**The Reception of Aristotle's Poetics in the Italian Renaissance and Beyond** Bryan Brazeau,2020-04-16 Using new and cutting-edge perspectives, this book explores literary criticism and the reception of Aristotle's Poetics in early modern Italy. Written by leading international scholars, the chapters examine the current state of the field and set out new directions for future study. The reception of classical texts of literary criticism, such as Horace's *Ars Poetica*, Longinus's *On the Sublime*, and most importantly, Aristotle's *Poetics* was a crucial part of the intellectual culture of Renaissance Italy. Revisiting the translations, commentaries, lectures, and polemic treatises produced, the contributors apply new interdisciplinary methods from book history, translation studies, history of the emotions and classical reception to them. Placing several early modern Italian poetic texts in dialogue with twentieth-century literary theory for the first time, *The Reception of Aristotle's Poetics in the Italian Renaissance and Beyond* models contemporary practice and maps out avenues for future study.

**Granville's New Key to Stock Market Profits** Joseph E. Granville, 2018-12-05 In this remarkable stock market study, one of Wall Street's best known market analysts reveals a new technical tool he developed for gauging the pulse of the trading cycle. Called the On Balance Volume Theory, this tool tends to fill in some of the conspicuous voids in the famous Dow Theory—especially the lack of discussion and use of stock volume figures. As straightforward as a set of bridge rules, on-balance volume (OBV) denotes each buy and sell signal so that a trader can follow them without his own emotions tending to lead him astray—emotions causing most of the market misjudgements that take place. The Granville OBV method is essentially scientific, has a high degree of accuracy and has many automatic features. The reader of this book will be introduced to a method whereby he may benefit by the earlier movements of volume over price—the “early warning” radar of volume buy and sell signals.
