Magic's Pawn Mercedes Lackey, 1989-06-06 Groundbreaking epic fantasy series in Mercedes Lackey's Valdemar universe • Lambda-Award winning novels with heartfelt high adventure and magic Though Vanyel has been born with near-legendary abilities to work both Herald and Mage magic, he wanted no part in such things. Nor does he seek a warrior's path, wishing instead to become a Bard. Yet such talent as his, if left untrained, may prove a menace not only to Vanyel but to others as well. So he is sent to be fostered with his aunt, Savil, one of the fame Herald-Mages of Valdemar. But, strong-willed and self-centered, Vanyel is a challenge which even Savil cannot master alone. For soon he will become the focus of frightening forces, lending his raw magic to a spell that unleashes terrifying wyr-hunters on the land. And by the time Savil seeks the assistance of a Shin'a'in Adept, Vanyel's wild talent may have already grown beyond anyone's ability to contain, placing Vanyel, Savil, and Valdemar itself in desperate peril.

The Music of the Future Robert Barry, 2017-03-21 The Music of the Future is not a book of predictions or speculations about how to save the music business or the bleeding edge of technologies. Rather, it's a history of failures, mapping 200 years of attempts by composers, performers and critics to imagine a future for music. Encompassing utopian dream cities, temporal dislocations and projects for the emancipation of all sounds, The Music of the Future is in the end a call to arms for everyone engaged in music: to fail again, fail better.

Bridging Differences for Better Mentoring Lisa Z. Fain, Lois J. Zachary, 2020-02-26 This first comprehensive guide to helping mentors and mentees bridge gaps between and among cultures—a growing issue in today's diverse workplace—is coauthored by the founder and CEO of the Center for Mentoring Excellence. As the workplace has become more diverse, mentoring has become more challenging. Mentors and mentees may come from very different backgrounds and have limited understanding of each other's cultures and outlooks. But mentoring remains the most powerful tool for creating meaningful relationships, furthering professional development, and increasing engagement and retention. Younger workers and emerging leaders in particular are demanding it. Lisa Z. Fain and Lois J. Zachary offer a timely, evidence-based, practical guide for helping mentors develop the level of cultural competency needed to bridge differences. Firmly rooted in Zachary's well-known four-part mentoring model, the book uses three fictional scenarios featuring three pairs of diverse mentors and mentees to illustrate how key concepts can play out in real life. It offers an array of accessible tools and strategies designed to help you increase your self-awareness and prepare you to embrace and leverage differences in your mentoring relationships. But beyond tips and techniques, Fain and Zachary emphasize that authenticity is the key—the ultimate purpose of this book is to help the mentor and mentee make a genuine connection and learn from each other. That's when the magic really happens.

Deathstalker Simon R. Green, 2016-05-04 Owen Deathstalker, last of the infamous warrior Clan, always considered himself more of a writer than a fighter, preferring his history books to making any actual history with a sword. But books won't protect him from Her Imperial Majesty Lionstone XIV,

who just Outlawed and condemned Owen to death, without any explanation, reason, or warning. No wonder she's called the Iron Bitch. Now, on the run from Imperial starcruisers, shady mercenaries, and just about everyone else in the Empire, Owen's options are limited. Though the name Deathstalker still commands respect in certain quarters, out on the Rim, Owen is lucky he can cobble together a makeshift team of castoffs, including an ex-pirate, a cyborg, and a bounty hunter. But allies won't be enough to save him. If he's to live, Owen can either run forever...or take down the corrupt Empire. To do that, he'll need the fabled Darkvoid Device—an artifact dating back to the first Deathstalker and perhaps the only weapon powerful enough to help this ragtag rebellion win. The time has come for Owen to finally embrace his Deathstalker heritage...and all the blood and death that go along with it. Deathstalker is the first book in New York Times bestselling author Simon R. Green's beloved space opera series.

Cyber Defence in the Age of AI, Smart Societies and Augmented Humanity Hamid Jahankhani, Stefan Kendzierskyj, Nishan Chelvachandran, Jaime Ibarra, 2020-04-06 This publication highlights the fast-moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored, together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase, but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind, such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles, interactions with Critical National Infrastructure (CNI) and the Command, Control, Communications and Intelligence (C3I) decision-making framework. A detailed view of the cyber-attack landscape will be garnered; touching on the tactics, techniques and procedures used, red and blue teaming initiatives, cyber resilience and the protection of larger scale systems. The integration of AI, smart societies, the human-centric approach and Augmented Humanity is discernible in the exponential growth, collection and use of [big] data; concepts woven throughout the diversity of topics covered in this publication; which also discusses the privacy and transparency of data ownership, and the potential dangers of exploitation through social media. As humans are become ever more interconnected, with the prolificacy of smart wearable devices and wearable body area networks, the availability of and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership, privacy and situational awareness are now at the forefront in this new age.

Legion Brandon Sanderson, 2012-09-10 Now also available in the complete collection Legion: The Many Lives of Stephen Leeds. A novella from #1 New York Times bestselling author Brandon Sanderson, Legion is a fast-paced, witty, and supremely fun thriller with a psychological bent. Stephen Leeds is perfectly sane. It's his hallucinations who are mad. A genius of unrivaled aptitude, Stephen can learn any new skill, vocation, or art in a matter of hours. However, to contain all of this, his mind creates hallucinatory people—Stephen calls them aspects—to hold and manifest the information. Wherever he goes, he is joined by a team of imaginary experts to give advice, interpretation, and explanation. He uses them to solve problems...for a price. His brain is getting a

little crowded, however, and the aspects have a tendency of taking on lives of their own. When a company hires him to recover stolen property—a camera that can allegedly take pictures of the past—Stephen finds himself in an adventure crossing oceans and fighting terrorists. What he discovers may upend the foundation of three major world religions—and, perhaps, give him a vital clue into the true nature of his aspects. ----- A note from the publisher: Brandon will send a free copy of this ebook to anyone who purchased the Subterranean Press hardcover. See the title page in the ebook preview for details.

A Football Genius Dan Eddy, 2022-03-30 Peter Hudson, AM is one of the greatest footballers in the history of Australian football. He was prolific goal-kicker who broke a string of records during his remarkable career at Hawthorn and in Tasmania, culminating in him being awarded Legend status in the Australian Football Hall of Fame. No VFL/AFL player has averaged more goals per game than Hudson (5.64), and he is one of only two men - with Bob Pratt - to have kicked 150 goals in a season. The highest-paid and most talked-about player of his era, Hudson's career was dotted with sensational moments: an unprecedented recruiting chase in 1966-67, a drought-breaking century of goals in 1968, the dramatic pursuit of Pratt's record in 1971, a career-defining knee injury at the peak of his powers in the first round of 1972, the 'helicopter game' in 1973, a successful coaching career in Tasmania during the 1970s, then a remarkable VFL comeback in 1977, are just some of the events that set Hudson's story apart. Moreover, his son Paul later emulated his father by playing in the 1991 premiership with the Hawks, 20 years after Peter achieved the same feat. They were the first father-son duo to win premierships with Hawthorn. The Peter Hudson story has never been fully told, and author Dan Eddy had exclusive access to the Hudson family's archives, including never-before-seen photographs.
