String Field Theory Harold Erbin, 2021-03-26 This textbook provides an introduction to string field theory (SFT). String theory is usually formulated in the worldsheet formalism, which describes a single string (first-quantization). While this approach is intuitive and could be pushed far due to the exceptional properties of two-dimensional theories, it becomes cumbersome for some questions or even fails at a more fundamental level. These motivations have led to the development of SFT, a description of string theory using the field theory formalism (second-quantization). As a field theory, SFT provides a rigorous and constructive formulation of string theory. The main focus of the book is the construction of the closed bosonic SFT. The accent is put on providing the reader with the foundations, conceptual understanding and intuition of what SFT is. After reading this book, the reader is able to study the applications from the literature. The book is organized in two parts. The first part reviews the notions of the worldsheet theory that are necessary to build SFT (worldsheet path integral, CFT and BRST quantization). The second part starts by introducing general concepts of SFT from the BRST quantization. Then, it introduces off-shell string amplitudes before providing a Feynman diagrams interpretation from which the building blocks of SFT are extracted. After constructing the closed SFT, the author outlines the proofs of several important properties such as background independence, unitarity and crossing symmetry. Finally, the generalization to the superstring is also discussed.

Three Lectures on Complexity and Black Holes Leonard Susskind, 2020-05-11 These three lectures cover a certain aspect of complexity and black holes, namely the relation to the second law of

thermodynamics. The first lecture describes the meaning of quantum complexity, the analogy between entropy and complexity, and the second law of complexity. Lecture two reviews the connection between the second law of complexity and the interior of black holes. Prof. L. Susskind discusses how firewalls are related to periods of non-increasing complexity which typically only occur after an exponentially long time. The final lecture is about the thermodynamics of complexity, and “uncomplexity” as a resource for doing computational work. The author explains the remarkable power of “one clean qubit,” in both computational terms and in space-time terms. This book is intended for graduate students and researchers who want to take the first steps towards the mysteries of black holes and their complexity.

PoC or GTFO, Volume 3 Manul Laphroaig, 2021-01-29 Volume 3 of the PoC || GTFO collection--read as Proof of Concept or Get the Fuck Out--continues the series of wildly popular collections of this hacker journal. Contributions range from humorous poems to deeply technical essays bound in the form of a bible. The International Journal of Proof-of-Concept or Get The Fuck Out is a celebrated collection of short essays on computer security, reverse engineering and retrocomputing topics by many of the world's most famous hackers. This third volume contains all articles from releases 14 to 18 in the form of an actual, bound bible. Topics include how to dump the ROM from one of the most secure Sega Genesis games ever created; how to create a PDF that is also a Git repository; how to extract the Game Boy Advance BIOS ROM; how to sniff Bluetooth Low Energy communications with the BCC Micro:Bit; how to conceal ZIP Files in NES Cartridges; how to remotely exploit a TetriNET Server; and more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

**Billy F Gibbons** Billy F Gibbons, Tom Vickers, 2020-05-12 Expanded on the occasion of ZZ Top's 50th anniversary year, Billy F Gibbons: Rock + Roll Gearhead (first published in 2005) throws wide Gibbons' garage and studio doors for an exclusive look at the exquisite vintage and way-out custom guitars and the

influential hot rods and custom cars of the Grade-A Texas gearhead. From the near-mythical '59 Les Paul sunburst known as “Pearly Gates” and the “Furry One” of MTV renown to cars like the Eliminator, CadZZilla, and Kopperhed, they’re all here—more than four dozen guitars and a dozen astounding vehicles, all expounded upon by BFG himself and shown in commissioned color photography. Cars and guitars that have made their way to light since first publication are included: Cars: Mexican Blackbird 1958 Thunderbird Custom Scions Quintana '50 Ford Custom El Camino custom Whiskey Runner Ford Coupe '51 Jeep Wagon Guitars: Party Peelers John Bolin Customs 1929 National Resonator 1929 Dixie Ukelele 1939 Rickenbacker Frying Pan ...and more! While BFG’s cars ‘n’ guitars are the stuff of legend, no less intriguing are the tales behind his incredible music career. From teenage Houston garage rocker to the Rock and Roll Hall of Fame, the whole story is between these covers, told in the Good Reverend Willie G’s own words and illustrated with photos and memorabilia from his personal archive. As with many rockers, Billy F Gibbons’ jones for hot rods and customs is the stuff of legend. But beyond this bona fide bluesman’s mastery of the six-string and unrepentant love for internal combustion is a noted collector whose own designs have manifested themselves in hundreds of mind-bending cars and guitars. This is the definitive and official record of that genius.
