Mariners Weather Log ,1985 Mariners Weather Log contains articles, news and information about marine weather events and phenomenon, storms at sea, weather forecasting, the NWS Voluntary Observing Ship (VOS) Program, Port Meteorological Officers (PMOs), cooperating ships officers, and their vessels. It provides meteorological information to the maritime community, and contains a comprehensive chronicle on marine weather. It recognizes ships officers for their efforts as voluntary weather observers, and allows NWS to maintain contact with and communicate with over 10,000 shipboard observers (ships officers) in the merchant marine, NOAA Corps, Coast Guard, Navy, etc.

Air Apparent Mark Monmonier, 2019-01-18 Weather maps have made our atmosphere visible, understandable, and at least moderately predictable. In *Air Apparent* Mark Monmonier traces debates among scientists eager to unravel the enigma of storms and global change, explains strategies for mapping the upper atmosphere and forecasting disaster, and discusses efforts to detect and control air pollution. Fascinating in its scope and detail, *Air Apparent* makes us take a second look at the weather map, an image that has been, and continues to be, central to our daily lives. Clever title, rewarding book. Monmonier . . . offers here a basic course in meteorology, which he presents gracefully by means of a history of weather maps. –Scientific American Mark Monmonier is onto a winner with *Air Apparent*. . . . It is good, accessible science and excellent history. . . . Read it. –Fred Pearce, *New Scientist* [*Air Apparent*] is a superb first reading for any backyard novice of weather . . . but even the veteran forecaster or researcher will find it engaging and, in some cases, enlightening. –Joe Venuti, *Bulletin of the American Meteorological Society* Monmonier is solid enough in his discussion of geographic and meteorological information to satisfy the experienced weather watcher. But even if this information were not presented in such a lively and engaging manner, it would still hook most any reader who checks the weather map every morning or who sits happily entranced through a full cycle of forecasts on the Weather Channel. –Michael Kennedy, *Boston Globe*

Minding the Weather Robert R. Hoffman, Daphne S. Ladue, H. Michael Mogil, Paul J. Roebber, J. Gregory Trafton, 2017-08-11 A detailed study of research on the psychology of expertise in weather forecasting, drawing on findings in cognitive science, meteorology, and computer science. This book argues that the human cognition system is the least understood, yet probably most important, component of forecasting accuracy. *Minding the Weather* investigates how people acquire massive and highly organized knowledge and develop the reasoning skills and strategies that enable them to achieve the highest levels of performance. The authors consider such topics as the forecasting workplace; atmospheric scientists' descriptions of their reasoning strategies; the nature of expertise; forecaster knowledge, perceptual skills, and reasoning; and expert systems designed to imitate forecaster reasoning. Drawing on research in cognitive science, meteorology, and computer science, the authors argue that forecasting involves an interdependence of humans and technologies. Human expertise will always be necessary.

Conference on Numerical Weather Prediction ,1985
Hurricane Iniki, September 6-13, 1992 United States. National Weather Service,1993 Although hurricanes are common over the eastern Pacific and annually are seen in parts of the central Pacific, they are not routinely found over Hawaii. Only four of these have impacted the Aloha State since 1950. Hurricane Iniki, with winds up to 160 MPH, was by far the strongest and most destructive. This storm also completed a clean sweep of National Weather Service (NWS) offices responsible for issuing hurricane warnings. The National Hurricane Center (NHC) in Coral Gables, Florida (Hurricane Andrew), the Joint Typhoon Warning Center (JTWC) in Guam (Typhoon Omar), and the Central Pacific Hurricane Center (CPHC) in Honolulu, Hawaii (Hurricane Iniki) were all struck by strong hurricanes within a 2-month span. Relying on one geostationary satellite providing satisfactory, but less than ideal, coverage and an extremely sparse surface data network, NWS forecasters and meteorological technicians across the state provided excellent warning service to residents and visitors alike--Preface

Forecasters' Guide to Tropical Meteorology Gary D. Atkinson,1971 A practical manual for training and reference use of USAF weather forecasters who will work in the tropics, it covers basic facts of climatology, circulation, synoptic models, analysis and forecasting, application throughout the tropics. A broad survey is made of the

literature, evaluated in light of the experience of the author. Physical factors controlling tropical circulations are briefly discussed. The data sources for synoptic purposes are reviewed. Climatology of pressure, winds, temperature, humidity, clouds, rainfall and disturbances is presented in a form specially suitable for forecasters. Analysis and for forecasting of disturbances, cyclones, severe weather, terminal weather, etc., are treated at length. Emphasis is placed on uses of climatology and satellite cloud photos. Over 230 figures adapted from the literature or prepared by the author serve to illustrate all the essential facts and principles discussed. A summary of the state of art and future outlook of tropical meteorology is included.

Dynamics and Predictability of Large-Scale, High-Impact Weather and Climate Events Jianping Li, Richard Swinbank, Richard Grotjahn, Hans Volkert, 2016-03-24 This book examines the dynamical processes between high-impact weather and climate events, and between atmospheric and ocean phenomena.
