Emoji and Social Media Paralanguage Michele Zappavigna, Lorenzo

Logi, 2024-01-31 Emoji are now ubiquitous in our interactions on social media. But how do we use them to convey meaning? And how do they function in social bonding? This unique book provides a comprehensive framework for analysing how emoji contribute to meaning-making in social media discourse, alongside language. Presenting emoji as a visual paralanguage, it features extensive worked examples of emoji analysis, using corpora derived from social media such as Twitter and TikTok, to explore how emoji interact with their linguistic co-text. It also draws on the author's extensive work on social media affiliation to consider how emoji function in social bonding. The framework for analysing emoji is explained in an accessible way, and a glossary is included, detailing each system and feature from the system networks used as the schemas for undertaking the analysis. It is essential reading for anyone wishing to investigate the role of emoji in digital communication.

The Pragmatics of Adaptability Daniel N. Silva, Jacob L. Mey, 2021-03-15

Humans are adaptive beings. Gradually, we have produced the fundamental capacities for our cooperation, recognition of intentions, and interaction which led to the development of language and culture. The present collective volume builds on an orientation to pragmatics as the sustained and principled human adaptability in interaction, form, and meaning. Working on different strands of such a socially oriented pragmatics, the authors gathered in this volume study the adaptability of language as shaped by the conditions of society, culture, and cognition. Grouped in four sections, the book's chapters explore the embedding of adaptability in language ideology, text, communicative practice, and learning. Adopting these various perspectives, the authors gauge how language users navigate the different layers of societal, cognitive, and communicative constraints, while adapting their communicative practices, language ideologies, and technologies of interaction to their everyday living conditions.

Social Media Kelli S. Burns, 2017-03-20 Social media is arguably one of the most powerful technology-enabled innovations since the Internet itself. This single-volume book provides a broad and easily understandable discussion of the evolution of social media; related problems and controversies, especially for youth; key people and organizations; and useful social media data. Social media is an integral part of people's lives. More than half of the world's 2.4 billion Internet users sign in to a social network regularly—a figure that continues to grow. More than half of online adults now use two or more social media sites; 71 percent of Internet users are on Facebook. This book surveys the history of social media, addresses the power of social media for positive change, describes the problems and controversies social media have caused, and suggests potential solutions to these issues. Geared toward students and general readers, this accessibly written book covers such topics as the link between social media and body image, the psychological affects of social media use, online conversations about sexual assault, corporate use of social media data, political campaigning through social media, fan tweeting during television shows, and crisis communication through social media. Readers will also gain insights into the range of serious problems related to social media, including privacy concerns, social media addiction, social media hoaxes and scams, the pressure to project an ideal self, the curation of content presented on social media, cyberbullying, sexting, Facebook depression and envy, online shaming, and the impact of social media use on communication skills.

Die chinesische Messaging-App WeChat als virtuelle Sprachinsel Michael Szurawitzki, 2020-09-28 Die Studie untersucht anhand der Messaging-Applikation WeChat, wie deutschsprachige Expatriates in China die dort sehr verbreitete App nutzen, um ihr Leben in der für sie fremden Umgebung zu organisieren und Kontakte innerhalb der Expatriate-Community zu pflegen. WeChat lässt sich als eine Art virtuelle Sprachinsel verstehen, deren spezifische Nutzung bislang noch nicht Gegenstand medienlinguistischer Forschung war. Anhand einer 2018-2019 durchgeführten Online-Umfrage geht die Untersuchung unter anderem den Fragen nach, welche Funktionen der App die Anwender nutzen, in welchen Sprachen (neben Deutsch) sie kommunizieren, ob die Kommunikation am mündlichen oder schriftlichen Standard orientiert ist und ob Sprachmischung zu beobachten ist. Die Ergebnisse liefern einen Einblick in deutsch-chinesische Sprach- und Technologiekontakte und einen wertvollen Beitrag zur interkulturellen Linguistik.

Wish Lanterns Alec Ash, 2017-03-07 "One of the best [books] I've read about the individuals who make up a country that is all too often regarded as a monolith." –Jonathan Fenby, Financial Times If China will rule the world one day, who will rule China? There are more than 320 million Chinese between the ages of sixteen and thirty. Children of the one-child policy, born after Mao, with no memory of the Tiananmen Square massacre, they are the first net native generation to come of age in a market-driven, more international China. Their experiences and aspirations were formed in a radically different country from the one that shaped their elders, and their lives will decide the future of their nation and its place in the world. Wish Lanterns offers a deep dive into the life stories of six young Chinese. Dahai is a military child, netizen, and self-styled loser. Xiaoxiao is a hipster from the freezing north. "Fred," born on the tropical southern island of Hainan, is the daughter of a Party official, while Lucifer is a would-be international rock star. Snail is a country boy and Internet gaming addict, and Mia is a fashionista rebel from far west Xinjiang. Following them as they grow up, go to college, find work and love, all the while navigating the pressure of their parents and society, Wish Lanterns paints a vivid portrait of Chinese youth culture and of a millennial generation whose struggles and dreams reflect the larger issues confronting China today.

China's New Youth Alec Ash, 2020-06-02 "Paints a telling portrait of this most restless generation raised in a system that has provided them with unprecedented personal opportunities while denying them political ones. . . . A gifted observer." –Washington Post Informative and often humorous . . . Presents a refreshing range of perspectives about being twenty-something in China. –Forbes "Masterfully crafted." –Los Angeles Review of Books "A perceptive and quietly profound book." –Booklist, starred review Compelling and beautifully written. –Prospect China's new youth are the generation that will change China. Offspring of the one-child policy, with no memory of Tiananmen, they are destined to transform both their nation and the world. Understanding their motivations, dreams, and attitudes is possibly the most important gauge of China's future direction as it plays an increasingly important role in shaping this century. China's New Youth follows the lives of six young Chinese as they navigate their aspirations, discontents, politics, and love lives. Their stories include a netizen nationalist, a country migrant, the daughter of a Party member, a rising pop star, and a feminist entrepreneur. With intimate access to this diverse generation, Alec Ash—a young writer based in China since 2012—gives a vivid, immersive, fascinating account of young China as it comes of age. China's New Youth was originally published in hardcover until the title Wish Lanterns: Young Lives in New China. The new paperback edition has been updated with a new preface and afterword by the author and a new foreword by Karoline Kan.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

The Japanese Self in Cultural Logic Takie Sugiyama Lebra,2004-09-30 The self serves as a universally available, effective, and indispensable filter for making sense of the chaos of the world. In her latest book, Takie Lebra attempts a new understanding of the Japanese self through her unique use of cultural logic. She begins by presenting and elaborating on two models (opposition logic and contingency logic) to examine concepts of self, Japanese and otherwise. Guided by these, she delves into the three layers of the Japanese self, focusing first on the social layer as located in four zones—omote (front), uchi (interior), ura (back), and soto (exterior)—and its shifts from zone to zone. New light is shed on these familiar linguistic and spatial categories by introducing the dimension of civility. The book expands the discussion in relation to larger constructions of the inner and cosmological self. Unlike the social self, which views itself in relation to the other, the inner layer involves a reflexivity in which self communicates with self. While the social self engages in dialogue or triologue, the inner self communicates through monologue or soliloquy. The cosmological layer, which centers around transcendental beliefs and fantasies, is examined and the analysis supplemented with comments on aesthetics. Throughout, Lebra applies her methodology to dozens of Japanese examples and makes relevant comparisons with North American culture and notions of self. Finally, she provides a spirited analysis of critiques of Nihonjinron to reinforce the relevancy of Japanese studies. This volume is the culmination of decades of thinking on self and social relations by one of the most influential scholars in the field. It will prove highly instructive to Japanese and non-Japanese readers alike in a range of disciplines, including anthropology, sociology, and social psychology.

Social Media in Industrial China Xinyuan Wang, 2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Smartphone Communication Francisco Yus, 2021-09-05 This book offers a unique model for understanding the cognitive underpinnings, interactions and discursive effects of our evolving use of smartphones in everyday app-mediated communication, from text messages and GIFs to images, video and social media apps. Adopting a cyberpragmatics framework, grounded in cognitive pragmatics and relevance theory, it gives attention to how both the particular interfaces of different apps and users' personal attributes influence the contexts and uses of smartphone communication. The communication of emotions – in addition to primarily linguistic content – is foregrounded as an essential element of the kinds of ever-present paralinguistic and phatic communication that characterises our exchange of memes, GIFs, likes, and image- and video-based content. Insights from related disciplines such as media studies and sociology are incorporated as the author unpacks the timeliest questions of our digitally mediated age. Aimed primarily at scholars and graduate students of communication, linguistics, pragmatics, media studies, and sociology of mass media, Smartphone Communication traffics in topics that will likewise engage upper-level undergraduate students.

Emoticons, Kaomoji, and Emoji Elena Giannoulis, Lukas R.A. Wilde, 2019-07-23 This collection offers a comprehensive treatment of emoticons, kaomoji, and emoji, examining these digital pictograms and ideograms from a range of perspectives to comprehend their increasing role in the transformation of

communication in the digital age. Featuring a detailed introduction and eleven contributions from an interdisciplinary group of scholars, the volume begins by outlining the history and development of the field, situating emoticons, kaomoji, and emoji – expressing a variety of moods and emotional states, facial expressions, as well as all kinds of everyday objects– as both a topic of global relevance but also within multimodal, semiotic, picture theoretical, cultural and linguistic research. The book shows how the interplay of these systems with text can alter and shape the meaning and content of messaging and examines how this manifests itself through different lenses, including the communicative, socio-political, aesthetic, and cross-cultural. Making the case for further study on emoticons, kaomoji, and emoji and their impact on digital communication, this book is key reading for students and scholars in sociolinguistics, media studies, Japanese studies, and language and communication.
