Building a crew of mech drivers isn't easy. So of course that is exactly what Breaker needs to solve a deadly mystery and stop a galactic war. The attrition during recruit training can reach ninety percent for those who pass the initial tryout. Still on the move and in search of answers that could doom the Alliance of Planets, Benjamin Wrath and his APOP crew must scrape up candidates from the villainous, disreputable spaceports along the way. What could possibly go wrong? Everything is on the line now. When they rescue children stolen by a mysterious new threat, the countdown to the invasion they've tried to stop accelerates. At the end of the day, their enemies won't be who or what they expected. Experience the third entry in the ongoing Galactic Shield series by Dragon Award nominee and USA Today Bestseller J.N. Chaney and author Scott Moon.

Master Defenders 3 Matt Bhanks,2018-06-04 Canavin and the Master Defenders have become a renowned alliance for all humans and moral Pixalians to embrace. With the fall of a group of assassins just over two years ago, the team of heroes have since been focusing their attention on one hundred extremist bases that continue the corrupt code. As the heroes are determined to confront a dreaded mobster, an ancient legend is set to make history on the world. An enigmatic portal, believed to be the answer to the problems of all life-forms, becomes the focal point for Canavin's team among other alliances. And as this portal is an attraction for various humans and Pixalians, the sole way to locate it is with a map that only the greatest travelers can interpret. Canavin's team is strongminded to understand the map as it has intrigued the members of a reawakened faction of shadows. There are opposing goals for the portal as creatures of many races gather together to uncover its secrets, confident to use it for malicious purposes. Time is rapidly slipping away, and the Master Defenders must stay united as a 'shield' in order to challenge the other factions and obtain a hopeful future for all nations. The Negro Leagues Chronology Christopher Hauser,2015-07-11 Painstakingly researched and documented, this volume is a comprehensive, year-by-year reference work giving important—yet often obscure—dates in Negro League history. From the Negro Leagues' organized beginning in 1920 through their steep decline immediately after Jackie Robinson's 1947 breaking of the color barrier, entries cover league meetings, noteworthy

games, the commentary of columnists, and important events on and off the field. Controversies that defined the experience of black baseball organizers—such as player rights disputes, failure to adhere to league schedules and violations of league rules—are also included here.

Black Baseball and Chicago Leslie A.

Heaphy, 2006-07-05 Founded in 1920, the Negro National League originally comprised teams throughout the Midwest, but the league's groundwork was laid in one city--Chicago. Two of the season's eight inaugural teams were based in the South Side, which was also the adopted home of Rube Foster, the Father of the Negro Leagues. A former stand-out pitcher in the Windy City, Foster founded the dominant Chicago American Giants. As the first president of the Negro National League, Foster controlled all major aspects of the game, from personnel to equipment and ticket sales, and his influence left black baseball indelibly associated with Chicago. This essay collection presents notable papers delivered at the 2005 Jerry Malloy Negro League Conference in Chicago. With contributions from many Negro Leagues experts, the work offers a cohesive history of Chicago's long relationship with black baseball. After an introduction and an overview, sections cover early Chicago baseball from the nineteenth century to the founding of the Negro Leagues; teams in the Negro Leagues after 1920; players, both well-known and obscure, who spent significant time with Chicago clubs; owners and managers; the East-West All Star Game; ballparks; the Great Lakes Naval Team; and the integration of the Cubs and White Sox. Appendices provide a timeline of major black-baseball events in Chicago and player rosters for Chicago-area teams.

Star Defenders Justin Sloan, 2020-01-15 With new alliances and powers beyond comprehension, our team seems unstoppable. That is, until they uncover the reason so much of our past has been buried. Shrina went from FBI to kickass demi-dragon, but a new power is rising and it's up to her to stop it. In space, Espinoza and his team have a new world to explore, while Trent has brought the intergalactic war to new levels. Will Shrina be able to stand against the risen dragon? How do the Goldies and their hosts play into the ultimate war for the universe's fate? Will Trent be able to rally an alien army to stand against the Exiles? The third book in the Ascension Gate series. Perfect for fans of Mass Effect, Stargate SG-1, and Pern.

Query Understanding for Search Engines Yi Chang, Hongbo Deng, 2020-12-01 This book presents a systematic study of practices and theories for query understanding of search engines. These studies can be categorized into three major classes. The first class is to figure out what the searcher wants by extracting semantic meaning from the searcher's keywords, such as query classification, query tagging, and query intent understanding. The second class is to analyze search queries and then translate them into an enhanced query that can produce better search results, such as query spelling correction or query rewriting. The third class is to assist users in refining or suggesting queries in order to reduce users' search effort and satisfy their information needs, such as query auto-completion and query suggestion. Query understanding is a fundamental part of search engines. It is responsible to precisely infer the intent of the query formulated by the search user, to correct spelling errors in his/her query, to reformulate the query to capture its intent more accurately, and to guide the user in formulating a query with precise intent. The book will be

invaluable to researchers and graduate students in computer or information science and specializing in information retrieval or web-based systems, as well as to researchers and programmers working on the development or improvement of products related to search engines.
