Travels with St. Mark: GPS for the Journey Eugene E. Lemcio, 2012-09-25 Not a reference tool, this unique work is a teaching-learning guide to studying the earliest Gospel. The focus is on showing how rather than on telling what. Maps followed by leading questions and statements help both faculty and students to see how the Evangelist adopted and adapted his sacred texts (as well as Jewish and Greco-Roman resources) in light of his convictions about and experience of Jesus. Noticing the dominance of words and themes leads one to discover the primary concerns of the Author and his readers. Observing how St. Mark internally arranged his materials provides a clue as to the kind of work it is and how it was meant to function.

**Via Ferratas of the French Alps** Richard Miller, 2014-01-17 The 66 via ferrata routes in this guidebook are grouped by area - Geneva and the Northern Alps, Chambery, the Tarentaise and Maurienne valleys, Grenoble and Briançon - and run the full gamut of challenge, from very easy, protected routes suitable for children, through to extremely exposed and technical routes for

experienced ferratists only. Routes are illustrated by topo diagrams on colour photographs, and simple sketch maps. Those used to the older Italian routes will find these French routes quite different, closer to scrambling or rock climbing and often seeking out the most vertigo-inducing terrain. But most routes should be within the reach of any strong hillwalker and protection is high and well maintained. Recent years have witnessed a surge in the number of via ferrata routes set up in the iconic mountains of the French Alps. With routes set on or near many classics including the massifs of Mont Blanc, the Vanoise and the Queyras, this guide shows the best of what is now available.

**Locating Visual-Material Rhetorics** Amy Prosen, 2012-01-03 Parks, maps, and mapping technologies like the GPS are objects of visual and material culture that rely on the interplay of text, context, image, and space to guide our interpretations of the world around us. **LOCATING VISUAL-MATERIAL RHETORICS: THE MAP, THE MILL, AND THE GPS** examines in depth, and in several contemporary settings, how visual and material discursive artifacts, when understood as rhetorical, shape our understanding of the unique cultural moments that these artifacts set out to represent.

The Map Reader Martin Dodge, Rob Kitchin, Chris Perkins, 2011-05-09 **WINNER OF THE CANTEMIR PRIZE 2012** awarded by the Berendel Foundation The Map Reader brings together, for the first time, classic and hard-to-find articles on mapping. This book provides a wide-ranging and coherent edited compendium of key scholarly writing about the changing nature of cartography over the last half century. The editorial selection of fifty-four theoretical and thought provoking texts demonstrates how cartography works as a powerful representational form and explores how different mapping practices have been conceptualised in particular scholarly contexts. Themes covered include paradigms, politics, people, aesthetics and technology. Original interpretative essays set the literature into

intellectual context within these themes. Excerpts are drawn from leading scholars and researchers in a range of cognate fields including: Cartography, Geography, Anthropology, Architecture, Engineering, Computer Science and Graphic Design. The Map Reader provides a new unique single source reference to the essential literature in the cartographic field: more than fifty specially edited excerpts from key, classic articles and monographs critical introductions by experienced experts in the field focused coverage of key mapping practices, techniques and ideas a valuable resource suited to a broad spectrum of researchers and students working in cartography and GIScience, geography, the social sciences, media studies, and visual arts full page colour illustrations of significant maps as provocative visual 'think-pieces' fully indexed, clearly structured and accessible ways into a fast changing field of cartographic research

Somme 100th Anniversary Tonie Holt,Valmai Holt,2016-06-30 The 100th Anniversary of the most publically aware battle of WW1 - the battle of the Somme, will be on 1 July 2016 and every media form will be covering it from January onwards. The book has taken 20 years to mature from its first edition to this new 'Definitive' edition, the Seventh, each time being updated and expanded. It is a legacy that should be on every bookshelf.The book is based upon over 30 years of traveling and writing about battlefields by two people - Major and Mrs Holt - who are credited with having started the modern era of battlefield tours - and were awarded the Somme Centenary Medal for their work in 'opening the doors to the battlefields' with their books.This Guide Book is MORE than a guide book - Sir Martin Gilbert said, ' the Holts have raised the Guide Book to a new high level,' and ' the golden thread that runs through it (the previous Somme Guide) - is the focus that the Holts give to the stories of individuals'. It will therefore appeal both to General and to Specialist readers whether they travel to the battlefields or not.This is not merely a guide book, nor a history book, but it is brimming with human interest stories of veterans' experiences, tales of bravery, comradeship, natural terror, literary illusions to poets who experienced the battles (such a Owen & Sassoon, Seeger and Sorley) ...If you buy just one book about the Battle of the Somme, this is the one that you should have, written by those who know the area and the battlefield better even than the French themselves, and who tell its story from both humanistic and military standpoints

**Explorer's Guide Louisiana (Explorer's Complete)** Cynthia Campbell, 2012-05-29 A comprehensive travel guide to Louisiana, with maps and information on hotels and restaurants, shopping and entertainment, and other interesting sites.

Animal Thinking Randolph Menzel, Julia Fischer, 2011-11-04 Experts from psychology, neuroscience, philosophy, ecology, and evolutionary biology assess the field of animal cognition. Do animals have cognitive maps? Do they possess knowledge? Do they plan for the future? Do they understand that others have mental lives of their own? This volume provides a state-of-the-art assessment of animal cognition, with experts from psychology, neuroscience, philosophy, ecology, and evolutionary biology addressing these questions in an integrative fashion. It summarizes the latest research, identifies areas where consensus has been reached, and takes on current controversies. Over the last thirty years, the field has shifted from the collection of anecdotes and the pursuit of the subjective experience of animals to a rigorous, hypothesis-driven experimental approach. Taking a skeptical stance, this volume stresses the notion that in many cases relatively simple rules may account for rather complex and flexible behaviors. The book critically evaluates current concepts and puts a strong focus on the psychological mechanisms that underpin animal behavior. It offers comparative analyses that reveal common principles as well as adaptations that evolved in particular species in response to specific selective pressures. It assesses experimental approaches to the study of animal navigation, decision making, social cognition, and communication and suggests directions for future research. The book promotes a research program that seeks to understand animals' cognitive abilities and behavioral routines as individuals and as members of social groups.
