The Professor Is In Karen Kelsky, 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor Is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to

publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

The College Student's Guide to Landing a Great Job Bob Roth, 2007-10 There is a Way to significantly increase your chances for landing a great job with a well known and respected employer. If that is your goal, this book can help you achieve that goal. The most successful students realize that they must compete for the best jobs. They also realize that there are steps that they must follow along the way, to put themselves in the best position for success. To be more successful, you should: - Figure out where you want to go (A clear direction) - Investigate what it will take to get there - Create a detailed, step-by-step plan of action - Participate in campus, work and community activities - Build a list of significant accomplishments - Demonstrate the most desirable, work related skills - Prepare for and conduct a comprehensive job search Every year, too many good students lose out to better prepared candidates and must settle for lesser jobs with less impressive employers. This regularly happens to students who: - Don't understand the job hunting process - Fail to adequately prepare for the senior year job search - Are unaware of what is important to recruiters and employers - Don't know how to compete effectively for the best jobs Students understand that their cumulative average is built semester by semester. And yet, most students and parents don't recognize that the same thing is true of the job search plan. The accomplishments, successes, achievements and positive results that you will include on your resume will be accumulated as you move through your four-year college experience. Students who wait until

their senior year to think about their resume and job search strategy are unlikely to land a great job. Smart student plan for success. They actively strive to put themselves in the best possible position to land a great job. Those who don't will fall by the wayside. Since every student can improve their chances for a better job by following the week-by-week plan contained in this book, only one question remains. How badly d

Winning That Job MR Jon Gregory, 2014-05-04 Finding a good job and establishing the start of a career is hard work. The right qualifications are vital, but they alone won't win an interview. Relevant work experience is a necessity, but on its own won't win that job offer. So what will? Technique. Today, job applicants face a multi-stage challenge and they must: survive initial selection by software robots; get approval from the HR gate-keepers; stand out from their peers during complex multi-stage selection interviews; and finally individually win over the decision-making managers. This book shows job-hunters how to avoid getting caught out through sending hundreds of applications, wasting time at odds of 1000 to 1 or worse, only to get nothing. Step by step, using the latest tools and techniques, it takes job-hunters through: finding and targeting the right opportunities, including the 'hidden' ones; pressing the right buttons on their CVs, on applications and online; distilling the killer shots out of even a short period of work-experience; preparing so systematically that they effectively win the job before the interview; controlling their nerves & demonstrating that they really are the No. 1 choice. Job hunters can be sure that, if they learn a good set of search, application and interview skills now, they're going to have lots of opportunity to re-use them during the course of their working lives. Learning how to win that job by applying the techniques from this book

is likely to be the best investment they'll ever make in themselves.
