*Contracts For Sale* Edward Izzi,2023 Embrace your enemies. When their bodies are found, you won't be a suspect... How would you like to hire the services of an elite group of professional assassins, who will accept the assignment of deleting your most horrific adversary, performing the perfect murder, without a trace? Chicago Sun-Times Reporter Paul Crawford is asked to investigate a series of recent murders he eventually calls the 'Houdini Victims'. He begins with the investigation of a corporate executive who vanishes from a parking garage in the Chicago Loop, without a trace. The most unusual fact about this crime is that there is no body, no DNA evidence, no surveillance cameras, and no fingerprints. It is quite obvious that this murder was done by a professional, and neither Crawford nor his Channel Eight reporter buddy, Chaz Rizzo, can figure out who it is. Mark Stelter, CEO of Eradication, Inc., has found a niche and a marketable demand for those who wish to eliminate their worst enemies. For the price of \$99,900, he has a stable of professional killers who can abduct any victim and make them disappear. With the help of his affiliate company, Eco-Green Environmental Consultants, he has the chemicals, the facilities, and the personnel to make any murder victim vanish without a trace. He conducts his covert corporation like any other corporate entity, with a board of directors meeting each month and dividend declarations to his shareholders. But when one of the directors attempts to resign, things start to get complicated. Stelter sends his killers to track down and assassinate the former shareholder. They use a unique apparatus called a 'bolito', instantaneously killing their victims. With a section in the director's contracts barring them from resigning and signing their own death warrants, the shareholders of Eradication Inc. are now getting nervous. Although they are making millions, the shareholders now realize that they are putting their lives at risk, and can only escape with their deaths. As the victims continue to vanish, Paul Crawford continues to investigate the environmental company and how they are connected to the recent Chicago murders. With the shareholders of Eradication Inc. wishing to resign and make a deal with the Chicago P.D., Mark Stelter struggles to keep his Board of Directors unified with an iron fist. It is now only a question of time, before either the reporters or the shareholders become the next vanishing victims of Eradication, Inc.

The Turn to Infrastructure in Internet Governance Francesca Musiani, Derrick L. Cogburn, Laura DeNardis, Nanette S. Levinson, 2016-03-02 This edited volume brings together experts from around the world to provide coverage and analysis of infrastructure's role in Internet governance, both now and in the future. Never in history have conflicts over Internet governance attracted such widespread attention. High-profile controversies include the disclosures about NSA surveillance by intelligence analyst Edward Snowden, controversy over a decision by the US government to relinquish its historic oversight of Internet names and numbers, and countless cybersecurity breaches involving unauthorized access to Internet users' personal data. Much of the Internet governance ecosystem—both technical architecture and coordinating institutions—is behind the scenes but increasingly carries significant public interest implications. An area once concealed in institutional and technological complexity is now rightly bracketed among other shared global issues—such as environmental protection and human rights—that have considerable global implications but are simply incongruous with national borders. This transformation into an era of global governance by Internet infrastructure presents a moment of opportunity for scholars to bring these politicized infrastructures to the foreground.

**Stealth** Peter Westwick, 2020 The story behind the technology that revolutionized both aeronautics, and the course of history. On a moonless night in January 1991, a dozen airplanes appeared in the skies over Baghdad. Or, rather, didn't appear. They arrived in the dark, their black outlines cloaking them from sight. More importantly, their odd, angular shapes, which made them look like flying origami, rendered them undetectable to Iraq's formidable air defenses. Stealth technology, developed during the decades before Desert Storm, had arrived. To American planners and strategists at the outset of the Cold War, this seemingly ultimate way to gain ascendance over the USSR was only a question. What if the United States could defend its airspace while at the same time send a plane through Soviet skies undetected? A craft with such capacity would have to be essentially invisible to radar - an apparently miraculous feat of physics and engineering. In *Stealth*, Peter Westwick unveils the process by which the impossible was achieved. At heart, *Stealth* is a tale of two aerospace companies, Lockheed and Northrop, and their fierce competition - with each other and with themselves - to obtain what was estimated one of the largest procurement contracts in history. Westwick's book fully explores the individual and collective ingenuity and determination required to make these planes and in the process provides a fresh view of the period leading up to the end of the Soviet Union. Taking into account the role of technology, as well as the art and science of physics and engineering, Westwick offers an engaging narrative, one that immerses readers in the race to produce a weapon that some thought might save the world, and which certainly changed it.

*Stealth War* Robert Spalding, 2019-10-01 China expert Robert Spalding reveals the shocking success China has had infiltrating American institutions and compromising our national security. The media often suggest that Russia poses the greatest threat to America's national security, but the real danger lies farther east. While those in power have been distracted and disorderly, China has waged a six-front war on America's economy, military, diplomacy, technology, education, and infrastructure--and they're winning. It's almost too late to undo the shocking, though nearly invisible, victories of the Chinese. In *Stealth War*, retired Air Force Brigadier General Robert Spalding reveals China's motives and secret attacks on the West. Chronicling how our leaders have failed to protect us over recent decades, he provides shocking evidence of some of China's most brilliant ploys, including: Placing Confucius Institutes in universities across the United States that serve to monitor and control Chinese students on campus and spread communist narratives to unsuspecting American students. Offering enormous sums to American experts who create investment funds that funnel technology to China. Signing a thirty-year agreement with the US that allows China to share peaceful nuclear technology, ensuring that they have access to American nuclear know-how. Spalding's concern isn't merely that America could lose its position on the world stage. More urgently, the Chinese Communist Party has a fundamental loathing of the legal protections America grants its people and seeks to create a world without those rights. Despite all the damage done so far, Spalding shows how it's still possible for the U.S. and the rest of the free world to combat--and win--China's stealth war.

**Stealth Conflicts** Virgil Hawkins,2016-12-05 Many of the world's deadliest conflicts are largely ignored - becoming off-the-radar 'stealth conflicts'. How can this be possible in a world with unprecedented levels of access to information, and unprecedented levels of attention and resources being devoted to foreign affairs? Virgil Hawkins reveals and explains the highly distorted and assimilated responses to foreign conflicts by major actors in the world. He examines the agenda-setting processes of policy makers, the media, the public and academics in relation to foreign conflicts. Using a vast array of detailed examples, he systematically unravels the internal dynamics and external influences experienced by these actors, and in so doing he brings the academic agenda into the loop of the conflict response agenda-setting process for the first time. With agenda-setting research tending to focus on the question of why a response to a particular event or issue occurred, this book furthers research by focusing equally on why a response did not occur. The volume is critically important in understanding why actors do and do not respond to foreign conflicts.
