Ensuring Quality Cancer Care Institute of Medicine and National Research Council,Commission on Life Sciences,Institute of Medicine,National Cancer Policy Board,1999-07-21 We all want to believe that when people get cancer, they will receive medical care of the highest quality. Even as new scientific breakthroughs are announced, though, many cancer patients may be getting the wrong care, too little care, or too much care, in the form of unnecessary procedures. How close is American medicine to the ideal of quality cancer care for every person with cancer? *Ensuring Quality Cancer Care* provides a comprehensive picture of how cancer care is delivered in our nation, from early detection to end-of-life issues. The National Cancer Policy Board defines quality care and recommends how to monitor, measure, and extend quality care to all people with cancer. Approaches to accountability in health care are reviewed. What keeps people from getting care? The book explains

how lack of medical coverage, social and economic status, patient beliefs, physician decision-making, and other factors can stand between the patient and the best possible care. The board explores how cancer care is shaped by the current focus on evidence-based medicine, the widespread adoption of managed care, where services are provided, and who provides care. Specific shortfalls in the care of breast and prostate cancer are identified. A status report on health services research is included. Ensuring Quality Cancer Care offers wide-ranging data and information in clear context. As the baby boomers approach the years when most cancer occurs, this timely volume will be of special interest to health policy makers, public and private healthcare purchasers, medical professionals, patient advocates, researchers, and people with cancer.

Black Skin, White Masks Frantz Fanon, 2017 *Black Skin, White Masks* is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at

the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

Complex Problem Solving Peter A. Frensch, Joachim Funke, 2014-04-04 This volume presents a state-of-the-science review of the most promising current European research -- and its historic roots of research -- on complex problem solving (CPS) in Europe. It is an attempt to close the knowledge gap among American scholars regarding the European approach to understanding CPS. Although most of the American researchers are well aware of the fact that CPS has been a very active research area in Europe for quite some time, they do not know any specifics about even the most important research. Part of the reason for this lack of knowledge is undoubtedly the fact that European researchers -- for the most part -- have been rather reluctant to publish their work in English-language journals. The

book concentrates on European research because the basic approach European scholars have taken to studying CPS is very different from one taken by North American researchers. Traditionally, American scholars have been studying CPS in natural domains -- physics, reading, writing, and chess playing -- concentrating primarily on exploring novice-expert differences and the acquisition of a complex skill. European scholars, in contrast, have been primarily concerned with problem solving behavior in artificially generated, mostly computerized, complex systems. While the American approach has the advantage of high external validity, the European approach has the advantage of system variables that can be systematically manipulated to reveal the effects of system parameters on CPS behavior. The two approaches are thus best viewed as complementing each other. This volume contains contributions from four European countries -- Sweden, Switzerland, Great Britain, and Germany. As such, it accurately represents the bulk of empirical research on CPS which has been conducted in Europe. An international cooperation started two years ago with the goal of bringing the European research on complex problem solving to the awareness of American scholars. A direct result

of that effort, the contributions to this book are both informative and comprehensive.

Structure and Interpretation of Computer Programs, second edition Harold Abelson, Gerald Jay Sussman, 1996-07-25 Structure and Interpretation of Computer Programs has had a dramatic impact on computer science curricula over the past decade. This long-awaited revision contains changes throughout the text. There are new implementations of most of the major programming systems in the book, including the interpreters and compilers, and the authors have incorporated many small changes that reflect their experience teaching the course at MIT since the first edition was published. A new theme has been introduced that emphasizes the central role played by different approaches to dealing with time in computational models: objects with state, concurrent programming, functional programming and lazy evaluation, and nondeterministic programming. There are new example sections on higher-order procedures in graphics and on applications of stream processing in numerical programming, and many new exercises. In addition, all the programs have been reworked to run in any Scheme implementation that adheres to the IEEE standard.

Quantitative Corpus Linguistics with R Stefan Th. Gries, 2009-03-04 The first textbook of its kind, **Quantitative Corpus Linguistics with R** demonstrates how to use the open source programming language R for corpus linguistic analyses. Computational and corpus linguists doing corpus work will find that R provides an enormous range of functions that currently require several programs to achieve – searching and processing corpora, arranging and outputting the results of corpus searches, statistical evaluation, and graphing.

A Pocket Guide to Writing in History Mary Lynn Rampolla, 2009-06-01 A portable and affordable reference tool, A Pocket Guide to Writing in History provides reading, writing, and research advice useful to students in all history courses. Concise yet comprehensive advice on approaching typical history assignments, developing critical reading skills, writing effective history papers, conducting research, using and documenting sources, and avoiding plagiarism -- enhanced with practical tips and examples throughout -- have made this slim reference a best-seller. Now in its sixth edition, the book offers more coverage of working with sources than ever before.

Excellence in Teacher Education Linda Darling-Hammond, Gary A. Griffin, Arthur E. Wise, 1992 This monograph examines issues that will shape teacher education programs in the future. Following a foreword by Robert M. McClure, the monograph is organized into three chapters. The first, *Perestroika and Professionalism: The Case for Restructuring Teacher Preparation* (Linda Darling-Hammond), focuses on changes wrought by school restructuring, i.e., the creation of learner-centered schools, and implications for changes in the teacher's role and consequently for teacher education. The second, *Learning from the 'New' Schools: Lessons for Teacher Education* (Gary A. Griffin), discusses school-level issues in restructuring, rethinking, and re-enacting teacher education. The final chapter, *The Case*

for Restructuring Teacher Preparation (Arthur E. Wise), espouses seven propositions to promote education reform: (1) intensive teacher education; (2) rigorous teacher certification and licensing standards; (3) increased teacher involvement in decision-making processes that affect how they teach; (4) teacher unions with a better balance between inherent responsibilities to protect members and long-term responsibility for advancing the profession; (5) teacher professionalism that demands an accountability system; (6) improved teachers' salaries and working conditions; and (7) more attention to the less fortunate of teachers' clientele. Welcome to Writing Workshop Lynne Dorfman, Stacey Shubitz, 2023-10-10 Stacey Shubitz and Lynne Dorfman welcome you to experience the writing workshop for the first time or in a new light with Welcome to Writing Workshop: Engaging Today's Students with a Model That Works . Through strategic routines, tips, resources, and short focused video clips, teachers can create the sights and

sounds of a thriving writing workshop where:• Both students and teachers are working authors• Students spend most of their time writing—not just learning about it• Student choice is encouraged to help create engaged writers, not compliant ones• Students are part of the formative assessment process• Students will look forward to writing time—not dread it.From explanations of writing process and writing traits to small-group strategy lessons and mini-lessons, this book will provide the know-how to feel confident and comfortable in the teaching of writers.

Professional Power and Skill Use in the 'Knowledge Economy' D.W. Livingstone,Tracey L. Adams,Peter Sawchuk,2021-05-25 This is the first analysis of professional classes, their differing job control and skill utilization. Professional employees especially face declining job control, diminishing use of skills and increasing barriers to continuing learning. The book is an original guide for further studies on professional classes, job design, and training.

Mind of Napoleon J. Christopher Herold,2016-07-26 This collection of written and spoken

statements of Napoleon serves not as an historical record or analysis, but as insight into the mind and character of a fascinating historical figure. It demonstrates the luminous strength and almost supernatural power of Napoleon's mind, displaying an exceptional energy in thought as well as action. The selections are edited and organized topically to offer a broad range of subjects—from “The Human Heart” to “The Art of War”—and to establish a coherent, unified pattern, providing a fresh perspective on the genius of Napoleon. The sources used fall into three categories: (1) Napoleon's writings, including autograph manuscripts and dictations of letters, orders, decisions, bulletins, proclamations, newspaper articles, memoirs, commentaries, etc.; (2) Napoleon's oral opinions as given at the Conseil d'Etat, including stenographic transcripts, official minutes, and unofficial notes taken by various councilors; (3) recorded conversations and reminiscences of Napoleon's contemporaries from about 1800 to 1821.

Cookery and Dining in Imperial Rome Apicius, 2019-11-20 *Cookery and Dining in Imperial Rome* by Apicius is the oldest known cookbook in existence. There are recipes for cooking fish and seafood,

game, chicken, pork, veal, and other domesticated animals and birds, for vegetable dishes, grains, beverages, and sauces; virtually the full range of cookery is covered. There are also methods for preserving food and revitalizing them in ways that are surprisingly still relevant.

Control and Grammar R.K. Larson, S. Iatridou, Utpal Lahiri, J. Higginbotham, 2013-03-09 The articles in this volume grew from papers presented at the workshop on control held at the Massachusetts Institute of Technology, March 1989. The work of the various authors comes at a moment in linguistic theory that is notable for two developments. First, there has been increasing involvement of syntactic theory in semantics and of semantic theory in syntax, with the result that the sorting of facts into syntactic and semantic has become a more complex and theory-laden affair. Second, there has been an enormous growth both in the breadth and depth of studies in languages other than English. Both of these developments have left their mark on the authors, directly and indirectly. They have also been responsible for the shifts that have given the key terminology its present range of application. In this introduction we discuss the background to the issues that were particularly prominent both at the

workshop and in the authors' final drafts. We also comment on the spirit of inquiry that they represent. Our goal is to provide some orientation to the specific contents of the essays and to supply material for reflection on a set of problems that will doubtless develop and deepen as rapidly in the foreseeable future as they have in the recent past.

Literature and Lives Allen Carey-Webb, 2001 Telling stories from secondary and college English classrooms, this book explores the new possibilities for teaching and learning generated by bringing together reader-response and cultural-studies approaches. The book connects William Shakespeare, Charles Dickens, Mark Twain, and other canonical figures to multicultural writers, popular culture, film, testimonial, politics, history, and issues relevant to contemporary youth. Each chapter contains brief explications of literary scholarship and theory, and each is followed by extensive annotated bibliographies of multicultural literature, approachable scholarship and theory, and relevant Internet sites. Each chapter also contains descriptions of classroom units and activities focusing on a particular theme, such as genocide, homelessness, race, gender, youth violence, (post)colonialism, class

relations, and censorship; and discussion of ways in which students often respond to such hot-button topics. Chapters in the book are: (1) A Course in Contemporary World Literature; (2) Teaching about Homelessness; (3) Genderizing the Curriculum: A Personal Journey; (4) Addressing the Youth Violence Crisis; (5) Shakespeare and the New Multicultural British and World Literatures; (6) Huckleberry Finn and the Issue of Race in Today's Classroom; (7) Testimonial, Autoethnography, and the Future of English; and (8) Conclusion. Contains approximately 350 references. Appendixes contain an email exchange between the author and a first year, inner-city teacher; a note to teachers on the truth of Rigoberta Menchu's testimonial; a brief account of philology; a 13-item annotated bibliography of readings in literary theory for English teachers; and lists of web sites exploring literary theory and cultural studies, supporting literature teaching, and for new teachers.
