upon a solid theoretical framework and up-to-date data, the 19 country-specific chapters in this handbook give a comparative overview of the structuring, steering and supporting elements of disability sport policy and sport participation levels amongst persons with a disability, as well as the extent to which countries adopt policies to promote inclusion in sport in this population. A multitude of authors also identify the various methods and challenges in collecting sport participation data with regard to persons with a disability.
