Background Report on Extending Bank Powers to Include Light Vehicle

Leasing DesRosiers Automotive Consultants, Task Force on the Future of the Canadian Financial Services Sector, 1998 This report begins with discussion of the controversy surrounding the desire by banks to enter the light vehicle leasing business. This is followed by a review of the structure of the Canadian automotive sector, the characteristics of two vehicle sales markets (fleet and retail), the types of automotive financing products available including loans and leases, the players involved in the Canadian automotive finance market, and financing trends in the total vehicle market. Leasing issues, including those related to bank involvement, are then discussed, including regulation of leasing by banks, the economics of leasing versus loans, disclosure issues, end-of-lease issues, and the advantages and drawbacks of leasing for the automobile sector. The next two chapters present detailed arguments against and for extending bank powers to leasing. Finally, the United States experience with bank leasing is reviewed. Appendices include information on financing trends in the fleet and retail vehicle markets, a summary of the positions of the various stakeholders, and a research report on vehicle lease data in Canada and the US.

Serious Play Monica Obniski, Darrin Alfred, 2018-01-01 A lively exploration of eclecticism, playfulness, and whimsy in American postwar design, including architecture, graphic design, and product design This spirited volume shows how postwar designers embraced whimsy and eclecticism in their work, exploring playfulness as an essential construct of modernity. Following World War II, Americans began accumulating more and more goods, spurring a transformation in the field of interior decoration. Storage walls became ubiquitous, often serving as a home's centerpiece. Designers such as Alexander Girard encouraged homeowners to populate their new shelving units with folk art, as well as unconventional and modern objects, to produce innovative and unexpected juxtapositions within modern architectural settings. Playfulness can be seen in the colorful, child-sized furniture by Charles and Ray Eames, who also produced toys. And in the postwar corporate world, the concept of play is manifested in the influential advertising work of Paul Rand. Set against the backdrop of a society that was experiencing rapid change and high anxiety, *Serious Play* takes a revelatory look at how many of the country's leading designers connected with their audience through wit and imagination.

Learn to Earn Peter Lynch,John Rothchild,2012-11-27 Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren't taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald's, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven't changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.

Lemon-Aid New Cars and Trucks 2012 Phil Edmonston, 2011-01-01 Phil Edmonston, Canada's automotive Dr. Phil, pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, rodent snack wiring, and mind-boggling depreciation) Many 2011-12 automobiles have chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and administrative charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 handling charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Brand New Justice Simon Anholt, 2006-08-11 Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he

demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.
