Principles of Economics Asia-Pacific Edition with Online Study Tools 12 Months Joshua Gans,Robin Stonecash,Martin Byford, Gregory Mankiw, Stephen King, Ph.D., Jan Libich, 2017-10-26 Principles of Economics 7th edition combines microeconomics and macroeconomics into one volume for students who take a full year's course. The latest edition of this text continues to focus on important concepts and analyses necessary for students in an introductory economics course. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' such as climate change and resource taxation, the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, monetary and fiscal policy.

Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12 Months Robin Ellen Stonecash, Jan Libich, Joshua Gans, Stephen King, N. Gregory Mankiw, Martin Byford, 2017-09-15 The brief and student-friendly approach of this book boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. Principles of Macroeconomics, 7e encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.
