10/20/Life Second Edition Brian Carroll, 2017-01-19 10/20/Life Second Edition If you like Starting Strength or 5/3/1, you're going to LOVE 10/20/Life! What is 10/20/Life? 10-and-20 weeks at a time, for a lifetime of positive momentum in training and in LIFE. This philosophy is a life-long approach for any level of lifter or athlete. Many recreational lifters utilize the protocols in this book to have a better plan in the gym, with no plans to ever compete. On the other hand, many competitive lifters from Beginner to Pro use this approach with great success! From The Author, Brian Carroll: With 10/20/Life, my objective is to teach you to get the results you want by coaching yourself-the same way a superior coach would take you through an individualized program in a great gym. We start out with a thorough examination of your weak points because that's how quality coaching works. The idea is to show you what to program,

and when, based on your weaknesses in the squat, bench press, and deadlift. This sounds simple, but it's something most people don't even consider, much less put into practice. From there, the 10/20/Life system takes you through the best injury-preventative warm-up in the industry, followed by a comprehensive layout of coaching cues for each individual lift. From start to finish, you'll learn what to look for and what to do, and you'll learn the reasoning behind all of it. By the time you're finished working your way through these materials, you'll be able to coach yourself, and others, like a pro. Learn to be your own coach, attack your weaknesses and utilize a proven philosophy that is a guide to permanent success. This book includes a comprehensive WEAK POINT CHART and WARM-UP INDEX that teach you how to assess your own training and PRESCRIBE THE EXERCISES YOU NEED. 20 YEARS OF RESEARCH AND TRIALS distilled into a program you can actually use! The plan is an easy five-step process: 1. Choose your schedule. (3 different) 2. Determine your weak points in the main lifts. (use the coaching guide to correct form) 3. Use the Weak Point and Assistance Exercise indexes to custom design your own program. (pick your assistance work as specified in the Weak Point index) 4. Follow the warm-up protocol listed. (4 parts, super easy and custom) 5. Determine your level of readiness, then train according to the system's RPE plan for that day or if you're in precontest, you go off of percentages. (this all depends on where you are in your phase of training) Just a few of the sizable additions to this second edition physical copy: \* New chapter Deload \* New chapter Establishing a baseline \* New chapter Speed work Other updated features include: \* A reintroduction of the 10/20/Life philosophy and update with AMAZING testimonials - male and female, raw and equipped. \* The 5 main principles of 10/20/Life \* How do you gain a mental edge? Tips to do so \* What 10/20/Life is NOT - putting to rest speculation \* RPE - a different approach \* Nutrition - a closer look with detail \* Coaching cues updated and expanded \* Weak point index updated and expanded \* Combo day updated and modified \* Step-by-step set-up and the pro's and con's of a wide base bench vs the traditional tucked approach \* New offseason training split Jumbo Day for those with little to no time to train or those who can't recover between sessions with a typical split or even the combo day \* All new pictures and charts throughout the entire book \* Percentages for pre-contest modified and addressed with suggestions \* Many new exercise and section breakouts for explanations of movement, an important note, or simply a summary of the section \* FAQ section with 15 of the most commonly asked questions. And so much more!

**SQUAT 101** Rahul Mookerjee, 2022-11-11 **DISCLAIMER** The exercises, workouts, and routines in this book are meant for people in good physical condition. Stop if you experience any pain or other discomfort while doing these, and visit a medical practitioner if you have any doubts. The author is not a medical professional, and is not responsible for injuries (or other maladies) that may arise as a result, either direct or indirect of following the routines and exercises in this manual. That said, this book is probably, along with 0 Excuses Fitness which didn't devote near as much attention to squats as it should have - and Gorilla Grip, and Pushup Central - and my books on pull-ups - a MUST have for any serious trainee. The exercise in this book will REHABILITATE - not harm. That has been the case for EVERYONE that has followed these routines - and ... Dear Reader, Man! I gotta tell you, I feel so damn ANNOYED when I write disclaimers of the sort I just did above, which I didn't copy and paste from a template (I should have one). I gotta put it in though because no doubt there will be SOMEONE who tries these exercises, does them wrongly, and then turns around and in a typical trigger happy manner blames the author and the book for "causing the problems" when the reverse is actually true. Legal disclaimers and all that, I didn't pay much attention to these things before, I rarely do even now, but since we've grown to a certain level "I gotta put it in". And I almost done made the disclaimer into the introduction! You that is reading this likely KNOW who I am, Rahul Mookerjee, the

“Stella Artois of Bodyweight Training Culture” as this shi fu is called – brutally honest to a T from day one, and continuing on in that vein now. “If you ain’t squatting – you ain’t training”. Period. In Matt Furey’s classic book Combat Conditioning, Furey once penned something similar along the lines of “if you’re not doing Hindu squats, you’re not really doing Combat Conditioning”. Maybe, maybe not, but I get his drift. To me, I’d say squats – period – not necessarily just Hindu squats. My book 0 Excuses Fitness which is the baseline for any serious fitness trainee has been called the “very best there is in fitness out there, there is NOTHING else that even comes CLOSE” contains instructions on squats, and an entire video (digital download) dedicated on how to do Hindu squats. And a whole plethora of pushups – indeed, if you do what I did in the workout video the rest of your life, you’ll quickly get in great shape and advance beyond your wildest dreams. But all along, I had this niggling feeling I wasn’t devoting “enough attention to squats”. I did to pushups, yes. But even then I came out with Pushup Central – another classic manual with 55 different ways on how to perform “the world’s oldest exercise” and that was both very well received and very warranted (and a classic example of DOING the thing first even though “no-one asked for it”). Sometimes you gotta DO first. The customer – YOU – sometimes has to be SHOWN the final product – FIRST. And back to squats, for some reason, a lot of the great books on bodyweight training culture don’t talk a lot about ‘em. I would be remiss to leave out Brooks Kubik’s Dinosaur Bodyweight Training here, in it he says you should do squats daily, and do ‘em for the rest of your life. He provides detail on them too, but again, nowhere near what this great exercise deserves. And again – as Rahul Mookerjee says, if you ain’t squatting, you aint training, period. I don’t care what else you do, I don’t care if you climb hills for four hours a day straight (as I did, and continue to do, and it keeps in SUPER CONDITION) – I don’t care if you bang out 250 straight pushups in the morning, and then repeat in the evening, I don’t care if you’re a stud at pull-ups, I don’t care if you can bridge for hours on end – all those things are great, you SHOULD work up to those levels, but again. If you ain’t squatting, you aint training. Sprinting doesn’t replace squats. Step ups don’t even come close (to me, they are the lazy man’s equivalent of leg training – though don’t get me wrong, they are a great SUPPLEMENT). But again. There is a reason the ancient Hindus did squats galore for thousands of reps a day. There is a reason the Gama swore by BOTH Hindu Pushups – and Hindu SQUATS. He was reputed to have done over 5000 squats and 3000 pushups daily, and while these numbers are probably not entirely accurate – the fact remains that bodyweight exercises were the cornerstone of his routine – and ultimately what brought him PHENOMENAL SUCCESS (he once lifted a 1200 kg stone that TWENTY FIVE regular people failed to budge on their “collective”). That’s an example of the power that bodyweight training can give you. Look, as I’ve said repeatedly in my training newsletters – there is nothing that beats the up and down motion of the body you get with squats – it works the core and entire body like NOTHING ELSE! Lots of folks think squats are just an thigh exercise. Wrong. Done right, they work the thighs yes, but if thats all you think you’re working – you ain’t doing ‘em right. Squats tax the HAMSTRINGS – a hugely ignored part of the body – the calves (obvious) and also the entire back and CHEST. They tax the BUTT muscles when done right! The deep breathing you do (or should do) when doing squats enlarges the rib cage and improves functioning of the entire body – improves assimilation and digestion of the FOOD you EAT – gets rid of extra fat around the midsection and entire body quicker than almost any other exercise will – and is an “all in one” exercise that you can do even when you’re pressed for time. Steve Austin “oh hell yeah” (we all know him!) once made the comment of “if you do squats, I don’t care what else you do, youre going to grow!”. For a wrestler on the road almost 365 days a year, and a beast incarnate, I’d listen when someone like him says something. Ditto for dips, often called the upper body equivalent of the squat, and pull-ups, but this book focuses on SQUATS. Again, if there was one flaw that I personally believe 0 Excuses Fitness had, it did not devote

near enough space in the 300 plus pages of the book to squats. I believe it got close in terms of pushups, but I put out two more books on pushups anyway! And now, I'm doing the same with SQUATS. Enjoy! Some may get back to me at this point with "well, I squat with weights". And thats great if you choose to do so. However, this book is about bodyweight squats, which I truly believe tax the body FAR more internally at a deeper level than simply "5 sets of the heaviest squat" you can do. Indeed, a lot of these guys that can squat Everest fall flat on their face - or butt - when asked to do 100 straight Hindu squats, for one (and we ain't even getting to the tougher versions you'll see in this book). If they can even do them to begin with - most flop out at 20 when they start and cannot walk properly for DAYS on end. Remember, it "aint just bodyweight squats", there is a whole ART to squats if you do 'em RIGHT! I cannot tell you how much it irritates and annoys me - aggravates the living hell out of me when someone approaches something with that "its just this" attitude, if thats the attitude you got, then don't do the exercise in the first place. It doesn't need you - you need it. Period. And last, but not least, if you have pre-existing injuries, rods in your legs - wonky lower backs and shoulders from years of either heavy squatting or lifting or (even worse) "body building" (boobybuilding) .... some of you might think "well, high rep will kill me". No, my friend, it wont. The way I teach you to do these exercises is UNLIKE any other you've seen out there - those that have read my books know this "I've never seen anything like your books out there". The INTENSITY is unparalleled - like with me. And all these squats REHABILITATE - they don't tear down. If you're currently in good shape, they will get you in BETTER SHAPE - and how? Because they tax you from the entire out. Your fasica, your BREATHING, your TENDONS, joints, ligaments, all those ignored parts of the body will be worked heavily and to the bone, not just your muscles!! In fact, done right, bodyweight squats have been proven to increase BONE density too my friend - much like upper body exercises like pull-ups etc have. Best part though, as I've said before ..... You'll FEEL like a billion bucks! NOTHING trains the body and makes you feel better than heavy duty LEG WORK! Trust me on this one, when you're walking around with that "thighs rippling" (without you consciously doing it) ... you'll know what I mean. Lets keep the focus on fitness though, not "looks". Those are a distant by product, and as I've said tons of times before, train for FITNESS, train for functional STRENGTH, not "looks". Train for something useful, train for something that can save your life (and ass) when you really, really need it, when no-one else will help, when it's YOU, and just YOU against all of 'em, train to have the gumption to beat the odds even when they're staggeringly against you, train to have WILL, train to have SOLID, superhuman POWER - and so forth. In short, training should be practical and useful, bottom line! And way too many people make it otherwise. Anyway, I could write tomes all day on this, and do on my site ... But for this introduction, we've gone on all enough, so I'll stop here. Hehe. But as a last reminder - - remember, if you ain't squatting? Then you ain't training, period. Onward! LEG RIPPLING SWAGGER! Without you even trying, my friend. I dont know if you know what I'm talking about, but maybe you do ... In 2002, I went to China for the first time - at the age of 23, supposedly my "best time" when I was supposed to be in the "best shape of my life". Yet, for me, it's been the opposite most of my life. When young, I was never in good shape - though I wanted to be - and got ridiculous advice from all and sundry in terms of training such as "lift pink 10 kg dumbbells" for half an a hour day, thats how the big guys build muscle! Or, the "he thinks he's so strong" comments made by family members who did not know any better that tore me down mentally. This isn't me castigating family here. This is me being brutally honest with you about my LIFE and fitness - and ME - in general as I always am, and telling you a story as I always end up doing - all true, hehe. REAL LIFE! Perhaps no other book fits the "real" (keeping it real) category better than THIS one, the words BE flying out of my mouth as I speak - phew! Deep breath. But anyway, so I went to China, climbing the stairs to my fourth floor apartment left me dizzy (almost) and

breathing hard, when I had to lug suitcases up there? My! It was like I had to climb Everest! And dont get me wrong. I did other things back then – I was a weight lifter – I lifted real weights, not 10 kg dumbbells! People in the office would squeeze my forearms and say “he’s STRONG!” I still remember my mother, who once made the “he thinks he’s so strong” comment when I was young say the reverse when she saw me lug their suitcases up – heavy ass 25 kg suitcases, one hand at a time up to my apartment. “I’ll never forget how you did that”, she exclaimed. But even with all that, a lot was missing. I was strong, but not anywhere NEAR fit. And I could use my strength ONCE – but nowhere near what it needed to be ie. “repetitively”. It was really in the September of 2003 or I believe 2004 (I Think I first went to China in 2003, not 2002 as I said up there) that my life changed ... Anyway, I’ll get the dates clear later. ... when I met a certain Ann Lee! The first time I dated her in the park – right smack next to my house, with a huge mountain in it I could SEE from my apartment, yet for some odd reason I ignored this free fitness tool right in front of me (we often do that!) ... the date was her idea, the park? I didnt even know it was there! – and we climbed the mountain, I remember what a MESS I felt like when doing it! I remember STRUGGLING up that damn hill like it was Everest (right now I can slink up it easy peasy five times a day, and it ain’t an easy hill to hike, trust me!) ... I remember how out of breath I was, I remember my legs turning to jelly – my lower back wonking out – and calves burning ... and all along, I remember a PUMP, a massive PUMP in my forearms of all things I had NEVER felt with anything else! I still remember the girls there giggling in that cute Chinese way and pointing at the fat lao wai (foreign devil, or “wai guo ren” – old man from from foreign land) climbing the hell .... Or was it hill. Hehe. It felt like the former! I remember thinking “when will this damn torture end”. Hehe. That hill felt interminable! I was going to put the picture from Advanced Hill Training here too, maybe someday. For now – back to it – THAT, as a certain Kelly was to say “years later” – is REAL TRAINING! REAL HILL climbing! I had experienced it before when climbing the Indian Himalayas, so steep that when I asked my father to do it again once after a day the very vehment “NO WAY!” was all the answer I needed Hehe. Anyway – where was I. Swashbuckling thighs, eh. The hill caused a revolution in my life, fitness wise, most of it is here for you to see! It CHANGED my life – till this day, I credit Ann Lee for doing this. If she had not come into my life, none of this would have happened. Of course, I credit my work on a certain Dongguan Expat website as well for that, but thats another story! Anyway, I quickly got in better shape climbing that hill on the weekend, then after Ann Lee kicked my rumpus again (I was making excuses about not climbing after work “it’s too late” or something) – I started doing it daily, and a fitness machine emerged. The lower back that had felt so wonky for DAYS after that first climb – became STRONG. The legs – thighs especially turned into rippling pillars of STEEL from that climb. My upper body fat disappeared, my strength improved, my PULL-ups shot through the roof, most of all, I was seeing my GRIP strength improve by leaps and bounds which amazed me! An idiot once wrote back on Gorilla Grip saying “he claims he’s improved his grip by NOT doing a single pull-up for months, but he doesnt say how he’s done it!”. Actually, I did say. He was just too dumb to read between the lines. My core strength increased x 10, my digestive issues went away, but all of that is different, another story, what I’m going to tell you about is one night I was walking to the bank to get some cash for a trip out of China, and the way I was walking, with my thighs bulging out naturally – well, I dont know if you guys have ever experienced that, but it makes you feel like a BILLION BUCKS! I repeat, a billion bucks, untouchable, confidence like nothing else, and it usually comes with a toned swagger to your CORE too, strength you will NEVER lose! I’ve often tried to replicate this “without having it”, and it showed. People told me “dont splay your legs out like that!” But when you have it naturally, it shows too! In the movie Get Carter, Sly Stallone walks into see the owner of the pub where his brother Richie died – now, he’s dressed in a full suit, typical “mob enforcer”, calm, menacing, quiet, viper ready to strike if need be ...

goateed to a T, and so forth, as my friend Lily once said, “looking like a bad ass!” He was. But that walk to the desk, much like my walk to the ATM that night, the way the thighs rippled, that understated SWAGGER that comes from being in SUPER SHAPE – I’ll never forget that! You have to FEEL IT to UNDERSTAND! And squats, my friend, are the ONE exercise that will give you this x 10000! Sure, you can climb stairs, you can hike hills – all of that is great. But like I’ve said above, nothing replaces squats. You that can hike hills for hours might be amazed when you first get on some of the squats in my program, you might not be able to do more than 25, and you might not be able to walk for days afterwards either. Trust me on this one! Squats do what NO other exercise does, my friend, and back to swashbuckling SWAGGER, and machismo, and feeling great... well, that’s the icing on the cake, but also the reason you should be DOING these in the first place! On one last note – some of you might ask though, “why do I need squats” (given what I’ve said about other forms of training). You might as well ask me “why do you need to breathe – or train – or live in the first place”, it’s that obvious. Look, like I’ve said before, nothing beats the up and down motion your body makes, and the internal changes that go on your body, the strength it builds, the functional strength it builds throughout the whole body that you simply cannot get from any other movement. When you wrestle, for one, what sort of positions do you have to constantly fight your way out of? I don’t think you’re climbing a hill or stairs in that motion, are you? Squats have a CIRCULAR sort of motion, my friend, not just Hindus, all squats, that ensure you return back to where you started, “full circle”, a motion used in EVERYDAY life, fighting, walking, all of it, and again, you have to squat first to truly understand it. Sure, the other methods I’ve mentioned work, but they don’t work nearly as well as squats, and NOT in the same manner. Does that mean you don’t do them? Of course not. You do BOTH. You have ALL the fitness tools you need in your fitness toolkit, not just one, but you don’t neglect the most basic and important one as most people DO. Squats build EVERYDAY strength and functional fitness – and I’m talking BODYWEIGHT squats in a way nothing else can, that is the most simple and concise answer I can give you. There is a reason the old timers did these daily without fail and in high reps, and if even that isn’t enough for you, you’re at the wrong page, and probably better off pumping and humping the leg press at the gym. FEROCIOUS SQUATS! Way too many idiots and morons think and will say the bodyweight squat – or the Hindu squat or any of the variants I’m going to be teaching you in this NEVER SEEN BEFORE COURSE “just a warmup”... Or, it doesn’t build muscle. Or, the real deal is weighted squat, and those should really be focused upon, while the others? Blah. “Just do it” to get them over with, and usually in a haphazard half hearted manner. I’m here to tell all these sort of people that they’re grade A buffoons. Not only are they choosing the path of most injury as opposed to least, but they’re also depriving themselves of the valuable tendon and ligament benefits you get from bodyweight work – not to mention strength, that can be used repeatedly without your legs giving out as opposed to 5 reps, or 20 reps while squatting a cow or what not. Don’t believe me, take the cow squatters, ask them to pump out 100 – hell, 50 ferocious squats, and we’ll see. FEROCIOUS SQUATS. Maybe I should rename the book that ... Hehe. Or maybe I’ll leave it the way it is! But really, my friend. When you do these, remember too many people go through the motions and nothing else, do NOT be one of those people. I was resting this afternoon, then I said to myself – let’s do some squats, and let’s AMP THEM! FEROCITY! You really put all you got into them, you don’t pause for long breaks either to catch wind, you ... are a man – or a woman – on a MISSION basically. The sort of mental strength this sort of workout builds is beyond comparison, you cannot get it from anything else, weights or not included, but why just believe me? Take it from the old time strongmen, all of who had legs of pure steel. Not all squatted an elephant, or even bothered, but they all, right from the Gama, to Bruce Lee, to modern day legends like Herschel Walker were DAMN good at the bodyweight squat, and did tons of reps daily, often throughout the day. There is a

reason to the so called madness, or a method, and a reason behind doing what they did. REALLY put all you have into it. FOCUS – I repeat – focus on breathing in and out with every repetition consciously, this will make the workout far tougher, and bring way more results than if you do it without focus on the breath. You should REALLY feel the heart thumping after around 100 reps or so, if you can even get that far. Ass to grass – on every rep. No excuses, pally. And STRAIGHT back up, no bent knees on that one. And there it is. FEROCIOUS squats, and boy do they bring results and then some. Anyway, enough on that. On to the ... (and yes, thats one of the secrets to squats getting you in ferocious, awesome shape, but there's plenty more in the BOOK) BENEFITS you can get from this course – I think we've covered a lot above already! But here they are again in bullet format for you ... Build a BULLETPROOF, rock solid body with squats, a “son of the soil” look that comes only from having a sturdy foundation beneath you, a foundation that cannot be ROCKED. Build the sort of SWASHBUCKLING “thigh” swagger (and swagger in general) feeling you get when you have those ripping, FIT legs and a toned midsection (they go together). The feeling cannot be beat, it cannot be replicated, and it, or the lack of it SHOWS when you walk – or STRIDE around the place – and believe me, THIS feeling alone is worth a BILLION BUCKS and the price of this course MANY TIMES OVER!! Build massive thighs that ripple with functional muscle by doing this course – NO, “rippling” with muscle is NOT an exaggeration! Build MUSCLE on your entire body and lose weight quicker by doing squats, yes, just squats, I repeat, JUST SQUATS!! and nothing else quicker than almost ANY OTHER EXERCISE. If you ain't squatting, you aint training, and thats a maxim that holds true my friend – so does the maxim of “if you squat, I dont care what else you do”, youre going to GROW! Increased lower back strength without doing a single exercise for the lower back, the squat taxes EVERYTHING when done right. Improved – VASTLY improved performance on all your upper body exercises, including pull-ups. (especially pull-ups, I should say). Perhaps the most amazing benefit of this sort of heavy duty LEG training is the indirect gains you see in GRIP Strength – writing this makes me feel literally light headed thinking about it, trust me on this one. You can forget about digestive issues like IBS, constipation, flatulence and such the general population is afflicted with – squats are the best medicine ever, natural, and you dont need no doctor for them either (and neither the bills, hehe). A sense of calmness and sang froid when you get good at this that will translate over into your daily life, work, relationships, all of it. Improved performance in the BEDROOM – especially when you combine squats with isometrics and pull-ups. You'll build mental focus and gumption like NOTHING else. A lot of lazy fools will tell you high rep squats are boring. When you hear that, think “ah, yes. They require FOCUS and dedication, so these idiots think it's boring!”. You'll build FEROCITY from the inside out like nothing else you've done before, you'll truly understand, comprehend the meaning of being a TRUE BEAST! And many, many more that I have not mentioned here as yet, but will as I go along. This course is worth its weight many times over in GOLD. And if you're IN ANY way serious, or even CLAIM to be serious about physical training done right, you'll want to get your mitts on this nigh invaluable course NOW. Just do it, my friend. NOW! Best, Rahul Mookerjee

All I know is that it did – and that my own life took a different path as a result. I was on my way home after a busy day – standing in the corner store trying to remember what I was meant to buy for the kids. As I called home to ask, What did you say I had to buy? I heard the beep of someone calling me. I'll call you right back, someone's calling me. It was a call from an unknown number. Even though I had had a busy day, I still answered the phone, Hello, FM Personal Trainer, how can I help you? Hi, I need help... Please! I could hear the sadness and despair in the voice. This was someone who really needed help! He says he has to lose weight and needs to see me immediately. It's late, and I try to schedule for another day, but he insists, and I can hear from his tone that he can't stand much delay. So I agree and start driving to the indicated location. He tells me that he'll wait in front of his house – and I won't miss him because he's so large. I call home again. I'll be there later, a new client has appeared, and I hear the displeasure in my wife's voice... When I reach the destination, I can see he was right – he is large! He's also young, probably less than 20. There are only two steps in front of the house and he's struggling to climb them, holding the door frame tightly to pull himself in. Let's call him Joe. Joe starts to tell me his story. He lists the multitude of diets he has tried and the failed attempts to exercise. I understand him. I was like this once... Finally, he tells me resignedly: It's genetic, there's nothing I can do, I think I have to live with it. Before I can contradict him, his mother comes into the room, carrying a stack of beautifully washed and ironed shirts which she puts carefully into a bag, saying, "I have prepared your work clothes for tomorrow." Then with a gentle smile, she says to me, He inherited it from me. I have morbid obesity. She gives me the list of problems that she has. She can't even stand for long and spends most of her time sitting in a wheelchair. I am curious about the shirts and ask what work Joe is doing. I pack vegetables, but because I sweat a lot, I have to change every 2 hours otherwise I get cold. I really can't afford to get sick and stay at home. I have two younger brothers who go to school, and there's my mom who is sick. So I have to work. I use five T-shirts a day, but it's okay, I'm used to it." I completely forget about the busy day and my fatigue. I start pouring out information that will help him lose weight. I want to – I have to – help him. I begin to explain, one after the other, all the mistakes he has made, how he lost muscle mass through starvation, why he does not lose weight even if he eats very little, the role of hormones, why diets are not effective, the health benefits of losing weight ..... but then I realize this is way too much information all at once. All right, here's what we'll do. Tell me what you like to eat, and I'll create a nutritional plan for you. From tomorrow you will start to eat as we planned, and gradually I will explain to you everything you need to know so that for the rest of your life you'll understand the principles of a fit and healthy body. I see the hope in his eyes and a determination to succeed even if he doesn't yet understand much about what he should do. He's confident again, and I can feel his excitement! Suddenly the sadness returns. The problem is that from next week we move to another city. The company I work for has seasonal vegetable warehouses, and the vegetable season here will end this week. I really want to do this, but it looks like I'm going to fail again before I start. How many weeks of counselling should I have with you, and how much does it cost? I know a personal trainer is quite expensive and I don't know

if... I try to stop him. This is not about money. He insists and takes cash from his pocket to pay me, but I really can't take the money... I literally can't! I feel like I need some fresh air. I say goodbye in a hurry. I get in the car and I actually feel overwhelmed by sadness, compassion, but also admiration for his determination to take on responsibilities for his family and to keep looking for a solution for his own health problems. He's got to make it; he's got to do it! I promise myself I'll do everything I can to help him and find a way to advise him even if he's far away. I get home and the kids are all over me, wanting to know why I am late. I can't talk about it... So that's how it started. That night I worked to sort out his nutritional plan and to find a solution for the future. From the next day, he started eating according to my nutritional plan. And I started writing every night - chapter after chapter covering absolutely everything that he needed to know to get results. He left the city, and at the end of every week I sent him a new chapter. I was working during the day doing workouts and providing nutritional advice as usual, but I couldn't wait to get home so I could write some more. After the first month, he had lost a good few pounds and his self-confidence had grown enormously. He started posting pictures of himself □ (His previous profile picture was of a wild horse). After almost three months he had dropped multiple clothing sizes and was increasing the intensity of his exercises. He sent me a message: Guess what? I have a girlfriend. I knew how much it meant to him, and I was so happy. He'd lost some weight, his clothes fitted him – but this is what was really important: his self-esteem and self-confidence were growing, and he was making a huge difference to his overall health. Meanwhile, his willpower and determination to stick to the nutritional plan and the training programme despite being so far from me, his personal trainer, inspired me to write my first book on nutrition and training. I collected all the chapters I had written and linked and improved them, even adding demonstration videos with workouts that could easily be done at home. I wouldn't have thought of writing a book before, but sometimes when you believe you are inspiring and helping someone else, you actually get inspired and help yourself. I sent Joe the first copy of my book and can only thank him for allowing me to meet him and help him. Today I want to share with you everything I wrote over this time. I know that if you are like Joe, you can learn everything you need from my book and you can apply it, wherever you are. I'd be so happy to add you to my list of distance clients who have had impressive results. Florin Mihai - Personal Trainer

Hip Belt Squats - The Anabolic Equalizer Dennis B. Weis, 2021-12-09 Dennis B. Weis is a Ketchikan, Alaska-based power/bodybuilder.

He is a hard-hitting, uncompromising freelance professional writer and investigative research consultant in the fields of bodybuilding, nutrition, physiology, and powerlifting. Dennis was first published over for decades ago (1976) in the pages of Iron Man magazine. Since that time he has become known to almost every mainstream bodybuilding/physique magazine's readership throughout the United States and Europe. The magazines that publish his articles include and are not limited to Bodybuilding Monthly (U.K. publication), Exercise For Men Only, Hardgainer (Nicosia, Cyprus, publication), Iron Man, Muscle & Fitness, Muscle Mag International and Natural Bodybuilding & Fitness. Hip-belt squats are a unique exercise that first caught my attention through two published articles by John McCallum in the March and April, 1970 issues of Strength & Health magazine. At that time, I, along with a whole bunch of other bodybuilders, didn't realize the impact that this exercise could have as a natural anabolic muscle stimulator.

**Mastering the Squat** Richard Schuller, 2015-02-02 The author of this book, Richard Schuller, has a career spanning 60 years of weight lifting, 25 of them as a national/international competitive powerlifter. He's loaded this book with information critical to lifters who want to maximize their strength and power. Becoming an advanced or elite lifter requires perfect technique, all steps of which are covered in this book. He includes subjects often overlooked by the inexperienced lifter: planning for workouts, how to keep useful records, overtraining, recovering between sessions, and maintaining a winning mental approach. Advanced lifters understand that it's essential to change training programs on a regular basis to maintain progress. This book contains five unique training programs, each including a wide range of assistance exercises and equipment to accompany each squatting routine. Additional information is provided on lifting equipment, treatment of injuries, proper spotting techniques, and the author's Ten Rules for Developing Strength A review from Amazon.com: This book is a gem! Lot's of useful details, clear and to the point. Great workout programs. Really, probably the most practical guide on squats written out there. I have read many books on squats and the majority...gloss over the techniques, even though it is always stated that the squat is the king of exercises; or get lost into many anatomical details. - Michael James Calderone

**Squat Every Day** Matt Perryman, 2013-04-16 What readers are saying... Anyone serious about strength needs to read this book. A MUST READ! If you're interested in more lean muscle, the biggest squat of your life, and unbreakable mental toughness even outside of the gym... but you're always frustrated by the 'same old' advice that never seems to move you ahead... you'll want to keep reading. The title is no lie. Yes, you really can squat every day. No, it won't put you on the train to Snap City. But first, beware: This isn't your average how to lift weights book. There's no cookie-cutter programs that look just like the programs in every other exercise book you've bought before. What you'll find inside are little-known strategies used by the world's top weightlifters and strongmen to blow past world records. And they do it by ignoring everything you've ever been told about how your body responds to weight training. Even the experts who hate it in public secretly admire and follow the advice inside Squat Every Day. Inside, you'll discover: \* The lies you've been told

about recovery. Learn why your body won't fall apart if you put it under pressure (and what key ingredient you leave out of your training if you don't push it hard enough) \* Why your mindset and mental attitude are more important than any workout you do. (If you've ever wondered why you aren't making progress, you might be shocked at how important this is... but hardly anybody talks about it in detail.) \* The difference between beginners and advanced strength athletes that nobody wants to talk about (and it's NOT illegal performance enhancing chemicals) \* The real story behind the insane workouts of the Bulgarian weightlifting team and how you can make them work for you... even if you've got a full-time job and a life outside the gym. \* The one variable that almost nobody keeps track of... and why it might be the most important part of your workout (Hint: It has nothing to do with how many sets and reps you do or even how much weight is on the bar). If you're looking for the magic pill, I'll be blunt: You should give this book a pass. I'd rather you not read it if you are impatient, uncooperative, and unteachable. If you don't have the right attitude, this isn't for you. But if you're willing to learn... and you're ready to make the jump to the next level... what's in this book can have you setting PRs in as little as a few days. If you're ready to join the thousands of men and women who have made the best gains of their life, grab your copy right now.

**HWPO** Mat Fraser,Spenser Mestel,2022-01-11 NATIONAL BESTSELLER • Transform your body and mind with the definitive guide to building peak strength, endurance, and speed, from the five-time CrossFit Games champion and Fittest Man on Earth No matter your level of fitness, no matter if you've never attempted CrossFit before, this book is your total training manual. Mat Fraser is undisputedly the fittest man in CrossFit history for winning the CrossFit Games an unprecedented five times. A student of engineering, Fraser optimized his body like a machine, and his absolute dedication to the training program he designed for himself is now legendary. For years, every single decision he made was weighed against the question: Will this help me win? If the answer was no, he didn't do it. If it would give him even the slightest edge or advantage, he would—no matter the cost. Fraser became a master of identifying his weaknesses and then seeking out training methods to improve them, and he's idolized in the fitness community for his relentless pursuit of peak performance. It's not hard to see why he achieved so much success—but how is a different question. Throughout his career, Fraser has been highly guarded about his specific training techniques (after all, sharing them would not help him win the CrossFit Games). But with his recent retirement from competition, Fraser is finally ready to open up about his path to the podium. HWPO reveals the workouts, training hacks, eating plans, and mental strategies that have helped make him a champion. It's an incredible resource of elite training strategies, illustrated workouts, and motivational stories, and it's a glimpse into the mind of one of the world's greatest athletes.
