The Benefit of the Gift Mark Andrew Hill,2012-04-01 Archaeological data from the Late Archaic (4000-2000 years ago) in the Western Great Lakes are analyzed to understand the production and movement of copper and lithic exchange materials. Also considered in this volume are access to and benefits from exchange networks, as well as social changes accompanying the development of extensive, continental scale, exchange systems of interaction in this period.

The Stone Circles of Britain, Ireland, and Brittany Aubrey Burl,2000-01-01 The spectacular stone circles of western Europe, some nearly 6000 years old, have intrigued viewers through the ages. This beautiful book about these megalithic rings explores their ancestry, methods of construction, and eventual desertion. A substantially revised version of Aubrey Burl's highly praised work The Stone Circles of the British Isles, it offers new insights into the purpose of stone circles. It also provides a new interpretation of Stonehenge and of Callanish in Scotland, the first overview of the cromlechs in Brittany, a discussion of the problems of archaeoastronomy as related to stone circles, a greatly expanded Gazetteer, and an up-to-date list of radiocarbon dates and recent excavations.

California Prehistory Terry L. Jones,Kathryn A. Klar,2007-07-16 Some forty scholars examine California's prehistory and archaeology, looking at marine and terrestrial palaeoenvironments, initial human colonization, linguistic prehistory, early forms of exchange, mitochondrial DNA studies, and rock art. This work is the most extensive study of California's prehistory undertaken in the past 20 years. An essential resource for any scholar of California prehistory and archaeology!
