To the Third Power Paul C. Larsen, 1995 Here's the inside story of sailing's most comprehensive test of resources, technology, tactics, and ingenuity. Never before has an America's Cup syndicate put such an emphasis on the use of science to design and build a racing yacht. Never before has the same scientific method been used to select and train a crew. Never before has such a de-emphasis been placed on the so-called rock stars of the sport. To the Third Power puts the reader inside the America³ compound, beside the testing tanks, next to the wind tunnels, and on board the fastest sailboats ever built. It provides a rare glimpse of the personalities and emotions that made up the 1992 defense of what has become yachting's Holy Grail.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Louisiana Richard Bizier, 1998-02-28 Louisiana presents an overview of the culture in the New World and Louisiana, including related literature, such as Longfellow's Evangeline. For the visitor, the state is divided into geographic regions such as New Orleans, the plantations, and Lafayette. For each area, tours, historic sites, and restaurants are described. The section on New Orleans celebrates the French Quarter and the local food and music. Outside of New Orleans are majestic plantations and beautiful bayous filled with cypress trees and hanging Spanish moss. Side trips from New Orleans allow visitors to sample some of the various musical tastes of the Bayou State. Zydeco music may be found in Lafayette, while Cajun music may be heard throughout the southern part of the state. Special features include information on consulates, tourist offices, banks and currency exchanges, and maps which, among other things, show distances between cities. With Louisiana, anyone can pass a good time and learn how to let the good times roll, or, as the Cajuns say rouler.

New Orleans Bizier, Richard, Descriptions of all the attractions and a star rating system highlight entries of interest not to be missed interesting attractions.

Life in the U.S. Armed Forces Anni Baker, 2007-12-30 Anni Baker has created a fascinating exploration of life in the armed forces, as it has been experienced by millions of men, women, and children over the past six decades. Her book examines the factors that shape military service and military culture, from grueling training exercises to sexual relations with local women, from overseas duty to the peculiar life of the military brat. The book begins with an examination of the enlistment process, follows the military lifecycle through career decisions, promotions, raising families, and retirement, explores the impact of war on military society, and ends with a discussion of the place of the armed forces in the United States. A wide variety of sources were used in this study, including contemporary scholarship, government and military records, public media, and, most important, interviews and written materials from military personnel, retirees, family members, and civilian employees. Using a lively and readable style, Baker blends clear explanations of elements of military life, information on the development of military society, and the voices of those who serve into an insightful account of this fascinating subculture. It is the author's view that not only is study of the U.S. military a valuable undertaking in itself,

but in addition it will enrich our perspective on civilian life and culture in the United States. The military is a distinct society based on a set of common values that are sometimes, though not always, at odds with those of civilian society. The extent to which active duty personnel, family members and civilians internalize these values dictates their comfort with military life and their choice of a military career. Through a discussion of life in the military, Baker examines how the values, traditions and norms of the armed forces are articulated and shared, how they influence the individual and the institution, and what their role is in American society as a whole.

Universal Terrors, 1951-1955 Tom Weaver,David Schechter,Robert J. Kiss,2017-09-11 Universal Studios created the first cinematic universe of monsters--Dracula, Frankenstein, the Mummy and others became household names during the 1930s and 1940s. During the 1950s, more modern monsters were created for the Atomic Age, including one-eyed globes from outer space, mutants from the planet Metaluna, the Creature from the Black Lagoon, and the 100-foot

high horror known as Tarantula. This over-the-top history is the definitive retrospective on Universal's horror and science fiction movies of 1951-1955. Standing as a sequel to Tom Weaver, Michael Brunas and John Brunas's Universal Horrors (Second Edition, 2007), it covers eight films: The Strange Door, The Black Castle, It Came from Outer Space, Creature from the Black Lagoon, This Island Earth, Revenge of the Creature, Cult of the Cobra and Tarantula. Each receives a richly detailed critical analysis, day-by-day production history, interviews with filmmakers, release information, an essay on the score, and many photographs, including rare behind-the-scenes shots.
