Danish Shipping in the 21st Century Martin Jes Iversen, Jesper Buhl, 2020-05-06

Spurred by global macro-economic shifts, commercial and financial turbulence, as well as technological leaps in the early years of the new millennium, the Danish shipping industry has changed dramatically since the turn of the century. This book provides a new understanding of how rapid business environmental changes frame strategic choices and industry structures. The authors combine a conceptual chapter with three selected business history cases to apply a methodical approach to their study. Together, the five chapters unveil patterns in the development of Danish shipping which are historical and, at the same time, consider questions that address the present situation and the challenges of our time. In other words, this short book uses history for the purpose of understanding the present and to develop thinking for the future.

Maritime Economics 3e Martin Stopford, 2008-12-19 For 5000 years shipping has served the world economy and today it provides a sophisticated transport service to every part of the globe. Yet despite its economic complexity, shipping retains much of the competitive cut and thrust of the “perfect” market of classical economics. This blend of sophisticated logistics and larger than life entrepreneurs makes it a unique case study of classical economics in a modern setting. The enlarged and substantially rewritten *Maritime Economics* uses historical and theoretical analysis as the framework for a practical explanation of how shipping works today. Whilst retaining the structure of the second edition, its scope is widened to include: lessons from 5000 years of commercial shipping history shipping cycles back to 1741, with a year by year commentary updated chapters on markets; shipping costs; accounts; ship finance and a new chapter on the return on capital new chapters on the geography of sea trade; trade theory and specialised cargoes updated chapters on the merchant fleet shipbuilding, recycling and the regulatory regime a much revised chapter on the challenges and pitfalls of forecasting. With over 800 pages, 200 illustrations, maps, technical drawings and tables *Maritime Economics* is the shipping industry’s most comprehensive text and reference source, whilst remaining as one reviewer put it “a very readable book”. Martin Stopford has enjoyed a distinguished career in the shipping industry as Director of Business Development with British Shipbuilders, Global Shipping Economist with the Chase Manhattan Bank N.A., Chief Executive of Lloyds Maritime Information Services; Managing Director of Clarkson Research Services and an executive Director of Clarksons PLC. He lectures regularly at Cambridge Academy of Transport and is a Visiting Professor at Cass Business School, Dalian Maritime University and Copenhagen Business School.

Maritime Decarbonization Mikael Lind, Wolfgang Lehmacher, Robert Ward, 2023-10-20

This volume analyses maritime decarbonization from various perspectives. It contains unique approaches and tools in four areas: scenarios, value chains, enablers, and partnerships. Decarbonization has become a very important focus in the maritime industry. Anyone that delves into the topic quickly appreciates its breadth and complexity. Minimizing greenhouse gases (GHG) emissions in maritime practices at large and doing it swiftly is far from simple. The Paris 2015 climate goals and the IMO ambitions may be the industry’s guiding lights. But is this enough? Probably not. At the managerial level a paradigm shift is needed: from a fixed mindset that is calling for compensation to a growth mindset that seeks to capture the benefits of decarbonization. This will require a structured approach in the form of practical frameworks and clear recommendations. In this book 75 scholars and industry and subject matter experts have joined forces to explore different scenarios, value chain designs, decarbonization enablers, and partnership models to develop frameworks and recommendations around how to effectively work and make

progress. The books offers a valuable mix of theory, practical tools, and real-life cases.

Sustainable Marketing Michelle Carvill,Gemma Butler,Geraint Evans,2021-01-21

Shortlisted for the Business Book Awards 2022 In the modern age of authenticity and transparency, consumers are no longer content with brands that are dismissive of, or even apathetic to, sustainability. Brands are now expected to convey understanding and concern when it comes to matters such as climate change, carbon footprints and employee welfare. Most importantly of all, they must be genuinely committed to these standpoints – remaining consistent and proactive in their principles. With the rise of more conscious consumers and the belief-driven buyer, organizations ignore sustainability and the spirit of 'doing good' at their own peril. From three marketing experts with decades of experience between them, Sustainable Marketing delivers the new benchmark for modern marketing. This book clarifies the importance of the sustainable approach before providing a comprehensive guide to implementing, driving and maintaining these practices in any organization. A must-read for any business leader or marketing executive, this is a unique and fascinating blend of academic research and practical case studies that will kick-start and inspire sustainable initiatives.

Energy Efficiency Steven Fawkes,2016-04-29 Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' Energy Efficiency is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: ¢ what do we really mean by energy efficiency? ¢ what is the potential (in different dimensions)? ¢ why it is important? ¢ what management processes lead to optimisation of energy efficiency? ¢ what technologies are useful for improving energy efficiency? ¢ what policies can be used to promote energy efficiency? ¢ how can energy efficiency be financed? ¢ how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to-date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of energy efficiency, including the huge and vitally important untapped potential offered by effective energy management and the application of existing technology. He also identifies barriers, such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a 'must read' for anyone with an interest in energy supply and demand reduction.

Maritime Cross-Border Insolvency under the UNCITRAL Model Law Regime

Jingchen Xu,2020-12-10 This book covers the pressing issues of cross-border cases involving admiralty and bankruptcy law. For example, what should happen when a shipowner files an insolvency proceeding in one country, while at the same time facing an in rem action against its vessel in another country? Should the in rem action arising in one country be stayed or dismissed because of the existence of insolvency proceedings in another country? The book discusses the relevant issues regarding the treatment of maritime creditors throughout insolvency proceedings, the determination of the 'centre of main interest' of an offshore shipping company, and the scope of a debtor's assets. The author uses a comparative law analysis, selecting four leading shipping countries - Australia, the UK, the US, and Singapore - and examines their approaches to the above three problems when applying the UNCITRAL Model Law regime. The book also proposes a solution to help eliminate the ambiguity arising from maritime cross-border insolvency cases under the UNCITRAL Model Law regime, with a view to enhancing the development of the shipping industry.
