A Critical History of Television's The Twilight Zone, 1959-1964 Don Presnell, Marty McGee, 2008-08-18 Rod Serling's anthology series The Twilight Zone is recognized as one of the greatest television shows of all time. Always intelligent and thought-provoking, the show used the conventions of several genres to explore such universal qualities as violence, fear, prejudice, love, death, and individual identity. This comprehensive reference work gives a complete history of the show, from its beginning in 1959 to its final 1964 season, with critical commentaries, incisive analyses, and the most complete listing of casts and credits ever published. Biographical profiles of writers and contributors are included, followed by detailed appendices, bibliography and index.

Tools and Algorithms for the Construction and Analysis of Systems Joost-Pieter Katoen, Perdita Stevens, 2002-03-20 ETAPS 2002 was the 7th instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised 5 conferences (FOSSACS, FASE, ESOP, CC, TACAS), 13 satellite workshops (ACL2, AGT, CMCS, COCV, DCC, INT, LDTA, SC, SFEDL, SLAP, SPIN, TPTS, and VISS), 8 invited lectures (not including those specific to the satellite events), and several tutorials. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory with a practical motivation on one hand and soundly-based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be

exclusive.

The University in Crumbs Robert Porter, Iain MacKenzie, Kerry-Ann Porter, 2023-05-31 Occupying a space in-between conventional scholarship and imaginative storytelling, *The University in Crumbs: A Register of Things Seen and Heard* is an experimental work that dramatizes the everyday life of the academy. Consisting primarily of a series of five first-person reports, Robert Porter, Kerry-Ann Porter and Iain Mackenzie provide the reader with a number of stories that attempt to capture some of their everyday experiences of academic life in the UK, roughly between 2017 and 2022. Self-consciously written in a subjective and conversational register, and often in dialogical form, *The University in Crumbs* is an accessible series of interrelated narratives that allow us to develop a concrete sense of the grain, texture and feel for what it might be like to work in the academy at a specific point in time. These stories, first-person reports, dialogues, come alive, acquire their meaning, force and pragmatic effect by way of a rather unique circumlocutory form. There is a directedness to the everyday talk engaged in by Robert, Kerry-Ann and Iain that nonetheless, simultaneously, indirectly loops in and out of a kind of technical academic talk that provides the book its light and shade. *University in Crumbs* is an experimental work that implicitly and explicitly animates philosophy, social, cultural and political theory through first-person experiences and, in so doing, breathes new life into what can often otherwise remain rather conventional and technical academic language-games. More than that, this book dramatizes ideas and concepts in ways perhaps less burdened by the weight of canonical tradition, and encourages those readers with the talent to portray their social world differently to be more licentious and less bashful in putting such talents to work.
