**Scientific Star and Planet Locator** Chaisson, Edmund Scientific, Edmund Scientific Staff, 2002-08 This famous rotating roadmap of the heavens shows the location of the stars, constellations, and planets relative to the horizon for the exact hour and date you determine. This 8-inch square star chart was plotted by the late astronomer and cartographer George Lovi. The reverse side of the locator is packed with additional data on the planets, meteor showers, and bright stars. Included with each star chart is a 16-page, fully-illustrated, pocket-size instruction booklet.

**Star Finder!** DK, 2017-10-10 A novel approach to stargazing, this stunning space book features step-by-step guides to identifying the key constellations across the northern hemisphere. What do you see when you look up into the sky? Have you ever wondered what the stars mean? Or how they are connected? Or what each constellation is called? If so, then this may be the book for you! Little stargazers will enjoy paging through this awe-inspiring astronomy book and learning all about the constellations, their forms, shapes, and stories. This stunning space book for kids explores different groups of stars specific to the Northern Hemisphere, with step-by-step guides to identifying key constellations, star-spotting, and planet spotting! Sprinkled with stardust on every page, budding stargazers aged 9 and over can explore: - A glow-in-the-dark night-sky viewer included with the book - How to follow pathfinder stars to locate constellations - Crystal clear diagrams and illustrations - Easy-to-read maps - Fact panels that explain constellations and space science - The final spread of each chapter shows all the stars in the sky with constellations unmarked so that readers can practice star-hopping - Profiles of galaxies and nebulae in the night sky **Star Finder!** is packed with high-quality imagery, maps of constellations, and tips to spot stars and patterns, to keep the kids enthralled, engaged and inspired. Discover striking pictures of the night sky in this amazing astronomy book for children. The innovative step-by-step approach to learning the key features of the night sky and compelling, easy-to-understand graphic style makes for the beginning of a keen interest in astronomy. This compelling guide on constellations for kids also covers planets, spotting nebulae, the Milky Way, shooting stars and more. A must-have volume for budding astronomers aged 9+, the informative and accessible guides featured throughout provide crystal clear instructions on recognising the constellations one by one, as well as pronunciation aids to some of the complex constellation names, and also featuring practice star maps for each season, so curious kids will find it easier than ever to navigate the night sky!

*Terrestrial Planet Finder* C. A. Beichman, 1999

*A Child's Introduction to the Night Sky (Revised and Updated)* ,2019-09-17 This charming exploration of the night sky -- featuring a star finder and glow-in-the-dark stickers -- which has more than a quarter of a million young astronomers enjoying the night sky in countries around the world, is now completely revised and updated. *A Child's Introduction to the Night Sky* is the perfect introduction to the always fascinating world of astronomy. Children ages eight and up will find out what astronomers have learned (and are still discovering), what astronauts and scientists explore, and what they can find by gazing up into the sky at night. Author Michael Driscoll explains how stars are born, the achievements of the great scientists, the history of space exploration, the story of our solar system, the myths behind the constellations, how to navigate the night sky, and more. Whimsical color illustrations throughout and handy definitions and sidebars help engage younger readers and develop their interest. Also included are a nifty star finder tool and fun glow-in-the-dark stickers.

**Collins Star Finder Pack** Storm Dunlop, 2006-01-31 The multitude of stars in the sky can be confusing, but the Collins Star Finder Pack provides everything stargazers need to identify them correctly. The star finder is accompanied by a 32-page booklet explaining the best way to observe the night sky and also shows the positions of the planets for the next five years. 30 color illustrations.

**The Search for Life Continued** Barrie W. Jones, 2008-09-02 Barrie Jones addresses the question are we alone?, which is one of the most frequently asked questions by scientists and non-scientists alike. In The Search for Life Continued, this question is addressed scientifically, and the author is not afraid to include speculation. Indeed, the author believes beyond reasonable doubt that we are not alone and this belief is based firmly on frontier science of the most imaginative kind. The author concentrates on planetary systems beyond our own but starts with life on Earth, which is the only life we know to exist, and which provides guidance on how best to search for life elsewhere. Planets are the most likely abode of life and so we start the quest with the search for planets beyond the Solar System – exoplanets. The methods of searching are outlined and the nature of hundreds of exoplanetary systems so far discovered described. In the near future we expect to discover habitable Earth-like planets. But are they actually inhabited? How could we tell? All will be revealed. This full color book is written for everybody who wants to stay in close contact with the latest on possible life on other planets.

**Discover Planet Watch** Clint W. Hatchett, 1993-08-01 First in a series of high-quality science books for parents to use with children, this year-round viewing guide outlines activities designed to help amateur cosmologists learn more about the heavens. 75 illustrations. color insert. The Planet Factory Elizabeth Tasker, 2017-09-07 Forget about rockets to Mars – the future of space science lies with the search for exoplanets Twenty years ago, the search for planets outside the Solar System was the preserve of science-fiction writers. Now it's one of the fastest-growing fields in astronomy, with thousands of exoplanets discovered to date, and the number rising fast. These new-found worlds are more alien than anything in fiction. Planets larger than Jupiter with years lasting a week; others with two suns lighting their skies, or with no sun at all. Planets with diamond mantles supporting oceans of tar; possible Earth-sized worlds with split hemispheres of perpetual day and night; waterworlds drowning under global oceans and volcanic lava planets awash with seas of magma. The discovery of this diversity is just the beginning. There is a whole galaxy of possibilities. The Planet Factory tells the story of these exoplanets. What can we learn about these faraway surface environments and planetary atmospheres? And do the results hint at the tantalising possibility of alien life?
