**WhatsApp** Amelia Johns, Ariadna Matamoros-Fernández, Emma Baulch, 2023-11-28 In the 2010s, as chat apps became a primary mode of communication for many people across the world, WhatsApp quickly outpaced rival messaging apps and developed into a platform. In this book, the authors provide a comprehensive account of WhatsApp's global growth. Charting WhatsApp's evolution from its founding in 2009 to the present day, they argue that WhatsApp has been transformed from a simple, 'gimmickless' app into a global communication platform. Understanding this development can shed light on the trajectory of Meta's industrial development, and how digital economies and social media landscapes are evolving with the rise of 'superapps'. This book explores how WhatsApp's unique characteristics mediate new kinds of social and commercial transactions; how they pose new opportunities and challenges for platform regulation, civic participation and democracy; and how they give rise to new kinds of digital literacy as WhatsApp becomes integrated into everyday digital cultures across the globe. Accessibly written, this book is an essential resource for students and scholars of digital media, cultural studies, and media and communications.

If You Can Read This Jack Bowen,2010-03-23 A PICTURE MAY BE WORTH A THOUSAND WORDS— BUT A FEW CHOICE

WORDS CAN SPEAK VOLUMES! • If Ignorance Is Bliss, Why Aren't More People Happy? • Bottled Water Is for Suckers • Clones Are People Too • At Least the War on the Environment Is Going Well • Don't Believe Everything You Think • The Revolution Will Be Tweeted Long before blogs, tweets, and sound bites, people were telling the world how they felt in brief, blunt bursts of information plastered on the backs of their cars. Whether they're political or religious, passionate or proud, controversial or corny, these brightly colored, boldly lettered mini manifestos are declarations of who we are, where we stand, and what we'd rather be doing. But as bestselling author and noted philosopher Jack Bowen reveals, there's much more to the pop-culture phenomenon of bumper stickers than rolling one-liners and drive-by propaganda—no less, in fact, than a wise, funny, poignant, contentious, and truthful discourse on the human condition. Mixing pop culture with the ideas of historically prominent philosophers and scientists, *If You Can Read This* exposes the deeper wisdom couched behind these slogans—or, as need be, exposes where they have gone wrong. If you brake for big ideas, now's the time.

**The Unsaid Words** Saksham Kailoo,2022-02-26 The book is all about giving wings to the unsaid emotions and feelings of the writers. To expel their emotions out.

**Online around the World** Laura M. Steckman, Marilyn J. Andrews,2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the

specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

**Analyzing Digital Discourse** Patricia Bou-Franch, Pilar Garcés-

Conejos Blitvich, 2018-09-29 This innovative edited collection presents new insights into emerging debates around digital communication practices. It brings together research by leading international experts to examine methods and approaches, multimodality, face and identity, across five thematically organised sections. Its contributors revise current paradigms in view of past, present, and future research and analyse how users deploy the wealth of multimodal resources afforded

by digital technologies to undertake tasks and to enact identity. In its concluding section it identifies the ideologies that underpin the construction of digital texts in the social world. This important contribution to digital discourse studies will have interdisciplinary appeal across the fields of linguistics, socio-linguistics, pragmatics, discourse analysis, gender studies, multimodality, media and communication studies.

**The Global Smartphone** Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide ‘perpetual opportunism’, as they are always with us. The authors show how the smartphone is more than an ‘app device’ and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al

Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

**Routledge Handbook of New Media in Asia** Larissa Hjorth, Olivia Khoo, 2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future, today we are seeing a much more complex picture of contesting new media practices and production. As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices, boundaries between art, new media, and the everyday are transformed. This Handbook addresses the historical, social, cultural, political, philosophical, artistic and economic dimensions of the region's new media. Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions. The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia. It provides an authoritative, up-to-date, intellectually broad, conceptually cutting-edge guide to the important aspects of new media in the region — as the first point of consultation for researchers, advanced level undergraduate and postgraduate students in fields of new media and Asian studies.
