The Wisdom of Strategic Learning Ian Cunningham, 1994 Change means learning. There is no possibility for organizations to change unless the people in them learn. In this new book Ian Cunningham writes about his pioneering work in developing strategic learning. He shows the need to go beyond vague prescriptions for 'learning organizations'. Instead he advocates the value of a 'learning business' which integrates learning with the strategic direction of the organization. He elaborates practical examples of implementing strategic learning, using self managed learning. For the organization, self managed learning has a strategic advantage in creating a focused, active and committed team. Ian Cunningham's powerful, tried-and-tested approach is backed by evaluation research evidence and by its success in organizations such as Shell in the Netherlands, the Hiram Walker Group in the UK and Valmet in Finland.

Demystifying Chinese Management Malcolm Warner, Chris Rowley, 2015-10-14 Today, with a new leadership in place, the People's Republic of China enters a challenging new phase as an emerging economic superpower. The Chinese economy has dramatically changed over the three decades since Deng Xiaoping launched his economic reforms in 1978. It has been transformed from a command economy dominated by state-owned enterprises to a market socialist economy with a wide range of ownership forms, both public and private. In turn, its managers and management have correspondingly undergone a major sea-change. This edited collection attempts to demystify Chinese management, highlighting recent research into these significant changes and their implications in a wide range of business enterprises both in China and overseas. It points to the strategic challenges and issues in terms of realizing the managerial version of the 'Chinese Dream'. The topics covered include business schools in China, corporate social responsibility, financial services, impression management, international human resource management, international competitive strategy choices, internationalization of firms and the role of science parks. The book was originally published as a special issue of Asia Pacific Business Review.

The Content Trap Bharat Anand, 2016-10-18 "My favorite book of the year."—Doug McMillon, CEO, Wal-Mart Stores Harvard Business School Professor of Strategy Bharat Anand presents an incisive new approach to digital transformation that favors fostering connectivity over focusing exclusively on content. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Companies everywhere face two major challenges today:

getting noticed and getting paid. To confront these obstacles, Bharat Anand examines a range of businesses around the world, from The New York Times to The Economist, from Chinese Internet giant Tencent to Scandinavian digital trailblazer Schibsted, and from talent management to the future of education. Drawing on these stories and on the latest research in economics, strategy, and marketing, this refreshingly engaging book reveals important lessons, smashes celebrated myths, and reorients strategy. Success for flourishing companies comes not from making the best content but from recognizing how content enables customers' connectivity; it comes not from protecting the value of content at all costs but from unearthing related opportunities close by; and it comes not from mimicking competitors' best practices but from seeing choices as part of a connected whole. Digital change means that everyone today can reach and interact with others directly: We are all in the content business. But that comes with risks that Bharat Anand teaches us how to recognize and navigate. Filled with conversations with key players and in-depth dispatches from the front lines of digital change, *The Content Trap* is an essential new playbook for navigating the turbulent waters in which we find ourselves. Praise for *The Content Trap* "A masterful and thought-provoking book that has reshaped my understanding of content in the digital landscape."—Ariel Emanuel, co-CEO, WME | IMG "The Content Trap is a book filled with stories of businesses, from music companies to magazine publishers, that missed connections and could never escape the narrow views that had brought them past success. But it is also filled with stories of those who made strategic choices to strengthen the links between content and returns in their new master plans. . . . The book is a call to clear thinking and reassessing why things are the way they are."—The Wall Street Journal

Your Strategy Needs a Strategy Martin Reeves, Knut Haanaes, 2015-05-19 You think you have a winning strategy. But do you? Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanaes, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as: • What replaces planning when the annual cycle is obsolete? • When can we—and when should we—shape the game to our advantage? • How do we simultaneously implement different strategic approaches for different business units? • How do we manage the inherent contradictions in formulating and executing different strategies across multiple businesses and geographies? Until now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.
