Citizen Witnessing Stuart Allan,2013-04-03 What role can the ordinary citizen perform in news reporting? This question goes to the heart of current debates about citizen journalism, one of the most challenging issues confronting the news media today. In this timely and provocative book, Stuart Allan introduces the key concept of 'citizen witnessing' in order to rethink familiar assumptions underlying traditional distinctions between the 'amateur' and the 'professional' journalist. Particular attention is focused on the spontaneous actions of ordinary people - caught-up in crisis events transpiring around them - who feel compelled to participate in the making of news. In bearing witness to what they see, they engage in unique forms of journalistic activity, generating firsthand reportage - eyewitness accounts, video footage, digital photographs, Tweets, blog posts - frequently making a vital contribution to news coverage. Drawing on a wide range of examples to illustrate his argument, Allan considers citizen witnessing as a public service, showing how it can help to reinvigorate journalism's responsibilities within democratic cultures. This book is required reading for all students of journalism, digital media and society.

Review of Maritime Transport 2009 United Nations,2012 Against the background of a global financial crisis and economic downturn, growth in seaborne trade continued, albeit at a slower rate. Existing forecasts suggest that the outlook for seaborne trade is uncertain and that some challenging times lie ahead for shipping and international seaborne trade. These challenges are further compounded by other developments, including maritime security at sea and the need to address the climate change challenge. The Review of Maritime Transport examines trends in sea-borne trade and analyses the comparative performance of different geographic regions and countries. Every year, the Review of Maritime Transport gives attention to transport developments in a particular region. The focus in 2009 is on developments in Africa since 2006 when UNCTAD last reported on the region.

Business Ethics - A Philosophical and Behavioral Approach Christian A. Conrad,2022-06-13 In this textbook we examine the extent to which moral values play a role as productive forces for companies and the economy as a whole, and explores the effect of ethical and unethical behavior at both levels. We show how ethics improves productivity, and provide specific ethics tools for practical application for both students and managers. Stemming from an overall interdisciplinary approach, this textbook fills a gap in the literature on ethics in business. Following a textbook structure, we first derive knowledge from scientific studies that are relevant for students, and then summarize the results. We explain ethical assessment approaches, and then provide an ethical assessment of economic behavior using case studies. Roleplaying and games are used to explain the behavior of people in relation to ethics. The 2nd edition has been completely revised and expanded to include new findings from the behavioral sciences (psychology, social psychology, sociology and behavioral economics). In particular, the research on emotions, motivation and group behavior have given rise to many new impulses in business ethics. In addition, new case studies and new chapters were included, like Politics and Morality, Theories of Justice, Global Ethics, and Institutions as Solutions to Specific Game Situations (game theory). This book is important for students and researchers as well as policymakers and business executives due to its focus on applications.

Ethics in Information Technology George Walter Reynolds,2007 Ethics in Information Technology, Second Edition is a timely offering with updated and brand new coverage of topical issues that we encounter in the news every day such as file sharing, infringement of intellectual property, security risks, Internet crime, identity theft, employee surveillance, privacy, and compliance.

Public Diplomacy and the Politics of Uncertainty Pawel Surowiec,Ilan Manor,2020-10-26 This edited book explores the multi-layered relationships between public diplomacy and intensified uncertainties stemming from transnational political trends. It is the latest wave of political uncertainty that provides the background as well as yields evidence scrutinised by authors contributing to this book. The book argues that due to a state of perpetual crises, the simultaneity of diplomatic tensions and new digital modalities of power, international politics increasingly resembles a networked set of hyper-realities. Embracing multi-polar competition, superpowers such as Russia flex their muscles over their neighbours; celebrated 'success stories' of democratisation - Hungary, Poland and Czechia - move towards illiberal governance; old players of international politics such as Britain and America re-claim "greatness", while other states, like China, adapt expansionist foreign policy goals. The contributors to this book consider the different ways in which transnational political trends and digitalisation breed uncertainty and shape the practice of public diplomacy.

Social Media for Journalists Megan Knight,Clare Cook,2013-05-22 Untangles the jargon and sets out the route-map for how the social network can enable us to become major contributors to the multiplatform digital age. The right message, the right time - this is the right book for taking advantage of it all. - Jon Snow, Channel 4 News The essential guide to understanding and harnessing the tools of journalism today, Meagan Knight and Clare Cook show you how to master the enduring rules of good practice and the new techniques of social media. The book gives a thorough guide to principles and practice, including: How to find, write and break stories with social media An online journalism toolkit to get you started Using crowdsourcing to find and follow stories Getting on top of user-generated content The ins and outs of copyright and ethics Building your brand and making money The new economy of journalism and how to get ahead. More than a simple 'how-to' guide, this book takes you to the next level with its integration of theory and practice. It is a one-stop guide for students and practitioners of journalism.

Facebook Nation Newton Lee,2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation

that “Facebook is the most appalling spying machine that has ever been invented.” Facebook CEO Mark Zuckerberg once said, “We exist at the intersection of technology and social issues.” This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

People and Information Harold B. Pepinsky,2013-10-22 People and Information focuses on the problems in information-processing. The selection first takes a look at generalized information systems, including the composition of generalized information systems; initial quantification of information transfer; quantitative consideration of information transfer; and decision making. The text surveys the problems in management development training programs. Concerns include managerial role competence; rationales of management training programs; and role competence in a foreign environment. The book describes the relationship of sociology and attitude of everyday life, including research conducted on this concern. The text also focuses on the factors that affect data-processing system development. Applications of data-processing in the courts, restricted access, delay, and methodology are explained. The book also evaluates the relationship between information-processing and political thoughts and actions. The selection is a vital reference for readers interested in information-processing.

The Struggle for Democracy Edward S. Greenberg,2018 'The Struggle for Democracy' offers students the tools they need to critically analyze our political system and make judgments about how well our government works. Taking a fresh approach to common American government topics, authors Edward Greenberg and Benjamin Page provide an analytical framework for understanding how politics and government work, and encourage students to consider the questions 'How democratic are we?' and 'Can government do anything well?' In order to boost student engagement with key concepts, the 2016 Election Edition incorporates coverage of contemporary issues that dominate today's headlines, as well as the most up-to-date data. --from publisher's website.

Respawn Colin Milburn,2018-12-14 In Respawn Colin Milburn examines the connections between video games, hacking, and science fiction that galvanize technological activism and technological communities. Discussing a wide range of games, from Portal and Final Fantasy VII to Super Mario Sunshine and Shadow of the Colossus, Milburn illustrates how they impact the lives of gamers and non-gamers alike. They also serve as resources for critique, resistance, and insurgency, offering a space for players and hacktivist groups such as Anonymous to challenge obstinate systems and experiment with alternative futures. Providing an essential walkthrough guide to our digital culture and its high-tech controversies, Milburn shows how games and playable media spawn new modes of engagement in a computerized world.

Gatewatching Axel Bruns,2005 Gatewatching: Collaborative Online News Production is the first comprehensive study of the latest wave of online news publications. The book investigates the collaborative publishing models of key news Websites, ranging from the worldwide Indymedia network to the massively successful technology news site Slashdot, and further to the multitude of Weblogs that have emerged in recent years. Building on collaborative approaches borrowed from the open source software development community, this book illustrates how gatewatching provides an alternative to gatekeeping and other traditional journalistic models of reporting, and has enabled millions of users around the world to participate in the online news publishing process.

Bombay and Western India James Douglas,1893

Ukraine's Euromaidan David R. Marples,Frederick V. Mills,2014-04-01 The papers presented in this volume analyze the civil uprising known as Euromaidan that began in central Kyiv in late November 2013, when the Ukrainian president Viktor Yanukovych opted not to sign an Association Agreement with the European Union, and continued over the following months. The topics include the motivations and expectations of protesters, organized crime, nationalism, gender issues, mass media, the Russian language, and the impact of Euromaidan on Ukrainian politics as well as on the EU, Russia, and Belarus. An epilogue to the book looks at the aftermath, including the Russian annexation of Crimea and the creation of breakaway republics in the east, leading to full-scale conflict. The goal of the book is less to offer a definitive account than one that represents a variety of aspects of a mass movement that captivated world attention and led to the downfall of the Yanukovych presidency.
