Stop and Search and Police Legitimacy Ben

Bradford,2017-01-06 'Stop and search' is a form of police-citizen interaction that is confrontational, often stressful for those involved, and potentially damaging to the relationship between police and public. The extent to which police officers use their

power to stop and perhaps search members of the public is intimately linked not only to the present-day context of policing but also to longer term patterns in the aims of policing, the ends used to achieve them, and ultimately to the ideology of policing in England and Wales. Stop and Search and Police Legitimacy draws upon both police-administrative and survey-based data to examine what has for many years been one of the most highly charged and contested aspects of police practice. Taking a decidedly quantitative, empirical, approach, this book examines the patterning of police stops over social and geographic space, the problem of ethnic disproportionality, and the evidence concerning how people experience and react to being stopped by police - particularly in relation to issues of fairness, legitimacy, cooperation and compliance. A further important concern is the extent to which this form of police practice shapes and re-shapes the identities of those affected by it. This ground-breaking study is a comprehensive resource for students and scholars in the fields of criminology, sociology, social policy, ethnic and racial studies and human rights. It will also be of special interest to police leaders and policy-makers.

The Long Walk to Equality Avis Whyte, Patricia Tuitt, Judith
Bourne, 2024-02-20 In 1965 the UK enacted the Race Relations Act
while the International Convention on the Elimination of all Forms
of Racial Discrimination (ICERD) opened for signature and
ratification. In the US, the changes that brought down the walls of

segregation, conveying some equality to black people essentially began with the Civil Rights Act of 1964. These ground-breaking instruments marked a commitment—domestically and internationally by the state parties to the ICERD—to address racial injustice and inequality through legal means. Yet, the intervening years reveal the challenges of pursuing racial justice and equality through the medium of law. In recent years, allegations of institutional racism have been levelled against numerous public institutions in the UK, while the rise of populism globally has challenged the ability of law to effect change. This edited collection draws attention to the need to reflect on the persistence of racial inequalities and injustices despite law's intervention and arguably because of its 'unconscious' role in their promotion. It does so from a multiplicity of perspectives ranging from the doctrinal, socio-legal, critical and theoretical, thereby generating different kinds of knowledge about race and law. By exploring contemporary issues in racial justice and equality, contributors examine the role of law—whether domestic or international, hard or soft—in advancing racial equality and justice and consider whether it can effect substantive change.

Drug Law Enforcement, Policing and Harm Reduction Matthew Bacon, Jack Spicer, 2022-12-30 The policing of drugs is an intriguing, complex, and contentious domain that brings into sharp focus the multifaceted nature of the police role and has farreaching consequences for health, crime, and justice. While research on drugs policing has historically been surprisingly sparse, fragmented, and underdeveloped, the field has recently become a burgeoning area of academic study, influenced by contemporary trends in policing practices, changes in drug policy, and wider social movements. This book makes a much-needed interdisciplinary and international contribution that engages with established and emerging areas of scholarship, advances cutting-edge debates, and sets an agenda for future directions in drugs policing. Drug Law Enforcement, Policing and Harm Reduction is the first edited collection to devote its attention exclusively to drugs policing. It brings together a range of leading scholars to provide a deep and thorough account of the current state of knowledge. In addition to academic analysis, authors also include serving police officers and policymakers, who have influenced how drugs policing is framed and carried out. Together, the contributors draw on a diverse set of empirical studies and theoretical perspectives, with the thread running throughout the book being the concept of harm reduction policing. With accounts from various countries, localities, and contexts, topics covered include the (in)effectiveness and (un)intended consequences of the 'war on drugs', attempts to reform drugs policing, and the role of partnerships and policy networks. The broader theme of inequality lies at the heart of this collection. An accessible and compelling read, this book will be of interest to academics and students of criminology, public health, and social policy, especially those researching policing, drug policy, and harm reduction. It also offers valuable insights and practical guidance for professionals

working in the drugs field.
