The puzzle is most frequently a 9 x 9 grid made up of 3 x 3 subgrids (called regions). Some cells already contain numbers, known as givens. There is only one valid solution to each Sudoku puzzle. The only way the puzzle can be considered solved correctly is when all 81 boxes contain numbers and the other Sudoku rules have been followed. When you start a game of Sudoku, some blocks will be pre-filled for you. You cannot change these numbers in the course of the game. Each column must contain all of the numbers 1 through 9 and no two numbers in the same column of a Sudoku puzzle can be the same.
