Chicanas of 18th Street Leonard G. Ramirez,Yenelli Flores,Maria Gamboa,Isaura González,Victoria Pérez,Magda Ramirez-Castañeda,Cristina Vital,2011-09-21 Overflowing with powerful testimonies of six female community activists who have lived and worked in the Pilsen neighborhood of Chicago, *Chicanas of 18th Street* reveals the convictions and approaches of those organizing for social reform. In chronicling a pivotal moment in the history of community activism in Chicago, the women discuss how education, immigration, religion, identity, and acculturation affected the Chicano movement. *Chicanas of 18th Street* underscores the hierarchies of race, gender, and class while stressing the interplay of individual and collective values in the development of community reform. Highlighting the women's motivations, initiatives, and experiences in politics during the 1960s and 1970s, these rich personal accounts reveal the complexity of the Chicano movement, conflicts within the movement, and the importance of teatro and cultural expressions to the movement. Also detailed are vital interactions between members of the Chicano movement with leftist and nationalist community members and the influence of other activist groups such as African Americans and Marxists.

Teaching Chemistry – A Studybook Ingo Eilks,Avi Hofstein,2013-04-20 This book focuses on developing and updating prospective and practicing chemistry teachers' pedagogical content knowledge. The 11 chapters of the book discuss the most essential theories from general and science education, and in the second part of each of the chapters apply the theory to examples from the chemistry classroom. Key sentences, tasks for self-assessment, and suggestions for further reading are also included. The book is focused on many different issues a teacher of chemistry is concerned with. The chapters provide contemporary discussions of the chemistry curriculum, objectives and assessment, motivation, learning difficulties, linguistic issues, practical work, student active pedagogies, ICT, informal learning, continuous professional development, and teaching chemistry in developing environments. This book, with contributions from many of the world's top experts in chemistry education, is a major publication offering something that has not previously been available. Within this single volume, chemistry teachers, teacher

educators, and prospective teachers will find information and advice relating to key issues in teaching (such as the curriculum, assessment and so forth), but contextualised in terms of the specifics of teaching and learning of chemistry, and drawing upon the extensive research in the field. Moreover, the book is written in a scholarly style with extensive citations to the literature, thus providing an excellent starting point for teachers and research students undertaking scholarly studies in chemistry education; whilst, at the same time, offering insight and practical advice to support the planning of effective chemistry teaching. This book should be considered essential reading for those preparing for chemistry teaching, and will be an important addition to the libraries of all concerned with chemical education. Dr Keith S. Taber (University of Cambridge; Editor: Chemistry Education Research and Practice) The highly regarded collection of authors in this book fills a critical void by providing an essential resource for teachers of chemistry to enhance pedagogical content knowledge for teaching modern chemistry. Through clever orchestration of examples and theory, and with carefully framed guiding questions, the book equips teachers to act on the relevance of essential chemistry knowledge to navigate such challenges as context, motivation to learn, thinking, activity, language, assessment, and maintaining professional expertise. If you are a secondary or post-secondary teacher of chemistry, this book will quickly become a favorite well-thumbed resource! Professor Hannah Sevan (University of Massachusetts Boston)

The Library Screen Scene Renee Hobbs,Liz Deslauriers,Pam Steager,2019 In the past two decades, several U.S. states have explored ways to mainstream media literacy in school curriculum. However one of the best and most accessible places to learn this necessary skill has not been the traditional classroom but rather the library. In an increasing number of school, public, and academic libraries, shared media experiences such as film screening, learning to computer animate, and video editing promote community and a sense of civic engagement. The Library Screen Scene reveals five core practices used by librarians who work with film and media: viewing, creating, learning, collecting, and connecting. With examples from more than 170 libraries throughout the United States, the book shows how film and media literacy education programs, library services, and media collections teach patrons to critically analyze moving image media, uniting generations, cultures, and communities in the process.
