Healthcare Informatics for Fighting COVID-19 and Future Epidemics Lalit Garg, Chinmay Chakraborty, Saïd Mahmoudi, Victor S. Sohmen, 2021-09-01 This book presents innovative solutions utilising informatics to deal with various issues related to the COVID-19 outbreak. The book offers a collection of contemporary research and

development on the management of Covid-19 using health data analytics, information exchange, knowledge sharing, the Internet of Things (IoT), and the Internet of Everything (IoE)-based solutions. The book also analyses the implementation, assessment, adoption, and management of these healthcare informatics solutions to manage the pandemic and future epidemics. The book is relevant to researchers, professors, students, and professionals in informatics and related topics.

Globalization and Human Security Paul

Battersby, Joseph M. Siracusa, 2009 This concise text presents a focused, well-rounded, and clear-eyed introduction to the concept of human security. Questioning the utility of traditional national-security frameworks in the post-Cold War era, Paul Battersby and Joseph M. Siracusa argue that we must urgently reconsider the principle of state sovereignty in a global world where threats to humanity are beyond the capacity of any one nation to address through unilateral action. The authors highlight circumstances, actors, and influences beyond the traditional focus on state security, especially the role of international organizations and nongovernmental organizations. They also emphasize the importance of human rights, arguing for the development of an effective intervention capacity to protect individuals from state action as well as other security threats arising from conflict, poverty, disease, and environmental degradation. A welcome alternative to state-centric approaches to security, this balanced book will be a valuable supplement for courses in international and national security.

Flour and Breads and Their Fortification in Health and Disease Prevention Victor R. Preedy, Ronald Ross Watson, Vinood Patel, 2019-02-26 Flour and Breads and Their Fortification in Health and Disease Prevention,

Second Edition, presents the healthful benefits of flours and flour products and guides the reader on how to identify opportunities for improving health through the use of flour and fortified flour products. The book examines flour and bread related agents that affect metabolism and other health-related conditions, explores the impact of compositional differences between flours, including differences based on country of origin and processing technique, and includes methods for the analysis of flours and bread-related compounds in other foods. This revised, updated edition contains new research on diverse flours with an emphasis on nutrients and nutraceuticals as supplements, thus making this content a timely reference for both nutritionists and food scientists. Presents the healthful benefits of flours and flour products Guides the reader in identifying opportunities for improving health through the use of flour and fortified flour products Examines flour and bread related agents that affect metabolism and other health-related conditions Explores the impact of compositional differences between flours, including differences based on country of origin and processing technique

Sensors for Gait, Posture, and Health Monitoring Volume 2 Thurmon Lockhart,2020-06-17 In recent years, many technologies for gait and posture assessments have emerged. Wearable sensors, active and passive in-house monitors, and many combinations thereof all promise to provide accurate measures of physical activity, gait, and posture parameters. Motivated by market projections for wearable technologies and driven by recent technological innovations in wearable sensors (MEMs, electronic textiles, wireless communications, etc.), wearable health/performance research is growing rapidly and has

the potential to transform future healthcare from disease treatment to disease prevention. The objective of this Special Issue is to address and disseminate the latest gait, posture, and activity monitoring systems as well as various mathematical models/methods that characterize mobility functions. This Special Issue focuses on wearable monitoring systems and physical sensors, and its mathematical models can be utilized in varied environments under varied conditions to monitor health and performance

The Soft Cage Christian Parenti, 2007-10-15 On a typical day, you might make a call on a cell phone, withdraw money at an ATM, visit the mall, and make a purchase with a credit card. Each of these routine transactions leaves a digital trail for government agencies and businesses to access. As cutting-edge historian and journalist Christian Parenti points out, these everyday intrusions on privacy, while harmless in themselves, are part of a relentless (and clandestine) expansion of routine surveillance in American life over the last two centuries- from controlling slaves in the old South to implementing early criminal justice and tracking immigrants. Parenti explores the role computers are playing in creating a whole new world of seemingly benign technologies- such as credit cards, website cookies, and electronic toll collection- that have expanded this trend in the twenty-first century. The Soft Cage offers a compelling, vitally important history lesson for every American concerned about the expansion of surveillance into our public and private lives.

Cyberspace in Peace and War, Second Edition Martin Libicki, 2021-09-15 This updated and expanded edition of *Cyberspace in Peace and War* by Martin C. Libicki presents

a comprehensive understanding of cybersecurity, cyberwar, and cyber-terrorism. From basic concepts to advanced principles, Libicki examines the sources and consequences of system compromises, addresses strategic aspects of cyberwar, and defines cybersecurity in the context of military operations while highlighting unique aspects of the digital battleground and strategic uses of cyberwar. This new edition provides updated analysis on cyberespionage, including the enigmatic behavior of Russian actors, making this volume a timely and necessary addition to the cyber-practitioner's library. *Cyberspace in Peace and War* guides readers through the complexities of cybersecurity and cyberwar and challenges them to understand the topics in new ways. Libicki provides the technical and geopolitical foundations of cyberwar necessary to understand the policies, operations, and strategies required for safeguarding an increasingly online infrastructure.

Shattered Lives Debbie Hillier, Brian Wood, 2003
Summary: Med separat sammanfattning.

Climate Change Binayak Ray, 2011-09-16
Notwithstanding denials by climate-skeptics, the global scientific community considers the world environment is rapidly worsening. They argue that failure to adopt measures to reduce CO₂ gas emission in the atmosphere

could lead to disastrous social-economic, politico-security and environmental consequences. Skeptics argue that climate changes are due to nature's own cyclical phenomenon. They fail to understand that climatology as a scientific discipline is in its infancy, but overwhelming evidence suggests that human activities are responsible for this. Smart campaigning and some mistakes by the IPCC in its 2007 report enabled skeptics to derail the efforts to adopt a legally binding CO₂ emission target in Copenhagen in 2009. Global political leadership collectively failed to rise above their narrow national interest in Copenhagen. Last moment efforts led to a resolution, but a resolution without vision or teeth. Given large socio-economic differences between countries, a legally binding CO₂ reduction resolution is anathema to many countries. The leadership failed to understand that one size prescription would not fit all, as internal political compulsions dominate countries' policy position on climate change issues. South Asia is politically complex. The political and economic rivalry between China and India impacts differently on policy cooperation issues in regional countries, but on climate change issues policy response require a regional approach, as impacts do not stop at political boundaries. Water sharing is critical for India, Pakistan, and Bangladesh. India and Pakistan are virtually water scarce countries and most of Bangladesh's freshwater comes from outside the country. These countries have been using groundwater at an unsustainable rate, and in many parts it requires treatment. Collectively they house largest number of poverty stricken people on earth. Food production is declining; rising food prices are creating a huge fiscal burden. UN Millennium goals remain unachievable. Rising sea level is predicted to displace between 30 and 60 million people. Food, health, human rights, and settlement issues

all become a part of climate change policy. These countries, without a collective effort and international support, cannot resolve such ca

Drones and Terrorism Nicholas Grossman, 2018-01-31

In warzones, ordinary commercially-available drones are used for extraordinary reconnaissance and information gathering. They can also be used for bombings - a drone carrying an explosive charge is potentially a powerful weapon. At the same time asymmetric warfare has become the norm - with large states increasingly fighting marginal terrorist groups in the Middle East and elsewhere. Here, Nicholas Grossman shows how we are entering the age of the drone terrorist - groups such as Hezbollah are already using them in the Middle East. Grossman will analyse the ways in which the United States, Israel and other advanced militaries use aerial drones and ground-based robots to fight non-state actors (e.g. ISIS, al Qaeda, the Iraqi and Afghan insurgencies, Hezbollah, Hamas, etc.) and how these groups, as well as individual terrorists, are utilizing less advanced commercially-available drones to fight powerful state opponents. Robotics has huge implications for the future of security, terrorism and international relations and this will be essential reading on the subject of terrorism and drone warfare.
