The Joy of Search Daniel M. Russell,2019-10-01 A Google researcher reveals the art of online searching, offering tips and tricks on how best to use resources like Google and Wikipedia—plus fun facts and fascinating stories We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—“Japan population” or “Nobel Peace Prize” or “poison ivy” or whatever we want to know. But knowing how to Google something doesn't make us search experts; there’s much more we can do to access the massive collective knowledge available online. In The Joy of Search, Daniel Russell shows us how to be great online researchers. We don’t have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from “what is the wrong side of a towel?” to “what is the most likely way you will die?” Along the way, readers will discover essential tools for effective online searches—and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.

The Near North Ivan Vladislavić,2024-03-01 The Near North is a vivid account of life in Johannesburg in times of crisis. From the stony ridges of Langermann Kop in Kensington to the tree-lined avenues of Houghton, we follow the writer through the city's streets, meeting its ghosts and journeying through time and (often circumscribed) space, finding meaning in the everyday and incidental. At once an echo of Ivan Vladislavić’s award-winning Portrait with Keys and an original work of intense acuity and quiet power, The Near North is both intimate and expansive, ranging from small domestic dramas to great public spectacles. Wryly playful at times, fiercely serious at others, it is certain to move and delight all who accompany the writer through its pages.

Lonely Divide Robert Ziefel,2014-07-21 Take the Paragon rules from Tremorworks. Add a gun toting cyborg, a fairy, a young girl who's a martial arts enthusiast and a guy with psychic powers. Place them in a world where they know they are characters in a game like world. A world populated by dragons, AI constructs, magic, and possibly a mermaid or two. Stir. This is the result. Everyone has an inventory, NPCs are stuck being average, and those select few that become Player Characters solve the mysteries of the world as best they can. In fact, they do it officially, for the government, as part of a 5 year initiative. Our heroes find that, for about the last hundred years or so, someone has been quietly abducting PCs around the world for unknown reasons. They have to find out who, and put a stop to it, because it seems they are next on the list to disappear. Here you'll find a little humor, a little romance, a little gunplay, and a whole lot of adventure.

The Virtual Self Nora Young,2012-04-10 The host of CBC Radio's Spark explores the very real impact of the virtual information we generate about ourselves -- on our own lives, our communities, and our government. We generate enormous amounts of online data about our habits: where we go, what we do, and how we feel. Some of that is stuff we choose to report; some of it is the offhand data trails we leave behind. The Virtual Self looks at the debates and challenges around virtual data-sharing -- from Facebook status updates to Google Navigator -- and its potential for building more responsive communities and governments. Nora argues that if we wrestle now with issues like privacy and data control, we can harness the power of that data. The host of CBC Radio's Spark, Nora Young has fascinating information at her disposal, unique insights into the intersection of the virtual and real worlds, and a wonderful voice for making all of these clear to a general audience. Accessible and entertaining, The Virtual Self takes that personal, psychological reality of everything from email to status updates and teases out the increasingly bigger impacts on the real world around us of the virtual information we all generate.

Staff Picks George Singleton,2019-03-06 It's Father's Day 1972 and a young boy's dad takes him to visit a string of unimpressive ex-girlfriends that could have been his mother; the unconventional detective work of a koan-speaking, Kung Fu-loving uncle solves a case of arson during a pancake breakfast; and a former geology professor, recovering from addiction, finds himself sharing a taxicab with specters from a Jim Crow-era lynching. Set in and around the fictional town of Steepleburg, South Carolina, the loosely tied stories in George Singleton's Staff Picks place sympathetic, oddball characters in absurd, borderline surreal situations that slowly reveal the angst of southern history with humor and bite. In the tradition of Donald Barthelme, T. C. Boyle, Flannery O'Connor, and Raymond Carver, Singleton creates lingering, darkly comedic tales by drawing from those places where familiarity and alienation coexist. A remarkable and distinct effort from an acclaimed chronicler of the South, Staff Picks reaffirms Singleton's gift for crafting short story collections that both deliver individual gems and shine as a whole.

A Genius Planet Ludger Hovestadt,Vera Bühlmann,Sebastian Michael,2017-07-24 Imagine a world where the power is always on, where there is not just enough energy, but an abundance of it. Such a world is no Utopia, it is a possible reality. Using indefinitely available sources of energy - especially photovoltaic solar, in combination with others - and networking this energy, much in the way that we have networked information, we can get beyond our current energy 'crisis' and resolve it. The world we then find ourselves in is not a world without problems - we will face new challenges on the way - but in terms of energy it is a world of plenty. Rooted in sound theory and based on technology that is available now, A Genius Planet offers an accessible but detailed and insightful perspective on how we can free ourselves from our dependency on natural resources and generate, trade, and use energy in ways that open up the genuine potential that we have at our disposal today.

Studies in Temporal Urbanism Fabian Neuhaus,2011-08-04 This book is very much about what the name urbanTick literally says, about the ticking of the urban, the urban as we experience it everyday on the bus, in the park or between buildings. It is about the big orchestrated mass migration of commuters, the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish-eater-trucks. It is also, not to forget, about climate, infrastructure, opening hours, term times, parking meters, time tables, growing shadows and moon light. But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns. The content of this book is based on the content of the urbanTick blog between 2008-2010. One year blogging about this topic brought together a large collection of different aspects and thoughts. It is not at all a conclusive view, the opposite might be the case, it is an exploratory work in progress, while trying to capture as many facets of the topic as possible.
