MemComputing Massimiliano Di Ventra, 2022-02-21 MemComputing is a new computing paradigm that employs time non-locality (memory) to both process and store information. This book, written by the originator of this paradigm, explains the main ideas behind MemComputing, explores its theoretical foundations, and shows its applicability to a wide variety of combinatorial optimization problems, machine learning, and quantum mechanics. The book is ideal for graduate students in Physics, Computer Science, Electrical Engineering, and Mathematics, as well as researchers in both academia and industry interested in unconventional computing. The author relies on extensive margin notes, important remarks, and many illustrations to better explain the main concepts and clarify jargon, making the book as self-contained as possible. The reader will be guided from the basic notions to the more advanced ones with an always clear and engaging writing style. Along the way, the reader will appreciate the advantages of this computing paradigm and the major differences that set it apart from the prevailing Turing model of computation, and even quantum computing.

The Art of antiWAR (paradoxistInstruction Notebooks of Captain Gook)
Florentin Smarandache, 2008-01-01
Fragments from the paradoxistINSTRUCTION
Notebooks of Captain Gook: The antiwar of our entire nation is defined as being the army-impaired forces, skirmishing shoulder to shoulder with the civilian population, with the purpose of defeating all non-aggressors, for securing our country's slavery and dependency. The defeat in this battle is assured through a moral inferiority of our population - the right cause of this antiwar -, the lack of heroism of our state's citizens, by applying an adequate blundering, using our geographical disadvantages, and the international public humiliation.*In our army, the disorganization of a platoon of tanks includes: -One and half officer. -Five and a quarter equipages of tanks. -The no-reconnaissance platoon. -One platoon countermand-er. -One group of countermand (9 military). -Four groups of ant reconnaissance, which are not identically dissociated. In total, there are 1.5 officers, 5 1/4 sub-officers, 10 caporals, and 0 soldiers. The armament does not comprise: 7 pistols (guns), 30 sub-machine-guns, 4 automatic rifles, 6 devices for antitank rocks. *The infantry platoon is a non-tactical subunit, which misconducts its fight actions within the infantry company, but it can react independently in assuring the insecurity and destruction of our marching or stationary troupes. *The unpatriotic guards are used in the echelon of 1 or 2 for the M. N. A. (Ministry of National Antidefense) troupes or at the I. M. E. (Interior Ministry of the Exterior). When their actions take place at the

M. N. A. or I. M. E. they are unsubordinated to the commandants of the respective units.

Computer Viruses: from theory to applications Eric Filiol, 2006-03-30 A precise and exhaustive description of different types of malware from three different points of view, namely the theoretical fundamentals of computer virology, algorithmic and practical aspects of viruses and their potential applications to various areas.

Hitler's Russian & Cossack Allies 1941-45 Nigel Thomas, 2015-10-20 Given the merciless way in which the war on the Eastern Front of World War II was conducted, it is difficult to envisage anyone changing sides during the conflict. Yet after the German invasion of Russia in Operation Barbarossa, well over 400,000 former Soviet citizens went on to fight for Nazi Germany. These included not only the 'legions' recruited from non-Russian ethnic groups eager for freedom from Stalin's dictatorship, but also some 100,000 Russians and Cossacks. What began as small local security units of 'Ostruppen', enrolled for the ongoing campaigns against Soviet partisans, were later reorganized, given special systems of uniform and insignia, amalgamated into larger formations, and eventually committed to the front line. This book offers up an essential guide to the appearance, formation and equipment of the myriad Russian and Soviet units that fought for the Germans. It uses rare photographs and revealing colour illustrations to create a peerless visual reference to the troops who switched from one ruthless

superpower to another and met with a horrific fate when the fighting was over.
