**E-FOOD: Closing the Online Enforcement Gap in the EU Platform Economy**

Maria Jose Plana Casado,2021-08-05 Retail is 'going digital,' and grocery shopping is no exception. While some businesses are relaying on their corporate website to make the sale, both traditional brick-and-mortar and new disruptive business models are increasingly using online marketplaces to offer their products online. European Union law has been gradually updated to reflect this new reality, with Intellectual Property Rights legislation and Consumer Law leading the way toward a suitable regulatory framework in the Platform Economy. However, the EU has not devised a comprehensive strategy for tackling the challenges posed by the online sale of physical consumer goods, such as effective public enforcement in online environments. In fact, sector-specific legislation, including Food Law, largely ignores online transactions. In this context, the book evaluates the impact that online marketplaces are having on European Union sector-specific legislation and its e-nforcement. The goal is to assess whether the existing regulatory and policy framework are sufficient for promoting compliance and bridging the enforcement gap in the digital single market. Focusing on the e-food market, the book presents a state-of-the-art overview of how online marketplaces are altering EU law and its enforcement by public authorities.

**Antitrust Analysis of Online Sales Platforms & Copyright Limitations and Exceptions**

Bruce Kilpatrick,Pierre Kobel,Pranvera Këllezi,2018-07-03 This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property. The first part discusses the application of competition law to online sales platforms, which is increasingly a focus for anti-trust authorities around the world. A detailed international report explores which are the major challenges for competition law generated by the growth of online platforms. It provides an excellent comparative study of this complex and challenging subject. The second part of the book gathers contributions from various jurisdictions on the topic "To what extent do current exclusions and limitations to copyright strike a fair balance between the rights of owners and fair use by private individuals and others ? This section presents an international report, which offers an unparalleled comparative analysis of this topic, bringing together common themes and contrasting the various national provisions dealing with exceptions to copyright, amongst other things. The book also includes the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, which include proposed solutions and recommendations. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

In these pages, Calvino recounts his experiences in Italy's antifascist resistance, pays homage to his influences, traces the evolution of his literary style, and, in one of the book's most humorous and entertaining

**The Ghostwriters** Tommaso Pavone,2022-04-07 The European Union is often depicted as a cradle of judicial activism and a polity built by courts. Tommaso Pavone shows how this judge-centric narrative conceals a crucial arena for political action. Beneath the radar, Europe's political development unfolded as a struggle between judges who resisted European law and lawyers who pushed them to embrace change. Under the sheepskin of rights-conscious litigants and activist courts, these "Euro-lawyers" sought clients willing to break state laws conflicting with European law, lobbied national judges to uphold European rules, and propelled them to submit noncompliance cases to the European Union's supreme court – the European Court of Justice – by ghostwriting their referrals. By shadowing lawyers who encourage deliberate law-breaking and mobilize courts against their own governments, The Ghostwriters overturns the conventional wisdom regarding the judicial construction of Europe and illuminates how the politics of lawyers can profoundly impact institutional change and transnational governance.
