Blade Gunner (Liquid Cool, Book 2) Austin Dragon,2018-04-30 BLADE GUNNER is the second novel of Liquid Cool--the action-packed (and funny), debut cyberpunk detective series. Who is Blade Gunner? In the next installment of the sci-fi/cyberpunk detective series, author Austin Dragon shows you when two forces of evil want to kill each other--get the hell out of the way! The Liquid Cool Series is the sci-fi classic, Blade Runner meets the Old Hollywood classic, Maltese Falcon. There is plenty of gritty action, suspense, thrills, and even a few laughs. It's the cyberpunk novel reimaged--an ever-rainy world of colossal skyscrapers, hover-cars, flashy neon streets, and futuristic mechanization. Metropolis isn't a bad place, but it isn't a good one either. Uber-governments and mega-corporations fight for control of the fifty-million-plus super-city, but so does crime. Sinister secret megacorporations. Savage Cyborg cults. And the Blade Gunner. How does Cruz, our private eye (and unlikely hero), solve this case--let alone survive? Off-worlders will do anything to stop the unknown man called Blade Gunner--even to blow up a supercity from space! The seedy spousal surveillance case doesn't look so bad after all, but it's too late to go back. You haven't read a cyberpunk novel like this. Welcome to the high-tech, low-life world of Liquid Cool.

**Site Reliability Engineering** Niall Richard Murphy,Betsy Beyer,Chris Jones,Jennifer Petoff,2016-03-23 The overwhelming majority of a software system's lifespan is spent in use, not in design or implementation. So, why does conventional wisdom insist that software engineers focus primarily on the design and development of large-scale computing systems? In this collection of essays and articles, key members of Google's Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain some of the largest software systems in the world. You'll learn the principles and practices that enable Google engineers to make systems more scalable, reliable, and efficient--lessons directly applicable to your organization. This book is divided into four sections: Introduction--Learn what site reliability engineering is and why it differs from conventional IT industry practices Principles--Examine the patterns, behaviors, and areas of concern that influence the work of a site reliability engineer (SRE) Practices--Understand the theory and practice of an SRE's day-to-day work: building and operating large distributed computing systems Management--Explore Google's best practices for training, communication, and meetings that your organization can use

**Gorilla Beach** Nicole "Snooki" Polizzi,2012-05-15 When you're this smokin', winning is a shore thing. . . . Jersey's sexiest guidettes are back for another scandalous summer at the Shore, and this time, Giovanna "Gia" Spumanti and Isabella "Bella" Rizzoli are raising the stakes to find thrills and hot gorillas--unemployment, douchebag exes, family drama, and dingy apartment be damned! But when the girls unknowingly cross an overprotective mafiosa mama, all bets are off. Booted from Seaside Heights for good, the spunky, sequined meatball and her sensitive, quiet cousin are forced to flee to Atlantic City. Their escort out of hell is Fredo, a weird and scrawny but hooked-up club manager from a prominent family, whose master plan is to pimp out Gia's psychic gifts at the roulette tables. Suddenly, it's raining benjamins for the coiffed and tanned threesome. Top-shelf tequila and seafood dinners are not all they're scoring. Bella snags a pale but talented boardwalk artist, Gia hooks up with a high-stakes poker hottie, and with Gia's coaching, Fredo just might have a chance at becoming a certified juicehead. Or, at least, a gorilla-in-training. But when the casino suspects cheating, the trio is hounded by haters and tricksters determined to sabotage their endless summer. With hearts and loot on the line, losing is not a chance the crew can take. This time, the house isn't going to win. . . .

*Making Space for the River* Jeroen Frank Warner,Arwin van Buuren,Jurian Edelenbos,2012-11-01 This book examines recent developments in river (flood) management from the viewpoint of Making Space for the River and the resulting challenges for water governance.

Different examples from Europe and the United States of America are discussed that aim to 'green' rivers, including increasing river discharge for flood management, enhancing natural and landscape values, promoting local or regional economic development, and urban regeneration. Making Space for the River presents not only opportunities and synergies but also risks as it crosses established institutional boundaries and touches on multiple stakeholder interests, which can easily clash. Making Space for the River helps the reader to understand the policy and governance dynamics that lead to these tensions and pays attention to a variety of attempts to organize effective and legitimate governance approaches. The book helps to realize connections between policy domains, problem frames, and goals of different actors at different levels that contribute to decisive and legitimate action. Making Space for the River has an international comparative character that sheds light upon both the country-specific governance dilemmas which relate to specific state traditions and institutional characteristics of national water management, but also uncovers interesting similarities which provide us with building blocks to formulate more generic lessons about the governance of Making Space for the River in different institutional and social contexts. The authors of this book come from a variety of disciplines including public administration, town and country planning, geography and anthropology, and these different disciplines bring multiple ways of knowing and understanding of Making Space for the River programs. The book combines interdisciplinary scientific analyses of Space for the River projects and programs with practical knowing and lessons-drawing. Making Space for the River is written for both practitioners and scholars and students of environmental policy, spatial planning, land use and water management. Editors: Jeroen Warner, Assistant Professor of Disaster Studies, Wageningen University, The Netherlands. Arwin van Buuren, Associate Professor of Public Administration, Erasmus University Rotterdam, The Netherlands. Jurian Edelenbos, Professor of Public Administration, Erasmus University Rotterdam, The Netherlands.

**A Discipline of Multiprogramming** Jayadev Misra, 2001-06-26 In this book, a programming model is developed that addresses the fundamental issues of 'large-scale programming'. The approach unifies several concepts from database theory, object-oriented programming and designs of reactive systems. The model and the associated theory has been christened Seuss. The major goal of Seuss is to simplify multiprogramming. To this end, the concern of concurrent implementation is separated from the core program design problem. A program execution is understood as a single thread of control - sequential executions of actions that are chosen according to some scheduling policy. As a consequence, it is possible to reason about the properties of a program from its single execution thread.

**CRC Handbook of Metal Etchants** Perrin Walker, William H. Tarn, 1990-12-11 This publication presents cleaning and etching solutions, their applications, and results on inorganic materials. It is a comprehensive collection of etching and cleaning solutions in a single source. Chemical formulas are presented in one of three standard formats - general, electrolytic or ionized gas formats - to insure inclusion of all necessary operational data as shown in references that accompany each numbered formula. The book describes other applications of specific solutions, including their use on other metals or metallic compounds. Physical properties, association of natural and man-made minerals, and materials are shown in relationship to crystal structure, special processing techniques and solid state devices and assemblies fabricated. This publication also presents a number of organic materials which are widely used in handling and general processing...waxes, plastics, and lacquers for example. *Computer Applications in Near Net-Shape Operations* Andrew Y.C. Nee, Soh K. Ong, Yun G. Wang, 2012-12-06 Having edited *Journal of Materials Processing Technology* (previously entitled *Journal of Mechanical Working Technology*) for close on 25 years, I have seen the many dramatic changes that have occurred in the materials processing field. Long gone are the days when the only materials processing carried out was virtually the forming of conventional metals and alloys, and when the development of a new product or process in a great number of cases called for several months of repetitive trial-and-error, with many (mostly intuition- or experience-based) expensive and time-consuming modifications being made to the dies, until success was achieved. Even when a 'successful' product was formed, its mechanical properties, in terms of springback and dimensional accuracy, thickness variations, residual stresses, surface finish, etc. , remained to be determined. Bulk-forming operations usually required expensive machining to be carried out on the product to impart the required dimensional accuracy and surface finish. Over the years, the experience-based craft of metal forming has given way to the science of materials processing. With the use of the computer, forming operations can be simulated with accuracy, to determine the best forming route and the associated forming loads and die stresses, and to predict the mechanical properties of the formed product, even down to its surface texture.
