Middle Powers and International Organisations Aynsley Kellow, Peter Carroll, 2017-05-26 This book provides a unique examination of how a middle power uses international organisations to achieve greater global influence. The authors focus on the OECD, 'the rich man's club' of most of the world's wealthiest nations. It demonstrates how the decision by Australia to apply for membership was a long drawn out process, delayed by political factors. Eventually agreement was reached with assurances that membership would provide access to valuable and timely policy-related information, especially in relation to international trade and finance. In addition, membership would potentially increase influence by providing greater access to its powerful member states at an earlier stage in their policy discussions and agreements.
